1 Scope

This section outlines the scope of the software release described in this Version Description Document (VDD).

1.1 System Overview

Administrative Data Repository (ADR) is a transactional database that constitutes the data service layer of the n-tier HealthVet architecture. ADR stores person identity, person demographics, and eligibility and enrollment data for the HeV Person Services (PS) and Enrollment System (ESR) projects. It also contains data migrated from the Master Patient Index (MPI) and Health Eligibility Center (HEC) legacy files. ADR provides identity management and demographics support for all IT systems within the Department of Veterans Affairs.

1.2 Release Identification

This VDD identifies and describes ADR Release 3.8.0.0 and all components that were added, modified, or deleted for this release.

1.2.1 Dependencies

The software dependencies for this ADR release are listed below:

Software System	Version
Standard Data Service (SDS)	N/A
ADR	Rel 3.7.x

For environment-related dependencies, see Section 3.5.

1.2.2 Security Statement

No information that could enable or aid unauthorized access to ADR (i.e., system passwords, active controls, embedded queries) is contained in the files of this release.

1.3 Acronyms

Acronyms defined in this document can be found in the *Repositories Acronym List*. A Portable Document Format (PDF) version of the *Repositories Acronym List* is stored in the ADR Phase II Project Notebook on Technical Services Project Repository (TSPR) and will be updated or revised whenever the master list is updated or revised.

If you do not have VA network or TSPR access, contact the author of the document or your Repositories point of contact to request access to the Acronyms and References libraries.

2 Reference Documents

Table 2.0-1 lists documents that describe the requirements and design of this ADR release.

Table 2.0-1. Reference Document(s)

Document Name	Revision	Release Date
None		

3 Version Description

This section describes the components of this ADR release.

3.1 Inventory of Materials Released

For a detailed list of materials included in this release, see Appendix A.

3.2 Inventory of Configuration Item (CI) Contents

Not applicable.

3.3 Change Requests Included

The following ADR Code CRs (CCRs) have been incorporated into this release:

Change Request	Description
CCR 2118	Add a Column to the ADR.INCOME_TEST table

3.4 Summary of Changes

This ADR release includes the following fixes and enhancements:

- Add a Column to the ADR.INCOME_TEST table

3.5 Environment Information

The specified CodeCRs were unit tested and are to be deployed in the following ADR environments.

CCR 2118 - (ENH) Add column to INCOME TEST table			
DEPLOYMENT TARGETS			
ENVIRONMENT	DEPLOY	AUTHORITY	NOTES

Enhancement Path

	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order

NO Downtime

NO Dependency

**This change is needed for the ESR 4.3 Enrollment project.
This database change can be done before the ESR 4.3 application has been
deployed.**

**This change has no impact to the current ES version.
This change has no impact to earlier ES versions (ES 4.0 / ES 4.1 / ES 4.2)**

4 Testing and Deployment

This section records details about the testing and deployment of this ADR release.

4.1 Test Summary

The results of ADR SQA and third-party testing are summarized below.

ADR CodeCR #	CCR Description	Test Results	SQA Testing Notes
CCR 2118	Add a Column to the ADR.INCOME_TEST Table	Pass	09/10/14 - Walter tested on [REDACTED] & 02 and passed - Pass Pending.

4.2 ADRMGT Schema Check

Verify that a new record for this release has been created in the ADRMGT Schema:

Column Name	Notes	Observed Values	State
Database Name(s):	Verify Value = {DB Instances) <may be Multiple>	[REDACTED] & [REDACTED]	Pass
Release Number:	Verify Value = {this Release Number}	3.8.0.0	Pass
CCR Number(s):	Verify Value = {Clear Quest Number) <may be Multiple>	2118	Pass
Orig Deployment Date:	Verify Value = (date deployed or NULL)	12-SEP-2014 09:23:23 12-SEP-2014 09:23:45	Pass
Last Dep Update Date:	Verify Value = (recent date or NULL)	12-SEP-2014 09:23:23 12-SEP-2014 09:23:45	Pass

4.3 Deployment Approval

IMPORTANT! Approval from SQA Management must be received via email before this release can be promoted to the target development environment(s) for the next level of testing.

SQA Management Approval	 RE ADRCQ 2118 - Release 3 8 0 0 VDD /	Date: 09/12/2014
-------------------------	---	---------------------

4.3.1 Developer Access Note

The User ID/Password is the same as provided in previous releases.

5 Installation Instructions

The installation of this ADR release occurs through a series of SQL scripts. An installation script called **run_wrapper.sql** executes each SQL script and is run from an SQL prompt.

To obtain the installation scripts for this ADR release, please contact the [ADR Development Manager](#).

If you have any questions about ADR installation, please contact the [ADR Database Administration Team](#).

5.1 Installation and Prerequisites

For installation instructions and information about prerequisites, refer to the installation instruction files contained in the release package.

5.2 Additional Release Notes

None.

5.3 Rollback Plan

For rollback instructions and information about rollback prerequisites, refer to this release's deployment instructions email to the AITC DBAs or contact the ADR CM. Rollback scripts will be provided to the AITC DBAs upon request.

1 Scope

This section outlines the scope of the software release described in this Version Description Document (VDD).

1.1 System Overview

Administrative Data Repository (ADR) is a transactional database that constitutes the data service layer of the n-tier HealthVet architecture. ADR stores person identity, person demographics, and eligibility and enrollment data for the HeV Person Services (PS) and Enrollment System (ESR) projects. It also contains data migrated from the Master Patient Index (MPI) and Health Eligibility Center (HEC) legacy files. ADR provides identity management and demographics support for all IT systems within the Department of Veterans Affairs.

1.2 Release Identification

This VDD identifies and describes ADR Release 3.8.1.0 and all components that were added, modified, or deleted for this release.

1.2.1 Dependencies

The software dependencies for this ADR release are listed below:

Software System	Version
Standard Data Service (SDS)	N/A
ADR	Rel 3.7.x

For environment-related dependencies, see Section 3.5.

1.2.2 Security Statement

No information that could enable or aid unauthorized access to ADR (i.e., system passwords, active controls, embedded queries) is contained in the files of this release.

1.3 Acronyms

Acronyms defined in this document can be found in the *Repositories Acronym List*. A Portable Document Format (PDF) version of the *Repositories Acronym List* is stored in the ADR Phase II Project Notebook on Technical Services Project Repository (TSPR) and will be updated or revised whenever the master list is updated or revised.

If you do not have VA network or TSPR access, contact the author of the document or your Repositories point of contact to request access to the Acronyms and References libraries.

2 Reference Documents

Table 2.0-1 lists documents that describe the requirements and design of this ADR release.

Table 2.0-1. Reference Document(s)

Document Name	Revision	Release Date
None		

3 Version Description

This section describes the components of this ADR release.

3.1 Inventory of Materials Released

For a detailed list of materials included in this release, see Appendix A.

3.2 Inventory of Configuration Item (CI) Contents

Not applicable.

3.3 Change Requests Included

The following ADR Code CRs (CCRs) have been incorporated into this release:

Change Request	Description
CCR 2119	Update a record in the ADR.COM_EMAIL_TEMPLATE table

3.4 Summary of Changes

This ADR release includes the following fixes and enhancements:

- Update a record in the ADR.COM_EMAIL_TEMPLATE table

3.5 Environment Information

The specified CodeCRs were unit tested and are to be deployed in the following ADR environments.

CCR 2119 (ENH) Update 1 row COM EMAIL TEMPLATE table

	YES	ADR	Standard deployment order

NO Downtime

NO Dependency

This database change is independent on the ES 4.3 application being installed. These changes can be installed before ES 4.3 is installed and will not impact existing ES applications.

This change has no impact to the current ES version.

This change has no impact to earlier ES versions (ES 4.0 / ES 4.1 / ES 4.2)

4 Testing and Deployment

This section records details about the testing and deployment of this ADR release.

4.1 Test Summary

The results of ADR SQA and third-party testing are summarized below.

ADR CodeCR #	CCR Description	Test Results	SQA Testing Notes
CCR 2119	Update a record in the ADR.COM_EMAIL_TEMPLATE table	PASS	09/11/14 - Walter tested on [REDACTED] & 02, passed - Pass Pending.

4.2 ADRMGT Schema Check

Verify that a new record for this release has been created in the ADRMGT Schema:

Column Name	Notes	Observed Values	State
Database Name(s):	Verify Value = {DB Instances} <may be Multiple>	[REDACTED]	PASS
Release Number:	Verify Value = {this Release Number}	3.8.1.0	PASS
CCR Number(s):	Verify Value = {Clear Quest Number} <may be Multiple>	2119	PASS
Orig Deployment Date:	Verify Value = (date deployed or NULL)	15-SEP-2014 15:13:39 11-SEP-2014 12:35:06	PASS
Last Dep Update Date:	Verify Value = (recent date or NULL)	15-SEP-2014 15:13:39 15-SEP-2014 15:13:59	PASS

4.3 Deployment Approval

IMPORTANT! Approval from SQA Management must be received via email before this release can be promoted to the target development environment(s) for the next level of testing.

SQA Management Approval	 RE-ADRC.MSG 	Date: 09/16/2014
-------------------------	---	---------------------

4.3.1 Developer Access Note

The User ID/Password is the same as provided in previous releases.

5 Installation Instructions

The installation of this ADR release occurs through a series of SQL scripts. An installation script called **run_wrapper.sql** executes each SQL script and is run from an SQL prompt.

To obtain the installation scripts for this ADR release, please contact the [ADR Development Manager](#).

If you have any questions about ADR installation, please contact the [ADR Database Administration Team](#).

5.1 Installation and Prerequisites

For installation instructions and information about prerequisites, refer to the installation instruction files contained in the release package.

5.2 Additional Release Notes

None.

5.3 Rollback Plan

For rollback instructions and information about rollback prerequisites, refer to this release's deployment instructions email to the AITC DBAs or contact the ADR CM. Rollback scripts will be provided to the AITC DBAs upon request.

1 Scope

This section outlines the scope of the software release described in this Version Description Document (VDD).

1.1 System Overview

Administrative Data Repository (ADR) is a transactional database that constitutes the data service layer of the n-tier HealthVet architecture. ADR stores person identity, person demographics, and eligibility and enrollment data for the HeV Person Services (PS) and Enrollment System (ESR) projects. It also contains data migrated from the Master Patient Index (MPI) and Health Eligibility Center (HEC) legacy files. ADR provides identity management and demographics support for all IT systems within the Department of Veterans Affairs.

1.2 Release Identification

This VDD identifies and describes ADR Release 3.8.2.0 and all components that were added, modified, or deleted for this release.

1.2.1 Dependencies

The software dependencies for this ADR release are listed below:

Software System	Version
Standard Data Service (SDS)	N/A
ADR	Rel 3.7.x

For environment-related dependencies, see Section 3.5.

1.2.2 Security Statement

No information that could enable or aid unauthorized access to ADR (i.e., system passwords, active controls, embedded queries) is contained in the files of this release.

1.3 Acronyms

Acronyms defined in this document can be found in the *Repositories Acronym List*. A Portable Document Format (PDF) version of the *Repositories Acronym List* is stored in the ADR Phase II Project Notebook on Technical Services Project Repository (TSPR) and will be updated or revised whenever the master list is updated or revised.

If you do not have VA network or TSPR access, contact the author of the document or your Repositories point of contact to request access to the Acronyms and References libraries.

2 Reference Documents

Table 2.0-1 lists documents that describe the requirements and design of this ADR release.

Table 2.0-1. Reference Document(s)

Document Name	Revision	Release Date
None		

3 Version Description

This section describes the components of this ADR release.

3.1 Inventory of Materials Released

For a detailed list of materials included in this release, see Appendix A.

3.2 Inventory of Configuration Item (CI) Contents

Not applicable.

3.3 Change Requests Included

The following ADR Code CRs (CCRs) have been incorporated into this release:

Change Request	Description
CCR 2120	Create LANGUAGE_CODE and PERSON_PREF_LANG tables

3.4 Summary of Changes

This ADR release includes the following fixes and enhancements:

- Create LANGUAGE_CODE and PERSON_PREF_LANG tables

3.5 Environment Information

The specified CodeCRs were unit tested and are to be deployed in the following ADR environments.

CCR 2120			
Create LANG CODE and PRSN PREF LANG tables			
DEPLOYMENT TARGETS			
ENVIRONMENT	DEPLOY	AUTHORITY	NOTES

Enhancement Path

[REDACTED]	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
[REDACTED]	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
[REDACTED]	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
[REDACTED]	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order

NO Downtime

NO Dependency

This change is needed for the ES 4.2 Enrollment release.

This database change can be done before the ES 4.2 application has been deployed.

This change has no impact to the current ES version.

This change has no impact to earlier ES versions (ES 4.0 / ES 4.1)

This change has no impact on ES 4.3 and the DB changes can be applied to [REDACTED] and [REDACTED] and [REDACTED]

4 Testing and Deployment

This section records details about the testing and deployment of this ADR release.

4.1 Test Summary

The results of ADR SQA and third-party testing are summarized below.

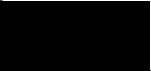

ADR CodeCR #	CCR Description	Test Results	SQA Testing Notes
CCR 2120	Create LANGUAGE_CODE and PERSON_PREF_LAN G tables	PASS	09/18/2014-Andrew K. Tested on [REDACTED] & 02 - Failed due to Requirements documetation error 09/18/2014-Andrew K. Retested on [REDACTED] and 02 - PASS_PENDING - 1 Defect
		Failed / PASS	09/25/2014-Bug found by customer, which is was not part of requirements. DB corrected and redeployed on [REDACTED] and

4.2 ADRMGT Schema Check

Verify that a new record for this release has been created in the ADRMGT Schema:

Column Name	Notes	Observed Values	State
Database Name(s):	Verify Value = {DB Instances} <may be Multiple>	[REDACTED]	PASS
Release Number:	Verify Value = {this Release Number}	3.8.2.0	PASS
CCR Number(s):	Verify Value = {Clear Quest Number} <may be Multiple>	2120	PASS
Orig Deployment Date:	Verify Value = (date deployed or NULL)	19-SEP-2014 12:11:14 19-SEP-2014 12:11:29	PASS
Last Dep Update Date:	Verify Value = (recent date or NULL)	19-SEP-2014 12:11:14 19-SEP-2014 12:11:29	PASS

Version 2

Column Name	Notes	Observed Values	State
Database Name(s):	Verify Value = {DB Instances} <may be Multiple>		PASS
Release Number:	Verify Value = {this Release Number}	3.8.2.0	PASS
CCR Number(s):	Verify Value = {Clear Quest Number} <may be Multiple>	2120	PASS
Orig Deployment Date:	Verify Value = (date deployed or NULL)	25-SEP-2014 12:39:43 25-SEP-2014 12:40:05	PASS
Last Dep Update Date:	Verify Value = (recent date or NULL)	25-SEP-2014 12:39:43 25-SEP-2014 12:40:05	PASS

Deployment Approval

IMPORTANT! Approval from SQA Management must be received via email before this release can be promoted to the target development environment(s) for the next level of testing.

SQA Management Approval	 RE-ADRC.MSG 	Date: 09/22/2014
SQA Management Approval for V2	 RE-ADRC.MSG 	09/25/2014

4.2.1 Developer Access Note

The User ID/Password is the same as provided in previous releases.

5 Installation Instructions

The installation of this ADR release occurs through a series of SQL scripts. An installation script called **run_wrapper.sql** executes each SQL script and is run from an SQL prompt.

To obtain the installation scripts for this ADR release, please contact the [ADR Development Manager](#).

If you have any questions about ADR installation, please contact the [ADR Database Administration Team](#).

5.1 Installation and Prerequisites

For installation instructions and information about prerequisites, refer to the installation instruction files contained in the release package.

5.2 Additional Release Notes

None.

5.3 Rollback Plan

For rollback instructions and information about rollback prerequisites, refer to this release's deployment instructions email to the AITC DBAs or contact the ADR CM. Rollback scripts will be provided to the AITC DBAs upon request.

ROLLBACK OPTIONS

1 Scope

This section outlines the scope of the software release described in this Version Description Document (VDD).

1.1 System Overview

Administrative Data Repository (ADR) is a transactional database that constitutes the data service layer of the n-tier HealthVet architecture. ADR stores person identity, person demographics, and eligibility and enrollment data for the HeV Person Services (PS) and Enrollment System (ESR) projects. It also contains data migrated from the Master Patient Index (MPI) and Health Eligibility Center (HEC) legacy files. ADR provides identity management and demographics support for all IT systems within the Department of Veterans Affairs.

1.2 Release Identification

This VDD identifies and describes ADR Release 3.8.3.0 and all components that were added, modified, or deleted for this release.

1.2.1 Dependencies

The software dependencies for this ADR release are listed below:

Software System	Version
Standard Data Service (SDS)	N/A
ADR	Rel 3.7.x

For environment-related dependencies, see Section 3.5.

1.2.2 Security Statement

No information that could enable or aid unauthorized access to ADR (i.e., system passwords, active controls, embedded queries) is contained in the files of this release.

1.3 Acronyms

Acronyms defined in this document can be found in the *Repositories Acronym List*. A Portable Document Format (PDF) version of the *Repositories Acronym List* is stored in the ADR Phase II Project Notebook on Technical Services Project Repository (TSPR) and will be updated or revised whenever the master list is updated or revised.

If you do not have VA network or TSPR access, contact the author of the document or your Repositories point of contact to request access to the Acronyms and References libraries.

2 Reference Documents

Table 2.0-1 lists documents that describe the requirements and design of this ADR release.

Table 2.0-1. Reference Document(s)

Document Name	Revision	Release Date
None		

3 Version Description

This section describes the components of this ADR release.

3.1 Inventory of Materials Released

For a detailed list of materials included in this release, see Appendix A.

3.2 Inventory of Configuration Item (CI) Contents

Not applicable.

3.3 Change Requests Included

The following ADR Code CRs (CCRs) have been incorporated into this release:

Change Request	Description
CCR 2129	Insert EESRV row for Income Year

3.4 Summary of Changes

This ADR release includes the following fixes and enhancements:

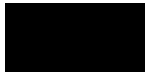

- Insert EESRV row for Income Year

3.5 Environment Information

The specified CodeCRs were unit tested and are to be deployed in the following ADR environments.

CCR 2129			
Insert EESRV row for Income Year			
DEPLOYMENT TARGETS			
ENVIRONMENT	DEPLOY	AUTHORITY	NOTES

Enhancement Path

	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order

NO Downtime

NO Dependency

This change is needed for the ESR 4.3 Enrollment project.
This database change can be done before the ESR 4.3 application has been deployed.

This change has no impact to the current ES version.
This change has no impact to earlier ES versions (ES 4.0 / ES 4.1 / ES 4.2)

4 Testing and Deployment

This section records details about the testing and deployment of this ADR release.

4.1 Test Summary

The results of ADR SQA and third-party testing are summarized below.

ADR CodeCR #	CCR Description	Test Results	SQA Testing Notes
CCR 2129	Insert EESRV row for Income Year	PASS	09/23/2014- tested on and SQA02 PASS - 0 Defects

4.2 ADRMGT Schema Check

Verify that a new record for this release has been created in the ADRMGT Schema:

Column Name	Notes	Observed Values	State
Database Name(s):	Verify Value = {DB Instances} <may be Multiple>		PASS
Release Number:	Verify Value = {this Release Number}	3.8.3.0	PASS
CCR Number(s):	Verify Value = {Clear Quest Number} <may be Multiple>	2129	PASS
Orig Deployment Date:	Verify Value = (date deployed or NULL)	24-SEP-2014 12:54:03 24-SEP-2014 12:54:38	PASS
Last Dep Update Date:	Verify Value = (recent date or NULL)	24-SEP-2014 12:54:03 24-SEP-2014 12:54:38	PASS

4.3 Deployment Approval

IMPORTANT! Approval from SQA Management must be received via email before this release can be promoted to the target development environment(s) for the next level of testing.

SQA Management Approval	 RE-ADRC.MSG 	Date: 09/24/2014
-------------------------	---	---------------------

4.3.1 Developer Access Note

The User ID/Password is the same as provided in previous releases.

5 Installation Instructions

The installation of this ADR release occurs through a series of SQL scripts. An installation script called **run_wrapper.sql** executes each SQL script and is run from an SQL prompt.

To obtain the installation scripts for this ADR release, please contact the [ADR Development Manager](#).

If you have any questions about ADR installation, please contact the [ADR Database Administration Team](#).

5.1 Installation and Prerequisites

For installation instructions and information about prerequisites, refer to the installation instruction files contained in the release package.

5.2 Additional Release Notes

None.

5.3 Rollback Plan

For rollback instructions and information about rollback prerequisites, refer to this release's deployment instructions email to the AITC DBAs or contact the ADR CM. Rollback scripts will be provided to the AITC DBAs upon request.

1 Scope

This section outlines the scope of the software release described in this Version Description Document (VDD).

1.1 System Overview

Administrative Data Repository (ADR) is a transactional database that constitutes the data service layer of the n-tier HealthVet architecture. ADR stores person identity, person demographics, and eligibility and enrollment data for the HeV Person Services (PS) and Enrollment System (ESR) projects. It also contains data migrated from the Master Patient Index (MPI) and Health Eligibility Center (HEC) legacy files. ADR provides identity management and demographics support for all IT systems within the Department of Veterans Affairs.

1.2 Release Identification

This VDD identifies and describes ADR Release 3.8.4.0 and all components that were added, modified, or deleted for this release.

1.2.1 Dependencies

The software dependencies for this ADR release are listed below:

Software System	Version
Standard Data Service (SDS)	N/A
ADR	Rel 3.7.x

For environment-related dependencies, see Section 3.5.

1.2.2 Security Statement

No information that could enable or aid unauthorized access to ADR (i.e., system passwords, active controls, embedded queries) is contained in the files of this release.

1.3 Acronyms

Acronyms defined in this document can be found in the *Repositories Acronym List*. A Portable Document Format (PDF) version of the *Repositories Acronym List* is stored in the ADR Phase II Project Notebook on Technical Services Project Repository (TSPR) and will be updated or revised whenever the master list is updated or revised.

If you do not have VA network or TSPR access, contact the author of the document or your Repositories point of contact to request access to the Acronyms and References libraries.

NO Downtime

NO Dependency

This change is needed for the ES 4.2 Enrollment release.

This database change can be done before the ES 4.2 application has been deployed.

This change has no impact to the current ES version.

This change has no impact to earlier ES versions (ES 4.0 / ES 4.1)

This change has no impact on ES 4.3 and the DB changes can be applied to [REDACTED] and [REDACTED] and [REDACTED]

4 Testing and Deployment

This section records details about the testing and deployment of this ADR release.

4.1 Test Summary

The results of ADR SQA and third-party testing are summarized below.

ADR CodeCR #	CCR Description	Test Results	SQA Testing Notes
CCR 2132	Insert 1 row into the ADR.APP_PARAMETER table SID indicator	P/F/RT/P	10/01/2014-Andrew K Tested on [REDACTED] PASS - 0 Defects. 10/01/2014-Requirements were changed to add [REDACTED] - 1 Defect. 10/02/2014-Andrew K Tested on [REDACTED] PASS.

4.2 ADRMGT Schema Check

Verify that a new record for this release has been created in the ADRMGT Schema:

Column Name	Notes	Observed Values	State
Database Name(s):	Verify Value = {DB Instances} <may be Multiple>	[REDACTED]	PASS
Release Number:	Verify Value = {this Release Number}	3.8.5.0	PASS
CCR Number(s):	Verify Value = {Clear Quest Number} <may be Multiple>	2132	PASS
Orig Deployment Date:	Verify Value = (date deployed or NULL)	01-OCT-2014 15:48:49 01-OCT-2014 15:49:03	PASS
Last Dep Update Date:	Verify Value = (recent date or NULL)	01-OCT-2014 15:48:49 01-OCT-2014 15:49:03	PASS

4.3 Deployment Approval

IMPORTANT! Approval from SQA Management must be received via email before this release can be promoted to the target development environment(s) for the next level of testing.

SQA Management Approval	 RE-ADRC.MSG	Date: 10/02/2014
-------------------------	--	---------------------

4.3.1 Developer Access Note

The User ID/Password is the same as provided in previous releases.

5 Installation Instructions

The installation of this ADR release occurs through a series of SQL scripts. An installation script called **run_wrapper.sql** executes each SQL script and is run from an SQL prompt.

To obtain the installation scripts for this ADR release, please contact the [ADR Development Manager](#).

If you have any questions about ADR installation, please contact the [ADR Database Administration Team](#).

5.1 Installation and Prerequisites

For installation instructions and information about prerequisites, refer to the installation instruction files contained in the release package.

5.2 Additional Release Notes

None.

5.3 Rollback Plan

For rollback instructions and information about rollback prerequisites, refer to this release's deployment instructions email to the AITC DBAs or contact the ADR CM. Rollback scripts will be provided to the AITC DBAs upon request.

1 Scope

This section outlines the scope of the software release described in this Version Description Document (VDD).

1.1 System Overview

Administrative Data Repository (ADR) is a transactional database that constitutes the data service layer of the n-tier HealthVet architecture. ADR stores person identity, person demographics, and eligibility and enrollment data for the HeV Person Services (PS) and Enrollment System (ESR) projects. It also contains data migrated from the Master Patient Index (MPI) and Health Eligibility Center (HEC) legacy files. ADR provides identity management and demographics support for all IT systems within the Department of Veterans Affairs.

1.2 Release Identification

This VDD identifies and describes ADR Release 3.8.6.0 and all components that were added, modified, or deleted for this release.

1.2.1 Dependencies

The software dependencies for this ADR release are listed below:

Software System	Version
Standard Data Service (SDS)	N/A
ADR	Rel 3.7.x

For environment-related dependencies, see Section 3.5.

1.2.2 Security Statement

No information that could enable or aid unauthorized access to ADR (i.e., system passwords, active controls, embedded queries) is contained in the files of this release.

1.3 Acronyms

Acronyms defined in this document can be found in the *Repositories Acronym List*. A Portable Document Format (PDF) version of the *Repositories Acronym List* is stored in the ADR Phase II Project Notebook on Technical Services Project Repository (TSPR) and will be updated or revised whenever the master list is updated or revised.

If you do not have VA network or TSPR access, contact the author of the document or your Repositories point of contact to request access to the Acronyms and References libraries.

2 Reference Documents

Table 2.0-1 lists documents that describe the requirements and design of this ADR release.

Table 2.0-1. Reference Document(s)

Document Name	Revision	Release Date
None		

3 Version Description

This section describes the components of this ADR release.

3.1 Inventory of Materials Released

For a detailed list of materials included in this release, see Appendix A.

3.2 Inventory of Configuration Item (CI) Contents

Not applicable.

3.3 Change Requests Included

The following ADR Code CRs (CCRs) have been incorporated into this release:

Change Request	Description
CCR 2134	Add 2 columns to PERSON table and insert 1 row in APP_PARAMETER table

3.4 Summary of Changes

This ADR release includes the following fixes and enhancements:

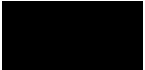

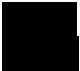

- Add 2 columns to PERSON table and insert 1 row in APP_PARAMETER table

3.5 Environment Information

The specified CodeCRs were unit tested and are to be deployed in the following ADR environments.

CQ 2134 (ENH)			
Add 2 cols PERSON insert 1 row APP PARAM			
DEPLOYMENT TARGETS			
ENVIRONMENT	DEPLOY	AUTHORITY	NOTES

YES – Downtime ES and PSIM applicaitons

NO Dependency

This change is needed for the ESR 4.2 Enrollment project.
This database change can be done before the ESR 4.2 application has been deployed.

This change has no impact to the current ES version.
This change has no impact to earlier ES versions (ES 4.0 / ES 4.1)

4 Testing and Deployment

This section records details about the testing and deployment of this ADR release.

4.1 Test Summary

The results of ADR SQA and third-party testing are summarized below.

ADR CodeCR #	CCR Description	Test Results	SQA Testing Notes
CCR 2134	Add 2 columns to PERSON table and insert 1 row in APP_PARAMETER table	PASS	10/2/2014-Andrew K Tested on [REDACTED] and [REDACTED] - PASS - 0 Defects

4.2 ADRMGT Schema Check

Verify that a new record for this release has been created in the ADRMGT Schema:

Column Name	Notes	Observed Values	State
Database Name(s):	Verify Value = {DB Instances} <may be Multiple>	[REDACTED]	PASS
Release Number:	Verify Value = {this Release Number}	3.8.6.0	PASS
CCR Number(s):	Verify Value = {Clear Quest Number} <may be Multiple>	2134	PASS
Orig Deployment Date:	Verify Value = (date deployed or NULL)	02-OCT-2014 10:07:37 02-OCT-2014 10:07:53	PASS
Last Dep Update Date:	Verify Value = (recent date or NULL)	02-OCT-2014 10:07:37 02-OCT-2014 10:07:53	PASS

4.3 Deployment Approval

IMPORTANT! Approval from SQA Management must be received via email before this release can be promoted to the target development environment(s) for the next level of testing.

SQA Management Approval	 RE ADRCQ 2134 - Release 3 8 6 0 Appri [REDACTED]	Date: 10/02/2014
-------------------------	---	---------------------

4.3.1 Developer Access Note

The User ID/Password is the same as provided in previous releases.

5 Installation Instructions

The installation of this ADR release occurs through a series of SQL scripts. An installation script called **run_wrapper.sql** executes each SQL script and is run from an SQL prompt.

To obtain the installation scripts for this ADR release, please contact the [ADR Development Manager](#).

If you have any questions about ADR installation, please contact the [ADR Database Administration Team](#).

5.1 Installation and Prerequisites

For installation instructions and information about prerequisites, refer to the installation instruction files contained in the release package.

5.2 Additional Release Notes

None.

5.3 Rollback Plan

For rollback instructions and information about rollback prerequisites, refer to this release's deployment instructions email to the AITC DBAs or contact the ADR CM. Rollback scripts will be provided to the AITC DBAs upon request.

1 Scope

This section outlines the scope of the software release described in this Version Description Document (VDD).

1.1 System Overview

Administrative Data Repository (ADR) is a transactional database that constitutes the data service layer of the n-tier HealthVet architecture. ADR stores person identity, person demographics, and eligibility and enrollment data for the HeV Person Services (PS) and Enrollment System (ESR) projects. It also contains data migrated from the Master Patient Index (MPI) and Health Eligibility Center (HEC) legacy files. ADR provides identity management and demographics support for all IT systems within the Department of Veterans Affairs.

1.2 Release Identification

This VDD identifies and describes ADR Release 3.8.7.0 and all components that were added, modified, or deleted for this release.

1.2.1 Dependencies

The software dependencies for this ADR release are listed below:

Software System	Version
Standard Data Service (SDS)	N/A
ADR	Rel 3.7.x

For environment-related dependencies, see Section 3.5.

1.2.2 Security Statement

No information that could enable or aid unauthorized access to ADR (i.e., system passwords, active controls, embedded queries) is contained in the files of this release.

1.3 Acronyms

Acronyms defined in this document can be found in the *Repositories Acronym List*. A Portable Document Format (PDF) version of the *Repositories Acronym List* is stored in the ADR Phase II Project Notebook on Technical Services Project Repository (TSPR) and will be updated or revised whenever the master list is updated or revised.

If you do not have VA network or TSPR access, contact the author of the document or your Repositories point of contact to request access to the Acronyms and References libraries.

2 Reference Documents

Table 2.0-1 lists documents that describe the requirements and design of this ADR release.

Table 2.0-1. Reference Document(s)

Document Name	Revision	Release Date
None		

3 Version Description

This section describes the components of this ADR release.

3.1 Inventory of Materials Released

For a detailed list of materials included in this release, see Appendix A.

3.2 Inventory of Configuration Item (CI) Contents

Not applicable.

3.3 Change Requests Included

The following ADR Code CRs (CCRs) have been incorporated into this release:

Change Request	Description
CCR 2133	Insert EESRV row for Pref Language

3.4 Summary of Changes

This ADR release includes the following fixes and enhancements:

- Insert one record into the EESRV.Field table for Preferred Language indicator to support ES 4.2 Legislative Changes.

3.5 Environment Information

The specified CodeCRs were unit tested and are to be deployed in the following ADR environments.

CQ 2133 (ENH)			
Insert EESRV row for Pref Language			
DEPLOYMENT TARGETS

	YES	ADR	Standard deployment order

NO Downtime

NO Dependency

This change has no impact to the current ES version.

This change has no impact to earlier ES versions (ES 4.0 / ES 4.1)

This change has no impact on ES 4.3 and the DB changes can be applied to [REDACTED] and [REDACTED] and [REDACTED]

4 Testing and Deployment

This section records details about the testing and deployment of this ADR release.

4.1 Test Summary

The results of ADR SQA and third-party testing are summarized below.

ADR CodeCR #	CCR Description	Test Results	SQA Testing Notes
CCR 2133	Insert EESRV row for Pref Language	PASS	10/01/2014- [REDACTED] and [REDACTED] PASS - 0 Defects

4.2 ADRMGT Schema Check

Verify that a new record for this release has been created in the ADRMGT Schema:

Column Name	Notes	Observed Values	State
Database Name(s):	Verify Value = {DB Instances} <may be Multiple>	[REDACTED]	PASS
Release Number:	Verify Value = {this Release Number}	3.8.7.0	PASS
CCR Number(s):	Verify Value = {Clear Quest Number} <may be Multiple>	2133	PASS

YES – ESR Application Downtime

YES – Dependency - CCR2120 must be deployed before this change

This change is needed for the ES 4.2 Enrollment release.
This database change can be done before the ES 4.2 application has been deployed.

This change has no impact to the current ES version.
This change has no impact to earlier ES versions (ES 4.0 / ES 4.1)
This change must be deployed after ADR CCR 2120.

4 Testing and Deployment

This section records details about the testing and deployment of this ADR release.

4.1 Test Summary

The results of ADR SQA and third-party testing are summarized below.

ADR CodeCR #	CCR Description	Test Results	SQA Testing Notes
CCR 2141	Drop and create STD_LANGUAGECODE table in ADRREF	PASS	10/15/2014 - Walter and Andrew tested on [REDACTED] and 02. Two Fields in ADRREF.STD_LANGUAGECODEHISTORY had their nullable property's incorrect. 10/16/2014 -Walter and Andrew retested on [REDACTED] and 02 Pass - 2 Defects
CCR 2141	Drop and create STD_LANGUAGECODE table in ADRREF	PASS	10/20/2014 - Failed during deployment due to missing column in the STD_LANGUAGECODE table. Fixed code and retested on [REDACTED] & 02.

4.2 ADRMGT Schema Check

Verify that a new record for this release has been created in the ADRMGT Schema:

Column Name	Notes	Observed Values	State
Database Name(s):	Verify Value = {DB Instances) <may be Multiple>	[REDACTED]	PASS
Release Number:	Verify Value = {this Release Number}	3.8.9.0	PASS
CCR Number(s):	Verify Value = {Clear Quest Number) <may be Multiple>	2141	PASS
Orig Deployment Date:	Verify Value = (date deployed or NULL)	20-OCT-2014 12:24:43 20-OCT-2014 12:24:54	PASS
Last Dep Update Date:	Verify Value = (recent date or NULL)	20-OCT-2014 12:24:43 20-OCT-2014 12:24:54	PASS

4.3 Deployment Approval

IMPORTANT! Approval from SQA Management must be received via email before this release can be promoted to the target development environment(s) for the next level of testing.

SQA Management Approval	 RE ADRCQ 2141 - Release 3 8 9 0 VDD /	Date: 10/16/2014
SQA Management 2 nd Approval	 RE ADRCQ 2141 - Release 3 8 9 0v2 VD	Date: 10/20/2014

4.3.1 Developer Access Note

The User ID/Password is the same as provided in previous releases.

5 Installation Instructions

The installation of this ADR release occurs through a series of SQL scripts. An installation script called **run_wrapper.sql** executes each SQL script and is run from an SQL prompt.

To obtain the installation scripts for this ADR release, please contact the [ADR Development Manager](#).

If you have any questions about ADR installation, please contact the [ADR Database Administration Team](#).

5.1 Installation and Prerequisites

For installation instructions and information about prerequisites, refer to the installation instruction files contained in the release package.

5.2 Additional Release Notes

None.

5.3 Rollback Plan

For rollback instructions and information about rollback prerequisites, refer to this release's deployment instructions email to the AITC DBAs or contact the ADR CM. Rollback scripts will be provided to the AITC DBAs upon request.

1 Scope

This section outlines the scope of the software release described in this Version Description Document (VDD).

1.1 System Overview

Administrative Data Repository (ADR) is a transactional database that constitutes the data service layer of the n-tier HealthVet architecture. ADR stores person identity, person demographics, and eligibility and enrollment data for the HeV Person Services (PS) and Enrollment System (ESR) projects. It also contains data migrated from the Master Patient Index (MPI) and Health Eligibility Center (HEC) legacy files. ADR provides identity management and demographics support for all IT systems within the Department of Veterans Affairs.

1.2 Release Identification

This VDD identifies and describes ADR Release 3.8.10.0 and all components that were added, modified, or deleted for this release.

1.2.1 Dependencies

The software dependencies for this ADR release are listed below:

Software System	Version
Standard Data Service (SDS)	N/A
ADR	Rel 3.7.x

For environment-related dependencies, see Section 3.5.

1.2.2 Security Statement

No information that could enable or aid unauthorized access to ADR (i.e., system passwords, active controls, embedded queries) is contained in the files of this release.

1.3 Acronyms

Acronyms defined in this document can be found in the *Repositories Acronym List*. A Portable Document Format (PDF) version of the *Repositories Acronym List* is stored in the ADR Phase II Project Notebook on Technical Services Project Repository (TSPR) and will be updated or revised whenever the master list is updated or revised.

If you do not have VA network or TSPR access, contact the author of the document or your Repositories point of contact to request access to the Acronyms and References libraries.

2 Reference Documents

Table 2.0-1 lists documents that describe the requirements and design of this ADR release.

Table 2.0-1. Reference Document(s)

Document Name	Revision	Release Date
None		

3 Version Description

This section describes the components of this ADR release.

3.1 Inventory of Materials Released

For a detailed list of materials included in this release, see Appendix A.

3.2 Inventory of Configuration Item (CI) Contents

Not applicable.

3.3 Change Requests Included

The following ADR Code CRs (CCRs) have been incorporated into this release:

Change Request	Description
CCR 2158	Update APP_PARAMETER record for VOA Lev 1

3.4 Summary of Changes

This ADR release includes the following fixes and enhancements:

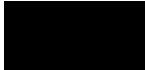

- Update APP_PARAMETER record for VOA Lev 1

3.5 Environment Information

The specified CodeCRs were unit tested and are to be deployed in the following ADR environments.

CCR 2158 Update APP PARAM rec for VOA Lev 1			
DEPLOYMENT TARGETS			
ENVIRONMENT	DEPLOY	AUTHORITY	NOTES

	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order

YES – ES Application Downtime

YES – Dependency on CCR2026 (3.6.9.0)

This change is needed for the ES 4.2 VOA project.

This database change can be done before the ES 4.2 application has been deployed.

This change has no impact to the current ES version.

This change has no impact to earlier ES versions (ES 4.0 / ES 4.1)

4 Testing and Deployment

This section records details about the testing and deployment of this ADR release.

4.1 Test Summary

The results of ADR SQA and third-party testing are summarized below.

ADR CodeCR #	CCR Description	Test Results	SQA Testing Notes
CCR 2158	Update APP_PARAMETER record for VOA Lev 1	Pass	10/22/14 - Walter and Andrew tested on [REDACTED] & 02 and passed - Pass Pending.

4.2 ADRMGT Schema Check

Verify that a new record for this release has been created in the ADRMGT Schema:

Column Name	Notes	Observed Values	State
Database Name(s):	Verify Value = {DB Instances) <may be Multiple>	[REDACTED] & [REDACTED]	Pass
Release Number:	Verify Value = {this Release Number}	3.8.10.0	Pass
CCR Number(s):	Verify Value = {Clear Quest Number) <may be Multiple>	2158	Pass

Last Dep Update Date:	Verify Value = (recent date or NULL)	22-OCT-2014 15:00:47 22-OCT-2014 15:01:00	Pass

4.3 Deployment Approval

IMPORTANT! Approval from SQA Management must be received via email before this release can be promoted to the target development environment(s) for the next level of testing.

SQA Management Approval	 RE ADRCQ 2158 - Release 3 8 10 0 VDD	Date: 10/23/2014
-------------------------	--	---------------------

4.3.1 Developer Access Note

The User ID/Password is the same as provided in previous releases.

5 Installation Instructions

The installation of this ADR release occurs through a series of SQL scripts. An installation script called **run_wrapper.sql** executes each SQL script and is run from an SQL prompt.

To obtain the installation scripts for this ADR release, please contact the [ADR Development Manager](#).

If you have any questions about ADR installation, please contact the [ADR Database Administration Team](#).

5.1 Installation and Prerequisites

For installation instructions and information about prerequisites, refer to the installation instruction files contained in the release package.

5.2 Additional Release Notes

None.

5.3 Rollback Plan

For rollback instructions and information about rollback prerequisites, refer to this release's deployment instructions email to the AITC DBAs or contact the ADR CM. Rollback scripts will be provided to the AITC DBAs upon request.

1 Scope

This section outlines the scope of the software release described in this Version Description Document (VDD).

1.1 System Overview

Administrative Data Repository (ADR) is a transactional database that constitutes the data service layer of the n-tier HealthVet architecture. ADR stores person identity, person demographics, and eligibility and enrollment data for the HeV Person Services (PS) and Enrollment System (ESR) projects. It also contains data migrated from the Master Patient Index (MPI) and Health Eligibility Center (HEC) legacy files. ADR provides identity management and demographics support for all IT systems within the Department of Veterans Affairs.

1.2 Release Identification

This VDD identifies and describes ADR Release 3.8.11.0 and all components that were added, modified, or deleted for this release.

1.2.1 Dependencies

The software dependencies for this ADR release are listed below:

Software System	Version
Standard Data Service (SDS)	N/A
ADR	Rel 3.7.x

For environment-related dependencies, see Section 3.5.

1.2.2 Security Statement

No information that could enable or aid unauthorized access to ADR (i.e., system passwords, active controls, embedded queries) is contained in the files of this release.

1.3 Acronyms

Acronyms defined in this document can be found in the *Repositories Acronym List*. A Portable Document Format (PDF) version of the *Repositories Acronym List* is stored in the ADR Phase II Project Notebook on Technical Services Project Repository (TSPR) and will be updated or revised whenever the master list is updated or revised.

If you do not have VA network or TSPR access, contact the author of the document or your Repositories point of contact to request access to the Acronyms and References libraries.

2 Reference Documents

Table 2.0-1 lists documents that describe the requirements and design of this ADR release.

Table 2.0-1. Reference Document(s)

Document Name	Revision	Release Date
None		

3 Version Description

This section describes the components of this ADR release.

3.1 Inventory of Materials Released

For a detailed list of materials included in this release, see Appendix A.

3.2 Inventory of Configuration Item (CI) Contents

Not applicable.

3.3 Change Requests Included

The following ADR Code CRs (CCRs) have been incorporated into this release:

Change Request	Description
CCR 2160	Insert row into the VBR.VETERAN_IDENTIFIER_TYPE table

3.4 Summary of Changes

This ADR release includes the following fixes and enhancements:

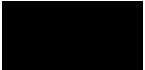

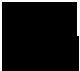

- Insert one row into the VBR.VETERAN_IDENTIFIER_TYPE table. This change is needed to support the Portal Strategy for AccessVA as required in ES 4.2 requirements.

3.5 Environment Information

The specified CodeCRs were unit tested and are to be deployed in the following ADR environments.

CCR 2160			
Insert row VBR.VETERAN IDENTIFIER TYPE table			
DEPLOYMENT TARGETS			
ENVIRONMENT	DEPLOY	AUTHORITY	NOTES

	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order

NO Downtime

NO Dependency

This change is needed for the ES 4.2 VOA project.

This database change can be done before the ES 4.2 application has been deployed.

This change has no impact to the current ES version.

This change has no impact to earlier ES versions (ES 4.0 / ES 4.1)

4 Testing and Deployment

This section records details about the testing and deployment of this ADR release.

4.1 Test Summary

The results of ADR SQA and third-party testing are summarized below.

ADR CodeCR #	CCR Description	Test Results	SQA Testing Notes
CCR 2160	Insert row into the VBR.VETERAN_IDE NTIFIER_TYPE table	Pass	10/30/14 - Walter and Andrew tested on [REDACTED] & 02 and passed - Pass Pending.

4.2 ADRMGT Schema Check

Verify that a new record for this release has been created in the ADRMGT Schema:

Column Name	Notes	Observed Values	State
Database Name(s):	Verify Value = {DB Instances) <may be Multiple>	[REDACTED] & [REDACTED]	Pass
Release Number:	Verify Value = {this Release Number}	3.8.11.0	Pass
CCR Number(s):	Verify Value = {Clear Quest Number) <may be Multiple>	2160	Pass
Orig Deployment Date:	Verify Value = (date deployed or NULL)	30-OCT-2014 16:05:49 30-OCT-2014 16:06:02	Pass
Last Dep Update Date:	Verify Value = (recent date or NULL)	30-OCT-2014 16:05:49 30-OCT-2014 16:06:02	Pass

4.3 Deployment Approval

IMPORTANT! Approval from SQA Management must be received via email before this release can be promoted to the target development environment(s) for the next level of testing.

SQA Management Approval	 RE ADRCQ 2160 - Release 3 8 11 0 VDD	Date: 10/31/2014
-------------------------	--	---------------------

4.3.1 Developer Access Note

The User ID/Password is the same as provided in previous releases.

5 Installation Instructions

The installation of this ADR release occurs through a series of SQL scripts. An installation script called **run_wrapper.sql** executes each SQL script and is run from an SQL prompt.

To obtain the installation scripts for this ADR release, please contact the [ADR Development Manager](#).

If you have any questions about ADR installation, please contact the [ADR Database Administration Team](#).

5.1 Installation and Prerequisites

For installation instructions and information about prerequisites, refer to the installation instruction files contained in the release package.

5.2 Additional Release Notes

None.

5.3 Rollback Plan

For rollback instructions and information about rollback prerequisites, refer to this release's deployment instructions email to the AITC DBAs or contact the ADR CM. Rollback scripts will be provided to the AITC DBAs upon request.

1 Scope

This section outlines the scope of the software release described in this Version Description Document (VDD).

1.1 System Overview

Administrative Data Repository (ADR) is a transactional database that constitutes the data service layer of the n-tier HealthVet architecture. ADR stores person identity, person demographics, and eligibility and enrollment data for the HeV Person Services (PS) and Enrollment System (ESR) projects. It also contains data migrated from the Master Patient Index (MPI) and Health Eligibility Center (HEC) legacy files. ADR provides identity management and demographics support for all IT systems within the Department of Veterans Affairs.

1.2 Release Identification

This VDD identifies and describes ADR Release 3.8.12.0 and all components that were added, modified, or deleted for this release.

1.2.1 Dependencies

The software dependencies for this ADR release are listed below:

Software System	Version
Standard Data Service (SDS)	N/A
ADR	3.7.x.x

For environment-related dependencies, see Section 3.5.

1.2.2 Security Statement

No information that could enable or aid unauthorized access to ADR (i.e., system passwords, active controls, embedded queries) is contained in the files of this release.

1.3 Acronyms

Acronyms defined in this document can be found in the *Repositories Acronym List*. A Portable Document Format (PDF) version of the *Repositories Acronym List* is stored in the ADR Phase II Project Notebook on Technical Services Project Repository (TSPR) and will be updated or revised whenever the master list is updated or revised.

If you do not have VA network or TSPR access, contact the author of the document or your Repositories point of contact to request access to the Acronyms and References libraries.

2 Reference Documents

Table 2.0-1 lists documents that describe the requirements and design of this ADR release.

Table 2.0-1. Reference Document(s)

Document Name	Revision	Release Date
None		

3 Version Description

This section describes the components of this ADR release.

3.1 Inventory of Materials Released

For a detailed list of materials included in this release, see Appendix A.

3.2 Inventory of Configuration Item (CI) Contents

Not applicable.

3.3 Change Requests Included

The following ADR Code CRs (CCRs) have been incorporated into this release:

Change Request	Description
CCR 2162	Create Schema and Roles for ILOG/ODM

3.4 Summary of Changes

This ADR release includes the following fixes and enhancements:

- Create schema and roles for ILOG/ODM. This is for upgrading the business rules engine from IBM Jrule7.1 to IBM ODM 8.6. IBM recommends that ODM be installed in its own schema.

3.5 Environment Information

The specified CodeCRs were unit tested and are to be deployed in the following ADR environments.

CCR 2162 Create Schema and Roles for ILOG/ODM			
DEPLOYMENT TARGETS			
ENVIRONMENT	DEPLOY	AUTHORITY	NOTES

Enhancement Path

	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order

NO Downtime

NO Dependency

This change is needed for the ES 4.2 ILOG and ODM project.

This database change can be done before the ES 4.2 application has been deployed.

This change has no impact to the current ES version.

This change has no impact to earlier ES versions (ES 4.0 / ES 4.1)

4 Testing and Deployment

This section records details about the testing and deployment of this ADR release.

4.1 Test Summary

The results of ADR SQA and third-party testing are summarized below.

ADR CodeCR #	CCR Description	Test Results	SQA Testing Notes
CCR 2162	Create Schema and Roles for ILOG/ODM	Pass	11/07/14 - Walter tested on [REDACTED] & 02 and passed.

4.2 ADRMGT Schema Check

Verify that a new record for this release has been created in the ADRMGT Schema:

Column Name	Notes	Observed Values	State
Database Name(s):	Verify Value = {DB Instances) <may be Multiple>	[REDACTED]	Pass
Release Number:	Verify Value = {this Release Number}	3.8.12.0	Pass

4.3 Deployment Approval

IMPORTANT! Approval from SQA Management must be received via email before this release can be promoted to the target development environment(s) for the next level of testing.

SQA Management Approval	 RE ADRCQ 2162 - Release 3 8 12 0 VDD	Date: 11/07/2014
-------------------------	--	---------------------

4.3.1 Developer Access Note

The User ID/Password is the same as provided in previous releases.

5 Installation Instructions

The installation of this ADR release occurs through a series of SQL scripts. An installation script called **run_wrapper.sql** executes each SQL script and is run from an SQL prompt.

To obtain the installation scripts for this ADR release, please contact the [ADR Development Manager](#).

If you have any questions about ADR installation, please contact the [ADR Database Administration Team](#).

5.1 Installation and Prerequisites

For installation instructions and information about prerequisites, refer to the installation instruction files contained in the release package.

5.2 Additional Release Notes

None.

5.3 Rollback Plan

For rollback instructions and information about rollback prerequisites, refer to this release's deployment instructions email to the AITC DBAs or contact the ADR CM. Rollback scripts will be provided to the AITC DBAs upon request.

1 Scope

This section outlines the scope of the software release described in this Version Description Document (VDD).

1.1 System Overview

Administrative Data Repository (ADR) is a transactional database that constitutes the data service layer of the n-tier HealthVet architecture. ADR stores person identity, person demographics, and eligibility and enrollment data for the HeV Person Services (PS) and Enrollment System (ESR) projects. It also contains data migrated from the Master Patient Index (MPI) and Health Eligibility Center (HEC) legacy files. ADR provides identity management and demographics support for all IT systems within the Department of Veterans Affairs.

1.2 Release Identification

This VDD identifies and describes ADR Release 3.8.13.0 and all components that were added, modified, or deleted for this release.

1.2.1 Dependencies

The software dependencies for this ADR release are listed below:

Software System	Version
Standard Data Service (SDS)	N/A
ADR	Release 3.7.x.x

For environment-related dependencies, see Section 3.5.

1.2.2 Security Statement

No information that could enable or aid unauthorized access to ADR (i.e., system passwords, active controls, embedded queries) is contained in the files of this release.

1.3 Acronyms

Acronyms defined in this document can be found in the *Repositories Acronym List*. A Portable Document Format (PDF) version of the *Repositories Acronym List* is stored in the ADR Phase II Project Notebook on Technical Services Project Repository (TSPR) and will be updated or revised whenever the master list is updated or revised.

If you do not have VA network or TSPR access, contact the author of the document or your Repositories point of contact to request access to the Acronyms and References libraries.

2 Reference Documents

Table 2.0-1 lists documents that describe the requirements and design of this ADR release.

Table 2.0-1. Reference Document(s)

Document Name	Revision	Release Date
None		

3 Version Description

This section describes the components of this ADR release.

3.1 Inventory of Materials Released

For a detailed list of materials included in this release, see Appendix A.

3.2 Inventory of Configuration Item (CI) Contents

Not applicable.

3.3 Change Requests Included

The following ADR Code CRs (CCRs) have been incorporated into this release:

Change Request	Description
CCR 2127	Drop and Add HEALTH_BENEFIT_PLAN tables

3.4 Summary of Changes

This ADR release includes the following fixes and enhancements:

- CCR 2127 Drop and Add HEALTH_BENEFIT_PLAN tables

3.5 Environment Information

The specified CodeCRs were unit tested and are to be deployed in the following ADR environments.

CCR 2127			
Drop and Add HLTH_BEN_PLAN tables			
DEPLOYMENT TARGETS			
ENVIRONMENT	DEPLOY	AUTHORITY	NOTES

Enhancement Path

[REDACTED]	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
[REDACTED]	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
[REDACTED]	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
[REDACTED]	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order

NO Downtime

YES - Dependency 3.6.15.0 (CCR2038) must be deployed first

This change is needed for the ES 4.2 Enrollment release.
This database change can be done before the ES 4.2 application has been deployed.

This change has no impact to the current ES version.
This change has no impact to earlier ES versions (ES 4.0 / ES 4.1)
This change has no impact on ES 4.3 and the DB changes can be applied to [REDACTED] and [REDACTED] and [REDACTED]

4 Testing and Deployment

This section records details about the testing and deployment of this ADR release.

4.1 Test Summary

The results of ADR SQA and third-party testing are summarized below.

ADR CodeCR #	CCR Description	Test Results	SQA Testing Notes
CCR 2127	Drop and Add HEALTH_BENEFIT_PLAN tables	PASS	11/18/14 - Walter tested on [REDACTED] & 02, Andrew tested on [REDACTED] and passed. There was one defect due to a requirements change.

4.2 ADRMGT Schema Check

Verify that a new record for this release has been created in the ADRMGT Schema:

Column Name	Notes	Observed Values	State
Database Name(s):	Verify Value = {DB Instances} <may be Multiple>	[REDACTED] & [REDACTED]	PASS
Release Number:	Verify Value = {this Release Number}	3.8.13.0	PASS
CCR Number(s):	Verify Value = {Clear Quest Number} <may be Multiple>	2127	PASS
Orig Deployment Date:	Verify Value = (date deployed or NULL)	19-NOV-2014 09:36:22 19-NOV-2014 09:37:15	PASS
Last Dep Update Date:	Verify Value = (recent date or NULL)	19-NOV-2014 09:36:22 19-NOV-2014 09:37:15	PASS

4.3 Deployment Approval

IMPORTANT! Approval from SQA Management must be received via email before this release can be promoted to the target development environment(s) for the next level of testing.

SQA Management Approval	 RE ADRCQ 2127 - Release 3 8 13 0 VDD	Date: 11/20/2014
-------------------------	--	---------------------

4.3.1 Developer Access Note

The User ID/Password is the same as provided in previous releases.

5 Installation Instructions

The installation of this ADR release occurs through a series of SQL scripts. An installation script called **run_wrapper.sql** executes each SQL script and is run from an SQL prompt.

To obtain the installation scripts for this ADR release, please contact the [ADR Development Manager](#).

If you have any questions about ADR installation, please contact the [ADR Database Administration Team](#).

5.1 Installation and Prerequisites

For installation instructions and information about prerequisites, refer to the installation instruction files contained in the release package.

5.2 Additional Release Notes

None.

5.3 Rollback Plan

For rollback instructions and information about rollback prerequisites, refer to this release's deployment instructions email to the AITC DBAs or contact the ADR CM. Rollback scripts will be provided to the AITC DBAs upon request.

ROLLBACK OPTIONS

1 Scope

This section outlines the scope of the software release described in this Version Description Document (VDD).

1.1 System Overview

Administrative Data Repository (ADR) is a transactional database that constitutes the data service layer of the n-tier HealthVet architecture. ADR stores person identity, person demographics, and eligibility and enrollment data for the HeV Person Services (PS) and Enrollment System (ESR) projects. It also contains data migrated from the Master Patient Index (MPI) and Health Eligibility Center (HEC) legacy files. ADR provides identity management and demographics support for all IT systems within the Department of Veterans Affairs.

1.2 Release Identification

This VDD identifies and describes ADR Release 3.8.14.0 and all components that were added, modified, or deleted for this release.

1.2.1 Dependencies

The software dependencies for this ADR release are listed below:

Software System	Version
Standard Data Service (SDS)	N/A
ADR	Release 3.7.x.x

For environment-related dependencies, see Section 3.5.

1.2.2 Security Statement

No information that could enable or aid unauthorized access to ADR (i.e., system passwords, active controls, embedded queries) is contained in the files of this release.

1.3 Acronyms

Acronyms defined in this document can be found in the *Repositories Acronym List*. A Portable Document Format (PDF) version of the *Repositories Acronym List* is stored in the ADR Phase II Project Notebook on Technical Services Project Repository (TSPR) and will be updated or revised whenever the master list is updated or revised.

If you do not have VA network or TSPR access, contact the author of the document or your Repositories point of contact to request access to the Acronyms and References libraries.

2 Reference Documents

Table 2.0-1 lists documents that describe the requirements and design of this ADR release.

Table 2.0-1. Reference Document(s)

Document Name	Revision	Release Date
None		

3 Version Description

This section describes the components of this ADR release.

3.1 Inventory of Materials Released

For a detailed list of materials included in this release, see Appendix A.

3.2 Inventory of Configuration Item (CI) Contents

Not applicable.

3.3 Change Requests Included

The following ADR Code CRs (CCRs) have been incorporated into this release:

Change Request	Description
CCR 2154	Add PRSN_PREF_LANG data to OPP Extract SP

3.4 Summary of Changes

This ADR release includes the following fixes and enhancements:

- Change the OPP stored procedure to extract the Preferred Person Language Code from tables ADR.PERSON_PREFERRED_LANGUAGE and ADRREF.Std_Laungagecode joined by the columns Std_Languagecode_id = Id respectively.

3.5 Environment Information

The specified CodeCRs were unit tested and are to be deployed in the following ADR environments.

CCR 2154			
Add PRSN_PREF_LANG data to OPP Extract SP			
DEPLOYMENT TARGETS			
ENVIRONMENT	DEPLOY	AUTHORITY	NOTES

	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order

NO Downtime

No Dependency

This change is needed for the ES 4.2 Enrollment release.
This database change can be done before the ES 4.2 application has been deployed.

This change has no impact to the current ES version.
This change has no impact to earlier ES versions (ES 4.0 / ES 4.1)

4 Testing and Deployment

This section records details about the testing and deployment of this ADR release.

4.1 Test Summary

The results of ADR SQA and third-party testing are summarized below.

ADR CodeCR #	CCR Description	Test Results	SQA Testing Notes
CCR 2154	Add PRSN_PREF_LANG data to OPP Extract SP	PASS	11/4/2014=- Third Party test, Coded by [REDACTED] by [REDACTED], Pass 0 Defects.

4.2 ADRMGT Schema Check

Verify that a new record for this release has been created in the ADRMGT Schema:

Column Name	Notes	Observed Values	State
Database Name(s):	Verify Value = {DB Instances} <may be Multiple>	[REDACTED]	PASS
Release Number:	Verify Value = {this Release Number}	3.8.14.0	PASS
CCR Number(s):	Verify Value = {Clear Quest Number} <may be Multiple>	2154	PASS
Orig Deployment Date:	Verify Value = (date deployed or NULL)	05-NOV-2014 10:37:02 05-NOV-2014 10:37:23	PASS
Last Dep Update Date:	Verify Value = (recent date or NULL)	05-NOV-2014 10:37:02 05-NOV-2014 10:37:23	PASS

4.3 Deployment Approval

IMPORTANT! Approval from SQA Management must be received via email before this release can be promoted to the target development environment(s) for the next level of testing.

SQA Management Approval	 RE--ADRC.MSG	Date: 11/5/2014
		

4.3.1 Developer Access Note

The User ID/Password is the same as provided in previous releases.

5 Installation Instructions

The installation of this ADR release occurs through a series of SQL scripts. An installation script called **run_wrapper.sql** executes each SQL script and is run from an SQL prompt.

To obtain the installation scripts for this ADR release, please contact the [ADR Development Manager](#).

If you have any questions about ADR installation, please contact the [ADR Database Administration Team](#).

5.1 Installation and Prerequisites

For installation instructions and information about prerequisites, refer to the installation instruction files contained in the release package.

5.2 Additional Release Notes

None.

5.3 Rollback Plan

For rollback instructions and information about rollback prerequisites, refer to this release's deployment instructions email to the AITC DBAs or contact the ADR CM. Rollback scripts will be provided to the AITC DBAs upon request.

1 Scope

This section outlines the scope of the software release described in this Version Description Document (VDD).

1.1 System Overview

Administrative Data Repository (ADR) is a transactional database that constitutes the data service layer of the n-tier HealthVet architecture. ADR stores person identity, person demographics, and eligibility and enrollment data for the HeV Person Services (PS) and Enrollment System (ESR) projects. It also contains data migrated from the Master Patient Index (MPI) and Health Eligibility Center (HEC) legacy files. ADR provides identity management and demographics support for all IT systems within the Department of Veterans Affairs.

1.2 Release Identification

This VDD identifies and describes ADR Release 3.8.15.0 and all components that were added, modified, or deleted for this release.

1.2.1 Dependencies

The software dependencies for this ADR release are listed below:

Software System	Version
Standard Data Service (SDS)	N/A
ADR	Release 3.7.x.x

For environment-related dependencies, see Section 3.5.

1.2.2 Security Statement

No information that could enable or aid unauthorized access to ADR (i.e., system passwords, active controls, embedded queries) is contained in the files of this release.

1.3 Acronyms

Acronyms defined in this document can be found in the *Repositories Acronym List*. A Portable Document Format (PDF) version of the *Repositories Acronym List* is stored in the ADR Phase II Project Notebook on Technical Services Project Repository (TSPR) and will be updated or revised whenever the master list is updated or revised.

If you do not have VA network or TSPR access, contact the author of the document or your Repositories point of contact to request access to the Acronyms and References libraries.

2 Reference Documents

Table 2.0-1 lists documents that describe the requirements and design of this ADR release.

Table 2.0-1. Reference Document(s)

Document Name	Revision	Release Date
None		

3 Version Description

This section describes the components of this ADR release.

3.1 Inventory of Materials Released

For a detailed list of materials included in this release, see Appendix A.

3.2 Inventory of Configuration Item (CI) Contents

Not applicable.

3.3 Change Requests Included

The following ADR Code CRs (CCRs) have been incorporated into this release:

Change Request	Description
CCR 2168	Create 6 new tables and 2 views for Camp Lejeune Project

3.4 Summary of Changes

This ADR release includes the following fixes and enhancements:

- Create 8 new tables and 3 views for Camp Lejeune Project
 - Tables
 - ADR.Camp_Lejeune_Verification
 - ADR.Camp_Lejeune_Verification H
 - ADRREF.Std_Clverificationtype
 - ADRREF.Std_Clverificationtypehistory
 - ADRREF.Std_Clchangesitelist
 - ADRREF.Std_Clchangesitelisthistory
 - ADRREF.Std_Clsourceofchange
 - ADRREF.Std_Clsourceofchangehistory

- Views
 - EEUSR.Cl_Verification_Type
 - EEUSR.Cl_Change_Site_List
 - EEUSR.Cl_Source_Of_Change
- Load reference data into the following tables:
 - ADRREF.Tablemanger
 - ADRREF.Std_Clverificationtype
 - ADRREF.Std_Clverificationtypehistory
 - ADRREF.Std_Clchangesitelist
 - ADRREF.Std_Clchangesitelisthistory
 - ADRREF.Std_Clsourceofchange
 - ADRREF.Std_Clsourceofchangehistory

3.5 Environment Information

The specified CodeCRs were unit tested and are to be deployed in the following ADR environments.

CCR 2168			
Create tables and views for Camp LeJeune			
DEPLOYMENT TARGETS			
ENVIRONMENT	DEPLOY	AUTHORITY	NOTES

Enhancement Path

	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order

	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order
	YES	ADR	Standard deployment order

NO Downtime

NO Dependency

This database change can be done before the ES 4.2 application has been deployed.

This change has no impact to the current ES version.

This change has no impact to earlier ES versions (ES 4.0 / ES 4.1)

4 Testing and Deployment

This section records details about the testing and deployment of this ADR release.

4.1 Test Summary

The results of ADR SQA and third-party testing are summarized below.

ADR CodeCR #	CCR Description	Test Results	SQA Testing Notes
CCR 2168	Create 6 new tables and 2 views for Camp Lejeune Project	PASS	11/21/14 - Walter tested on [REDACTED] & 02 and passed.

4.2 ADRMGT Schema Check

Verify that a new record for this release has been created in the ADRMGT Schema:

Column Name	Notes	Observed Values	State
Database Name(s):	Verify Value = {DB Instances} <may be Multiple>	[REDACTED] & [REDACTED]	PASS
Release Number:	Verify Value = {this Release Number}	3.8.15.0	PASS
CCR Number(s):	Verify Value = {Clear Quest Number} <may be Multiple>	2168	PASS
Orig Deployment Date:	Verify Value = (date deployed or NULL)	21-NOV-2014 10:37:37 21-NOV-2014 10:37:51	PASS
Last Dep Update Date:	Verify Value = (recent date or NULL)	21-NOV-2014 10:37:37 21-NOV-2014 10:37:51	PASS

4.3 Deployment Approval

IMPORTANT! Approval from SQA Management must be received via email before this release can be promoted to the target development environment(s) for the next level of testing.

SQA Management Approval	 RE ADRCQ 2168 - Release 3 8 15 0 VDD	Date: 11/21/2014
-------------------------	--	---------------------

4.3.1 Developer Access Note

The User ID/Password is the same as provided in previous releases.

5 Installation Instructions

The installation of this ADR release occurs through a series of SQL scripts. An installation script called **run_wrapper.sql** executes each SQL script and is run from an SQL prompt.

To obtain the installation scripts for this ADR release, please contact the [ADR Development Manager](#).

If you have any questions about ADR installation, please contact the [ADR Database Administration Team](#).

5.1 Installation and Prerequisites

For installation instructions and information about prerequisites, refer to the installation instruction files contained in the release package.

5.2 Additional Release Notes

None.

5.3 Rollback Plan

For rollback instructions and information about rollback prerequisites, refer to this release's deployment instructions email to the AITC DBAs or contact the ADR CM. Rollback scripts will be provided to the AITC DBAs upon request.

ROLLBACK OPTIONS	
CCR Number	2168
Rollback Plan (None, Scripts, Mirrored)	Scripts
Rollback Package Repository	 Development Management\CCR2168\rollback\ccr_2168_v1_rollback
Rollback Package Filename	ccr_2168_v1_rollback.zip (Refer to Appendix A for package contents)

Appendix A: Inventory of Release Contents

This appendix lists all of the contents associated with this release.

Table A-1: Contents of adr_38150_release_v1.zip file.

PATH/FILENAME	VERSION	COMMENT
ADR v 3.8.15.0 VDD	1.2	Release Version Description Document
release_38150_v1_instructions	1.0	Release deployment instructions
release_38150_v1_adrmgt_dbver	1.0	ADRMGM DBVER rows insert script
ccr_2168_v3	3.0	Delivery package for CCR 2168

Table A-2: Contents of ccr_2168_v3.zip file.

PATH/FILENAME	VERSION	COMMENT
ccr_2168_v3_instructions.txt	3.0	Installation instructions
ccr_2168_v3_adrref_ddl.sql	3.0	Create ADRREF objects
ccr_2168_v2_adr_ddl.sql	2.0	Create ADR objects
ccr_2168_v1_eeusr.sql	1.0	Create EEUSR views
ccr_2168_v1_aacdba.sql	1.0	Create public synonyms
utl_upd_adrmgt_app_param_v1.sql	1.0	Update ADRMGT.ADR_PARAMETER with new next value
adrmgt_dbver_insert_v1.sql	1.0	Add a DBVER row to table ADRMGT.Ccr
adrmgt_dbver_ccr_2168_v3.cfg	3.0	DBVER configuration file

Table A-3: Contents of ccr_2168_v1_rollback.zip file.

PATH/FILENAME	VERSION	COMMENT
ccr_2168_v1_rollback_instructions.txt	1.0	Rollback instructions
ccr_2168_v1_adr_ddl_rollback.sql	1.0	Drop ADR objects
ccr_2168_v1_adrref_ddl_rollback.sql	1.0	Drop ADRREF objects
ccr_2168_v1_eeusr_rollback.sql	1.0	Drop EEUSR views
ccr_2168_v1_aacdba_rollback.sql	1.0	Drop public synonyms
utl_adrmgt_rollback_v1.sql	1.0	Remove DBVER information
