

Census Activity Report – National, all Modalities, single Vendor

ID: Cnsus Actvy Rpt Natl_All_Sngl		
Description	Provide the Census Activity report output by National Totals, all Modalities and a single Vendor.	
Revision History		
3/25/14	Initial story	
4/28/14	Internal team review	
5/5/14	Approved by customer C.B., turned tracking on	

Statement:

As an IHTA user, I want to see the Census Activity report output broken out for National Totals, all Modalities and a single Vendor.

Conversation:

1. User: IHTA User without the role of Vendor
2. The user selects HT Reports > Census Reports > Census Activity Reports
3. The user has selected the following report criteria:
 - i. National Totals
 - ii. Week Ending (most recent selectable Saturday date)
 - iii. All Modalities
 - iv. A single Vendor (excluding 'All Vendors')
 - v. 'Show Vendor Subtotals' (uneditable once a single Vendor is selected)
4. User selects to run the report
5. Report output displays
 - i. Page title "Home Telehealth Reports"
 - ii. Report title "Telehealth Activity National Report for *Vendor* - Week ending *MM DD, YYYY*" (*Vendor* and *MM DD, YYYY* are values selected by user)
 - iii. The report output is displayed in a table with the following columns;
 - a) Modality – all Modalities represented in a unique row (see below)
 - b) National Totals for *Vendor* – National total number of patients for *Vendor* selected by user
 - iv. The report output is displayed in a table with the following rows;
 - a) Total Patients – this is the total number of patients enrolled in HT overall
 - b) Messaging Total – this is the total number of patients responding using 'messaging' devices (Device, IVR, Browser and modality not yet assigned)
 - c) Messaging by Device – the total number of patients responding using Devices
 - d) Messaging by IVR – the total number of patients responding via IVR
 - e) Messaging by Browser – the total number of patients responding via Browser
 - f) Messaging (IVR, device or browser not yet assigned) - the total number of patients responding via 'messaging'
 - g) Peripheral Measurements – the total number of patients responding using peripheral measurements
 - h) Video - the total number of patients responding via Video
 - i) Cellular Modem Transmission – the total number of patients responding via Cellular Modem transmissions
 - j) Satellite Transmission - the total number of patients responding via Satellite transmissions
 - k) Digital Image Capture - the total number of patients responding via digital image captures

- v. Text provided – ‘Note: All Home Telehealth census data is available in the database through the week ending Saturday, *MM DD, YYYY*’ (*MM DD, YYYY* is the most recent past Saturday date)
- vi. The user can select
 - i. Back – the user returns to the report’s criteria selection page
 - ii. HT Reports – the user selects another report to run
 - iii. Log Out – the user logs out of the application

Confirmation:

Success:

- 1. All counts reflected in report are accurate compared to database numbers

Failure:

- 1. All counts reflected in report are not accurate compared to database numbers

Error Messages:

None
