

Untitled

CPRS (Computerized Patient Record System) provides an integrated patient record system for clinicians, managers, QA (Quality Assurance) staff, and researchers. The primary goal of CPRS is to provide a fast and easy-to-use application that provides providers information needed in the clinical workflow process. CPRS 31 will implement Tracking Abnormal Test Results (ATR) , Teratogenic Drugs (Tdrugs) , Primary Care Management Module rehost/reengineering (PCMMR) along with Patient Safety /Remedy tickets and Vista patches Independent of GUI schedule.
