

VA Point of Service (VPS) Kiosk

Release 1.3 (Patch VPS*1.0*3) of the VPS Kiosk contains four new Remote Procedure Calls (RPCs) to provide VetLink capability to:

- a. Retrieve Patient Allergies from VistA which will be used to display local allergy in VetLink.
- b. Store MRAR (Medication Review & Allergy Review) information in VistA for statistical and analytical purposes.
- c. Create TIU Note based on the stored MRAR.
- d. Store Kiosk parameters changes to VistA for statistical and analytical purposes.
