

Census Activity Report – National, single Modality, single Vendor

ID: Cnsus Actvy Rpt Natl_Sngl_Sngl		
Description	Provide the Census Activity report output by National Totals, a single Modality and a single Vendor.	
Revision History		
3/25/14	Initial story	
4/28/14	Internal team review	
5/5/14	Approved by customer C.B., turned tracking on	

Statement:

As an IHTA user, I want to see the Census Activity report output broken out for National Totals, a single Modality and a single Vendor.

Conversation:

1. User: IHTA User without the role of Vendor
2. The user selects HT Reports > Census Reports > Census Activity Reports
3. The user has selected the following report criteria:
 - i. National Totals
 - ii. Week Ending (most recent selectable Saturday date)
 - iii. A single Modality (*excluding 'Category of Care Report' and 'Response Rate Report' see applicable user stories*)
 - iv. A single Vendor (excluding 'All Vendors')
 - v. 'Show Vendor Subtotals' (uneditable once a single Vendor is selected)
4. The user selects to run the report
5. Report output displays
 - i. Page title "Home Telehealth Reports"
 - ii. Report title "Telehealth Activity National Report - Week ending MM DD, YYYY" (MM DD, YYYY is value selected by user)
 - iii. The report output is displayed in a table with the following columns;
 - a) Modality – Modality represented in a unique row (see below)
 - b) National Totals for *Vendor* – National total number of patients for each Modality (*Vendor* is the selection made by the user)
 - iv. The report output is displayed in a table with the following rows;
 - a) Total Patients – this is the total number of patients enrolled in HT overall for this Vendor
 - b) *Modality selected by user* – this is the total number of patients using the Modality selected by the user for chosen Vendor
 - v. Text provided – 'Note: All Home Telehealth census data is available in the database through the week ending Saturday, MM DD, YYYY' (MM DD, YYYY is the most recent past Saturday date)
 - vi. The user can select
 - i. Back – the user returns to the report's criteria selection page
 - ii. HT Reports – the user selects another report to run
 - iii. Log Out – the user logs out of the application

Confirmation:

Success:

1. All counts reflected in report are accurate compared to database numbers

Failure:

1. All counts reflected in report are not accurate compared to database numbers

Error Messages:

None
