

## Census Activity Reports – National, all Modalities, all Vendors

ID: Cnsus Actvy Rpts Natl_All_All		
Description	Provide the Census Activity report output by National Totals, all Modalities and all Vendors.	
Revision History		
3/25/14	Initial story	
4/28/14	Internal team review	
5/5/14	Approved by customer C.B.,turned tracking on	

### Statement:

As an IHTA user, I want to see the Census Activity report output broken out for National Totals, all Modalities and all Vendors.

### Conversation:

1. User: IHTA User without the role of Vendor
2. The user selects HT Reports > Census Reports > Census Activity Reports
3. The user has selected the following report criteria:
  - i. National Totals
  - ii. Week Ending (most recent selectable Saturday date)
  - iii. All Modalities
  - iv. All Vendors
  - v. 'Show Vendor Subtotals' un-checked
4. User selects to run the report
5. Report output displays
  - i. Page title "Home Telehealth Reports"
  - ii. Report title "Telehealth Activity National Report - Week ending MM DD, YYYY" (MM DD, YYYY is value selected by user)
  - iii. The report output is displayed in a table with the following columns;
    - a) Modality – all Modalities represented in a unique row (see below)
    - b) If 'Show Vendor Subtotals' checked, then a column for EACH Vendor
    - c) If 'Show Vendor Subtotals' NOT checked, then no column for specific Vendors
    - d) National Totals – displays the total count of patients enrolled for that modality
  - iv. The report output is displayed in a table with the following rows;
    - a) Total Patients – this is the total number of patients enrolled in HT overall and the breakout for total number of patients enrolled by Vendor
    - b) Messaging Total – this is the total number of patients responding using 'messaging' devices (Device, IVR, Browser and modality not yet assigned)
    - c) Messaging by Device – the total number of patients responding using Devices
    - d) Messaging by IVR – the total number of patients responding via IVR
    - e) Messaging by Browser – the total number of patients responding via Browser
    - f) Messaging (IVR, device or browser not yet assigned) - the total number of patients responding via 'messaging'
    - g) Peripheral Measurements – the total number of patients responding using peripheral measurements
    - h) Video - the total number of patients responding via Video
    - i) Cellular Modem Transmission – the total number of patients responding via Cellular Modem transmissions

- j) Satellite Transmission - the total number of patients responding via Satellite transmissions
- k) Digital Image Capture - the total number of patients responding via digital image captures
- v. Text provided – ‘Note: All Home Telehealth census data is available in the database through the week ending Saturday, *MM DD, YYYY*’ (*MM DD, YYYY* is the most recent past Saturday date)
- vi. The user can select
  - i. Back – the user returns to the report's criteria selection page
  - ii. HT Reports – the user selects another report to run
  - iii. Log Out – the user logs out of the application

#### Confirmation:

##### Success:

1. All counts reflected in report are accurate compared to database numbers

##### Failure:

1. All counts reflected in report are not accurate compared to database numbers

##### Error Messages:

None

Wireframe of report output for National, all Modalities, all Vendors, ‘Show Vendor Subtotals’ checked
