Appendix D: SVN Change Log (SMS).....	86
Appendix E: RTC Source Control Change Log (PHR Manager)	109

1. Scope

This Version Description Document (VDD) describes the My Health~~e~~Vet (MHV) Release Version 12.9, and is intended for all MHV stakeholders.

My Health~~e~~Vet (MHV) serves as the Department of Veterans Affairs (VA) Personal Health Record (PHR). It is designed for Veterans, active duty Service members, their dependents and caregivers. MHV helps the users to partner with their health care team. It provides the opportunities and tools to make informed decisions. New Models of Care (NMOC)'s MHV, a secure ~~e~~Health portal, www.myhealth.va.gov function as the central efforts to provide Veterans and their families with a complete, personalized online health record as well as the tools to better self-manage their health. Veterans are able to self-register to create an account on the portal and maintain a free Web-based PHR accessible at all times from any computer with Internet access across multiple platforms and available for download.

A Veteran registered on MHV can access VA Wellness Reminders, view VA appointments, participate in Secure Messaging (SMS) with a health care team, manage prescription refills, and participate in future MHV features. This Web-based tool combines essential PHR information enhanced by online health resources to facilitate and encourage patient/ clinician collaboration.

As new features are added to MHV to enrich the Veteran user experience and provide access to a broader base of information it becomes necessary to ensure the integrity of MHV by complementing existing Veterans Health Administration (VHA) clinical business practices, as well as to transform the way health care is delivered and managed. The MHV management team set the goal to expand its user base and scale to meet growing demand as well as collaborate with other Government agencies and private entities, which will interface or integrate with the MHV portal.

1.1. Identification

This VDD contains version identification and an overview of new and modified functions.

1.1.1. System Overview

My Health~~e~~Vet (MHV) is a complex, high visibility program in the Initiative 7: New Models of Care Initiative in the VA Office of Information Technology (OI&T). The program provides a web-based application for Veterans, their families, and care providers to access health resources in an online environment. It improves Veteran health care by providing easy access to health information, online resources, and facilitates patient/health care provider interactions. MHV gives the Veteran access to VA benefits, special programs, and health information and services. It also provides the Veteran web-based tools to increase their knowledge about health conditions, manage their health records, and communicate with health care providers. Veterans now have the ability to take a more proactive approach to managing their health and utilizing VA health services and benefits.

1.2. Document Overview

This VDD is the documentation provided by Configuration Management (CM) to certify the integrity of the deliverable that's being handed off from the Core Development and Sustainment development teams to describe all of the approved Change Requests (CR) and/or Rational Team Concert work items for all deliverables: source code, data, and electronic documentation.

2. Version Description

The VDD is the primary configuration control document used to track and control versions of software to be released to the production environment. It is also a summary of the features for the software build which identifies and describes the version of the software being delivered, including all changes to the software since the last VDD was issued.

2.1. Enhancement and Defect Tracking Management

2.1.1. Rational Team Concert Usage

Starting with the release of MHV 12.5, the MHV Core Development began to migrate from using Rational ClearQuest (CQ) to Rational Team Concert (RTC). Therefore, all VDD's now contain the Epics, Stories, and Defects that were created from the User stories and requirements acquired from the collaboration of the business team working with the MHV Core Development Team Analysts and Development teams. These efforts to which are identified in this document are certified as completed and implemented to comprise the MHV 12.9 release.

To access RTC, please view the following link providing that you have valid credentials to login and the appropriate access controls enabled to view the MHV (CM) team concert repository:

If you do not have access, contact the Rational Tools Team (RTT) to request training and access to this repository. The RTT team will also facilitate any communication and requests for access to the appropriate POC for the MHV (CM) repository.

Specific work items and change requests in relationship to the MHV 12.9 Release are listed below in Section 3.

2.1.2. ClearQuest Usage

In addition to including the new tracking method of utilizing Rational Team Concert, the Sustainment team is still utilizing the CQ defect tracking tool. Therefore, this VDD will also contain the Change Record (CR) identifiers for defects and enhancements that were completed and applied to comprise the MHV 12.9 release (where applicable). Section 4 lists all record types that were delivered from the Core Development and Sustainment teams.

All CRs are tracked with CQ and reside in the MHV schema. To access CQ and the MHV schema, please view following link providing that you have valid credentials to login and the appropriate access controls enabled to view the MHV schema CQ records:

If you do not have access, contact the RTT to request training and access to this repository. The RTT team will also facilitate any communication and requests for access to the appropriate POC for the MHV (CM) repository.

2.2. Source Code Management

2.2.1. Rational Team Concert Source Control

Beginning with this release the PHR Redesign team with support of the Core Development CM resources activated and initiated use of the Rational Team Concert Source Control feature. This

activity (which will continue to evolve) will allow the MHV Development teams to begin to migrate toward 100% usage of the VA supported Rational Jazz platform and eliminate the usage of the non-TRM compliant use of Subversion. A current migration plan is underway and more details/updates to this section will be produced for the MHV 12.10 release. For the purpose and time of issuance of this VDD, Appendix D will provide a change log of all of the changes that were made for PHR Redesign release.

2.2.2. Subversion Configuration Change Management (MHV & SMS)

Appendix B provides an SVN change log that demonstrates all files that were changed in support of the MHV application. Appendix C provides a similar change log that specifically demonstrates all files that were changed as part of the Secure Messaging application. The MHV and SMS source code is contained in separate repositories within SVN. SVN branch and tagging information is also in their respective sections aforementioned as well as the official Project CM signatory area of this document.

In order to access the SVN repository it is required that the user/viewer download the latest version of the Tortoise SVN client from <http://tortoisesvn.net/downloads.html> to a VA GFE laptop. Depending on what type of operating system (OS) you are running will determine whether you will need to utilize the 32-bit or 64-bit version of the application. The OS version can be found by clicking **Start** -> Right-Click on **Computer** and viewing System Version from the dialog box.

Once the Tortoise SVN is installed Click Start -> Left-Click on Computer -> Right-Click on C:\ -> Highlight Tortoise SVN – Click Repo-Browser Paste in the following link:

[REDACTED]

To view the release documentation repository paste in the following link:

s [REDACTED]
and click **OK**.

The /main branch (for both repositories) contains all software configuration items (maven, source, and database) artifacts that comprise the MHV and SMS software baselines from inception up to and including the MHV 12.9 release. The mhv_docs branch contains all documentation for all releases performed by BYLIGHT. For this release, the MRP development team worked in the /main branch along with the Core Development team. The Sustainment team performed all work in the /mhv_12.8.x branch and at the end of their code complete activities, their code from Sprint 29 (12.8.2) was merged into the /main branch. Sustainment performed all Sprint 30 (12.9) development within the /main branch post the merge. CM and the Development teams merged all revisions into the /main branch and subsequently SQA performed regression and system testing to ensure no code breakage or issues occurred.

2.3. Software Build Management (Hudson)

2.3.1. Software/CM Process Management

When developers have completed their tasks for a story or corrected a defect, they proceed to check their files into SVN. Once complete, all developers who have had changes notify CM of their completion. CM then logs into the SVN repository and ensures that all files are sound and have had proper comments attached to them to ensure that there is traceability between the work item and files.

CM performs the build and generates a build change report from Hudson and uses that in part of the notification to stakeholders that the environments will be taken down intermittently to have those changes applied. These notifications are generated and disseminated at least ½ hour to 45 minutes in advance to applying any changes to any environment. Notifications include information for all stakeholders that lists the work items that can be tested in the build. Each build is a cumulative build and can be used as an official release package if required.

Whether building MHV or SMS, the build generates a TAR archive that includes a build ID identifier. CM stages the TAR file into the staging directory and then proceeds to follow the procedures as outlined in the Build and Install Procedures guide (located at [REDACTED])

[REDACTED] The date and time of the build is pulled from the build machine. Currently, MHV does not employ a continuous build process and builds upon request in the event of a problem that requires intervention or if new changes are ready to be tested by Development or SQA.

Once the build/install is complete for each software delivery, a notification is sent to the stakeholders for awareness that the changes can now be tested. Builds can be pushed to multiple environments without having to handle multiple versions. At times, all environments (INT-A, INT-B and SysTest) have been updated based upon specific development and testing needs. For the final builds, CM places a tag within SVN to tag the official SQA'd baseline to comply with CM standards.

Once the installation is completed, CM updates the appropriate documentation (VDD, Deploy, and Backout Guides) to ensure that procedures are correctly updated to reflect any new or modified changes to the procedures. The deployment and backout guides have been authored for multiple major and minor releases in conjunction with input from the CDCO/AITC Release Managers and system administrators to ensure compliance is sustained through each release. The Core and Sustainment teams generate/update master templates to shorten the amount of time it takes to generate the documentation required to support the installation to the Pre-Production and Production systems. For the official release, Requests for Change (RFCs) are generated to communicate the groups of changes (weblogic, database, MDWS, etc.) to ensure that the proper resources are allocated to support the installation.

2.3.2. Hudson Build Management

For the development activities of the MHV 12.9 release process (MHV and SMS) the Hudson build application was utilized. In order to access and view what builds were performed point your web browser to the following location: [REDACTED]

To view the MHV and SMS releases click on either the "MHV_12.9" hyperlink or the "SMS_12.9" hyperlink to view all build history. Each hyperlink will show a complete history of all builds that were performed for each project along with all updates that were captured for each build. Hudson is pre-configured to correctly execute the build scripts that are stored within each SVN project to create the release packages (MHV and SMS have separate tar files). When each build is complete, it is automatically secure copied and stored on the application server staging area (There are four servers that this could potentially occur on depending on whether you are building MHV or SM (MHV: vamhvappdev14 (INT-B) and/or vamhvappdev13 (SysTest); SM vamhvappdev17 (INT-B) and/or vamhvappdev10 (SysTest)). Each Hudson project is independently configured by CM/Development to control which servers receive the latest build files. In order to view the build output (TAR files) you would have to have a VA9957 executed in order to request UNIX/LINUX access to the aforementioned servers.

Build artifacts (EAR, WAR, and JARs) are byproducts of the build and for this release are listed in Section 4.1.

3. Work Item/Change Record Reports

Table 1 provides a summary for each Work Item created and worked throughout the MHV_12.9 Release for the MHV Core Development Team. The table provides information on the Work Item Type, ID, Summary, Planned For (Sprint#), and the RFC Allocation (if applicable). If a work item is associated to a RFC, it is a part of a physical deliverable for this release (WEBLOGIC, DATABASE, PHR)

Table 1: Core Development Defects, Epics, Stories and Tasks for MHV Release 12.9

Note: All defects addressed during the release are also recorded in the MHV_12.9_Test_Evaluation_Report

Work Item Type	Id	Summary	Planned For	RFC Allocation
Defect	37666	Defect: Link to launch HRA application does not work in Chrome or Safari browsers	12.9	WEBLOGIC
Epic	100824	Epic: 5.3.1.3 VHL – CPRS PORTAL INTEGRATION – PHASE 1	12.9	N/A
Epic	39336	Epic: MRP BB GUI (and Refresh Allergy data)	12.9	WEBLOGIC
Epic	100793	Epic: 5.4.1.2 WORKLOAD CREDIT ENHANCEMENTS – PHASE 2 (12.9/12.10)	12.9	N/A
Epic	32722	Epic: 5.3.1.7 SM EMAIL ATTACHMENT ENHANCEMENT Implement Secure messaging _ File attachments for Patient _ Phase 2	12.9	WEBLOGIC
Epic	45510	EPIC: eRAR Content Updates	12.9	WEBLOGIC
Epic	39330	Epic: Remote ID Proofing - Online Authentication	12.9	WEBLOGIC
Epic	39333	Epic: SM^2 Phase 2 (CCD Direct) Content Updates	12.9	WEBLOGIC
Epic	31432	Epic: 5.3.1.7 SM EMAIL ATTACHMENT ENHANCEMENT Implement Secure messaging _ File attachments for Provider _ Phase 2	12.9	WEBLOGIC
Epic	100812	Epic: 5.3.1.17 CMOP RX REFILL TRACKING PROTOTYPE	12.9	N/A
Epic	39353	Epic: MRP Addition of My Medications BB TXT & PDF	12.9	WEBLOGIC
Epic	32727	Epic: SM Patient Attachments Phase 1 Field Testing	12.9	WEBLOGIC

Epic	100814	Epic: 5.3.2.17 CMOP RX REFILL CORPORATE DATA WAREHOUSE INTERFACE WITH MHV	12.9	N/A
Epic	39332	Epic: MHV Security Level Changes for Allergies and Adverse Reactions	12.9	WEBLOGIC
Epic	31427	Epic: 5.3.1.16 CMOP RX REFILL TRACKING ANALYSIS AND DESIGN	12.9	N/A
Epic	39334	Epic: HRA Content Updates and FAQ Page	12.9	WEBLOGIC
Epic	31428	Epic: 5.3.1.8 BB IMAGING – BASIC IMAGES AND DIRECT ANALYSIS	12.9	N/A
Story	36648	US: Create the SM API Provider User Stories	12.9	N/A
Story	33943	US: SM Provider BUC to Technical User Story Transformation	12.9	N/A
Task	29331	Task: SM WLC Vista Patch 11 Documentation -prepare for IOC reviews and process	12.9	N/A
Task	29328	Task: SM WLC Vista Patch 11 Implementation -Second developer review	12.9	N/A
Task	29329	Task: SM WLC Vista Patch 11 Implementation - SQA Testing IA updates	12.9	N/A
Task	23816	Task: SM Workload Credit Interface - Integration Agreements Vista Patch 11 Review	12.9	N/A
Defect	44784	Defect: SM attachments Windows 8 - IE browser issue	12.9_Sprint1	WEBLOGIC
Defect	44913	SM Reassign Triage Group list - There is no bold print and (A) is next to a team the patient is NOT associated with(BO – AUDIOLOGY SERVICE@ (A)), there are no (A)s indicated with associated groups	12.9_Sprint1	WEBLOGIC
Defect	37639	Defect: SM User guide is not working in prod HELP file	12.9_Sprint1	WEBLOGIC
Defect	44599	Task: Update SQA documentation for Parent User Story as listed in Description Field of this task	12.9_Sprint1	N/A
Defect	37623	Defect: Clinician new message - drop down arrow does not work in IE browser	12.9_Sprint1	WEBLOGIC
Defect	39310	Defect: (Prod only) Facility administrators are not receiving email when messages are re-assigned outside the facility	12.9_Sprint1	N/A
Defect	44950	Defect: Provider API to Retrieve Message History Appears to be Broken	12.9_Sprint1	WEBLOGIC
Defect	45134	Defect: Provider API Move Message Not Working Properly	12.9_Sprint1	WEBLOGIC
Defect	39156	Defect: Create database scripts to grant CDW/VSSC role access to 12.8 new tables	12.9_Sprint1	N/A

Defect	44899	Defect: Charts not showing up in all SEI pages in production and test environments	12.9_Sprint1	WEBLOGIC
Defect	37614	Defect: FAQ page not working in pre-prod and prod	12.9_Sprint1	WEBLOGIC
Story	45573	Story: Design and Implementation of docx and xlsx (SM attachments Phase 2)	12.9_Sprint1	WEBLOGIC
Story	44712	Story: My Medications BB TXT and PDF output modifications	12.9_Sprint1	WEBLOGIC, DATABASE
Story	39348	Story: RA Create Technical user story for SM2 CCD Direct Content Updates	12.9_Sprint1	N/A
Story	34336	Story - My Medications TXT and PDF BlueButton	12.9_Sprint1	WEBLOGIC, DATABASE
Story	39187	Story: Remote ID Proofing - Implementation	12.9_Sprint1	WEBLOGIC
Story	39351	Story: RA create Technical user story for MHV Security Level Changes for Allergies and Adverse Reactions	12.9_Sprint1	N/A
Story	39181	Story: VA Allergies and Adverse Reactions Detail Path - Implementation	12.9_Sprint1	WEBLOGIC
Story	39342	Story: RA Create Technical Use Story for Remote ID Proofing	12.9_Sprint1	WEBLOGIC
Story	39343	Story: CCD Direct dynamic AAL Entry	12.9_Sprint1	WEBLOGIC
Story	39346	Story: MRP BB GUI changes	12.9_Sprint1	WEBLOGIC
Story	39354	Story: RA Create Technical user story for MRP Addition of My Medications BB TXT & PDF	12.9_Sprint1	N/A
Story	44965	Story: eRAR integration testing with VAPii for impending release	12.9_Sprint1	N/A
Story	39344	Story: RA Create Technical User Story for MRP BB GUI Updates	12.9_Sprint1	N/A
Story	39179	Story: Health History Path Implementation	12.9_Sprint1	WEBLOGIC
Story	39347	Story: RA Create Technical User Story for HRA Content updates and FAQ page	12.9_Sprint1	N/A
Task	39381	Task: Support Tech refresh PHR changes design/analysis	12.9_Sprint1	N/A
Task	44288	Task: Update the ACP (MHV_12.9_ACP_MVI) to include all information from the User Stories for this Epic Story	12.9_Sprint1	N/A
Task	39306	Task: Prepare Test Scripts on 12.9 SM Distribution Group User Stories	12.9_Sprint1	N/A

Task	44486	Task: Update SQA documentation for the Parent User Story as detailed in the Description Field of this task	12.9_Sprint1	N/A
Task	45586	Task: Development of SM Attachment Phase II - DOCX and XLSX file formats.	12.9_Sprint1	N/A
Task	45622	Task: RA Create Technical User Story for eRAR Content Updates	12.9_Sprint1	N/A
Task	39380	Task: TIA documentation updates for Master Cloud team	12.9_Sprint1	N/A
Task	39311	Task: Review, update and finalize 12.9 test scripts and add to RTM Testing section	12.9_Sprint1	N/A
Task	44992	Task: Update SQA documentation set as listed in the Description field below for the linked Epic Story as needed	12.9_Sprint1	N/A
Task	44761	Task: Update SDD for US 39187 for this Parent Epic Story	12.9_Sprint1	N/A
Task	44763	Task: Update SDD with User Story 44712 Information	12.9_Sprint1	N/A
Task	45559	Import Test Cases\Test Scripts for My Medications BB PDF and TXT	12.9_Sprint1	N/A
Task	33873	Task: HL7 interface routines for getDiagnosisCodes API	12.9_Sprint1	N/A
Task	44250	Gather UI PHR Integration Requirements	12.9_Sprint1	N/A
Task	44301	Task: Update RSD (MHV_12 9_RSD_PHR) with information for this Epic Story and linked User Stories	12.9_Sprint1	N/A
Task	44531	Task: Update SQA documentation with Information from the Linked Parent Story as listed in the Description Field of this task	12.9_Sprint1	N/A
Task	39371	Task: RA develop US for distribution group	12.9_Sprint1	N/A
Task	44970	eRAR - Integration Testing of eRAR functionality with VAPIi	12.9_Sprint1	N/A
Task	39340	Blue Button - Create test case for MHV BB GUI Modifications	12.9_Sprint1	N/A
Task	36318	Task: Create test data in SysTest environment for Prescription Tracking	12.9_Sprint1	N/A
Task	39313	Task: Provide Patch 11 support	12.9_Sprint1	N/A
Task	29316	Task: Make necessary modifications FORUM to get IAs approved	12.9_Sprint1	N/A
Task	44526	Task: Update RTM with requirements and testing information from Parent Story	12.9_Sprint1	N/A
Task	44251	Create Technical User Story for the UI - PHR Integration Points	12.9_Sprint1	N/A
Task	44261	Mark for SM Provider API's as Dev Complete	12.9_Sprint1	N/A
Task	44605	Task: Update All SQA documentation for Parent User Story as listed in the Description Field of this task	12.9_Sprint1	N/A

Task	44759	Task: Update SDD for User Story 39181	12.9_Sprint1	N/A
Task	44764	Task: Update SDD for this Epic Story and User Story (39346) as needed	12.9_Sprint1	N/A
Task	33875	Task: HL7 interface routines for MHV ECS Filer	12.9_Sprint1	N/A
Task	39182	Task: VA Allergies and Adverse Reactions Detail Path - Analysis	12.9_Sprint1	N/A
Task	40707	Task: Manual Test Cases/Scripts in Quality Manager for API_SMPR035 Retrieve a Triage Group	12.9_Sprint1	N/A
Task	45608	Task: Perform Testing of .Docx & .Xlsx file attachments as part of SM Phase 2 attachments.	12.9_Sprint1	N/A
Task	36315	Task: Update Test Cases for Provider US 001 through 033 to Include Correct API Calls, messages and other missing data	12.9_Sprint1	N/A
Task	44259	Review comments about BUC with Business & Final Version	12.9_Sprint1	N/A
Task	44507	Task: Update SQA documentation with information from the Parent User Story as listed in the Description Field of this Task.	12.9_Sprint1	N/A
Task	44482	Task: Update RTM with the Requirements from the Parent User Story and Testing Information for the Parent User Story	12.9_Sprint1	N/A
Task	29321	Task: Updated Patch11 documentation	12.9_Sprint1	N/A
Task	44494	Task: Update RSD with Requirements for the Parent User Story	12.9_Sprint1	N/A
Task	44305	Task: Update SQA documentation for this Epic Story and linked User Stories per the Description Field	12.9_Sprint1	N/A
Task	44594	Task: Update SQA documentation for the Parent User Story as listed in the Description Field.	12.9_Sprint1	N/A
Task	44263	Transition and Tag Appropriate 12.9 Stories	12.9_Sprint1	N/A
Task	36302	Task: SM Provider Phase-II attachments requirements review and analysis	12.9_Sprint1	N/A
Task	34655	Make the communication work between MHV and VAPii servers by resolving the certificate issue	12.9_Sprint1	N/A
Task	44300	Task: Update the SQA documentation set for this Epic Story and linked User Stories as described in the Description Field below	12.9_Sprint1	N/A
Task	44481	Task: Start RSD for 12.9 and Update RSD for the Parent User Story	12.9_Sprint1	N/A
Task	34337	Task - My Medications TXT and PDF Blue Button output	12.9_Sprint1	

Task	45575	Import Test Cases\Test Scripts for Blue Button Graphical User Interface Modifications	12.9_Sprint1	N/A
Task	44255	Review Comments about BUC with Business & Final Version	12.9_Sprint1	N/A
Task	39177	Task: SM Phase 2 attachments technical analysis and design	12.9_Sprint1	N/A
Task	44484	Task: Update ACP with information from the Parent User Story	12.9_Sprint1	N/A
Task	34199	ICD: Complete the document and move it through the review cycle for submission.	12.9_Sprint1	N/A
Task	44510	Task: Update RSD with information from the Parent Story	12.9_Sprint1	N/A
Task	33871	Task: HL7 interface routines for getPatientClassifications API	12.9_Sprint1	N/A
Task	35015	Task: Make entries in the 12.9 RTM for Innovations Team Provider User Stories API_SMPR001 thru API_SMPR033 and their assoc P/F Results	12.9_Sprint1	N/A
Task	39180	Task: Health History Path - Finalize Analysis	12.9_Sprint1	N/A
Task	45243	TASK: Draft User Story Using Existing Documentation	12.9_Sprint1	N/A
Task	39301	Task: Review and provide feedback on 12.9 SM Distribution Group User Stories	12.9_Sprint1	N/A
Task	44762	Task: Update ICD for User Story 39187	12.9_Sprint1	N/A
Task	39367	Task: Ra develop technical stories for SM attachments Phase 2	12.9_Sprint1	N/A
Task	36314	Task: Execute the Automated Test Scripts in SOAPUI for MHV APIs 12.9 Sprint 1 Testing of Happy Path US 001 through 035 (INTB and/or SysTest)	12.9_Sprint1	N/A
Task	44527	Task: Update ACP with Information from Parent Story	12.9_Sprint1	N/A
Task	40706	Task: Manual Test Cases/Scripts in Quality Manager for user story API_SMPR034 Retrieve Triage Team Group Member	12.9_Sprint1	N/A
Task	39307	Task: Prepare Test Scripts on 12.9 SM Attachment - Patient Phase 2 User Stories	12.9_Sprint1	N/A
Task	44258	Develop solution in the New PHR Code	12.9_Sprint1	N/A
Task	44290	Task: Update SQA documentation as listed in the Description Field for all User Stories for this Epic Story.	12.9_Sprint1	N/A
Task	44262	Update DFC with New CPRS Eligible Messages	12.9_Sprint1	N/A
Task	44260	Review MHV C&P Notes BUC	12.9_Sprint1	N/A

Task	44252	Review API Interface for the new PHR Service	12.9_Sprint1	N/A
Task	44700	Task: Blue Button Graphical User Interface Modifications	12.9_Sprint1	
Task	40705	Task: Update the 12.9 MTP to include additional user stories when they have been made available (Provider API US 034 and 035)	12.9_Sprint1	N/A
Task	44506	Task: Update ACP with Information from the Parent User Story	12.9_Sprint1	N/A
Task	36301	Task: SM Patient Phase-II attachments requirements review and analysis	12.9_Sprint1	N/A

Task	100731	Task: UAT Support for SM 12.9 Release	12.9_Sprint4	N/A

Table 2 provides a summary for each Work Item delivered from the Sustainment Development Team:

Table 2: Sustainment Team Work Items for MHV Release 12.9

Work Item Type:	Id	Summary	RFC Allocation
N/A	N/A	PHR TRUNC Database Package (Routine maintenance and cleanup of PHR Staging tables	DATABASE
Defect	JAZZ0034396	QW - Allow user to be taken to SM patient inbox as soon as the click the top level book/page instead of a button in MHV-SM Landing page	WEBLOGIC
Defect	JAZZ0035886	508 - Premium_ Ensure all form fields in the attached spread sheet have implicit or explicit labels (12)	WEBLOGIC
Defect	JAZZ0049778	508-SSN and Date of Birth.Label associated with multiple form fields.	WEBLOGIC
Defect	JAZZ0049893	MRP-508-Images must have alt attribute set1(45)	WEBLOGIC
Defect	JAZZ0049894	MRP-508-Images must have alt attribute set2(45)	WEBLOGIC
Defect	JAZZ50454	Add 938 Yellowstone Nat'l Cemetery Non-Treatment facility to MHV tables	DATABASE

4. Release Inventory

Table 4 lists the release inventory delivered as part of the MHV 12.9 Release to CDCO. A full listing of the supporting documentation is included in Section 5.

Table 3: Inventory of Release Components

Release Component	Description	Method of Delivery	Recipient	Location
Content	Configuration artifacts	Electronic	CDCO	
Database scripts	Configuration artifacts	Electronic	CDCO	
Documentation	Required CDCO documentation	Electronic	CDCO	
Property Files	Configuration artifacts	Electronic	CDCO	
Weblogic - MHV Source Code	Build artifact	Electronic	CDCO	
Weblogic - SMS Source Code	Build artifact	Electronic	CDCO	
Weblogic – PHR Manager Source Code	Build artifact	Electronic	CDCO	

4.1. Electronic Media Released

Table 5 lists the deliverables that are contained with the MHV and SMS Source Code TAR files and PHR Manager EAR files (mentioned in Section 4) as part of the MHV 12.9 Release to CDCO. A full listing of the supporting documentation is included in Section 5.

Note: It is noted in the “Deployed” column as to whether the EAR, WAR or JAR is deployed during the release.

Table 4: Inventory of MHV, SMS, PHR Manager Deployables

Name	Build/Version	Deployed?

6. Certification

The Release/Configuration Manager for this release certifies that the contents of the packaged release defined and associated with this document consists of artifacts archived in the CM Environment for the MHV Core Development Release 12.9 baselined on 06/05/2014 with the baseline ID of:

SVN Tag Verification for MHV ----- ->

[REDACTED]

SVN Tag Verification for SMS ----- ->

[REDACTED]

RTC Baseline for PHR Mgr. ----- -

[REDACTED]

RTC Baseline for MHV Api ----- -

[REDACTED]

Subversion Documentation baseline for 12.9 (CDCO, IOC, and PMAS) ----- ->

[REDACTED]

MHV PHR Manager Redesign Project Documentation baseline for 12.9

[REDACTED]

SharePoint Documentation baseline for 12.9 (CoreDev) ----- ->

[REDACTED]

SharePoint Documentation baseline for 12.9 (Redesign) ----- -

[REDACTED]

Delivery of all artifacts (**CDCO, PMAS, and IOC**) occurred on 06/05/2014 for deployment/implementation into the Pre-Production environment with a scheduled date of 06/13/2014 and Production on a scheduled date of 06/21/2014 as recorded in CM repository on 06/05/2014.

The status of all change requests and code change requests listed in this document in the Change Record Reports section have been verified and are consistent with what is reported here.

Release/Configuration Manager

Appendix A. MHV_12.9 Release Notes

A.1. Introduction

My Health^eVet a complex, high visibility program under the New Models of Care Initiative in the Department of Veterans Affairs (VA) Office of Information Technology (OIT) provides America's Veterans access to secure, current health and benefits information with the primary objective of improving their overall health. MHV, an eHealth portal (www.myhealth.va.gov), implements this goal. The program provides a web-based application for Veterans, their families, and healthcare providers to collaboratively optimize health care resources in a secure online environment, improving Veteran health care by enabling easy access to health information, online resources, and facilitates patient/health care provider interactions. MHV also gives the Veteran access to VA benefits, special programs, and health information and services. Providing the Veteran web-based tools to increase their knowledge about health conditions, manage their health records, and communicate with health care providers. MHV provides Veterans the ability to take a more proactive approach to managing their health and utilizing VA health services and benefits.

The MHV portal provides a secure environment where Veterans can self-register to create an account and maintain a free web-based Personal Health Record (PHR) accessible at all times from any computer with Internet access. The VA stores important medical information which Veterans need to better manage their health. Unfortunately, some types of records and data remain unavailable to VA patients. My Health^eVet Online Viewing PHR (MHVON) consolidates VA patients' medical information currently stored across multiple isolated categories and combines them for accessible online viewing.

The purpose of Secure Messaging (SM) is to improve the clinician-patient relationship by providing an electronic communications service in addition to the telephone. For a patient, it will provide a new means of communication where certain types of inquiries, questions, comments, concerns etc. can be managed without visiting in person or calling the clinicians office. For a Clinician and Clinicians office, SM will offer a better system to communicate and share appropriate information with their patient. With the ability to triage and set priorities, a clinician's office can better collect and communicate information as appropriate. Overall, for all the stakeholders, SM will contribute to increase quality of communications with reduced time and minimized errors.

A.2. Purpose

These release notes cover the new features provided to MHV and SM users in this release.

A.3. Audience

This document targets users and administrators of the My Health^eVet product and applies primarily to the changes made for the MHV 12.9 release and previous release packages of the software.

A.4. This Release

The following sections provide, in brief, demonstrate the new features and functions of the MHV 12.9 Release.

A.5. Features and Functionality

The following table lists the high-level new features added in the MHV 12.9 Release.

Table 7: New 12.9 MHV Features

Features
<i>Core Dev Team</i>
Infrastructure and Interface Enhancements (I&I) -
eRAR View and Upgrade Content Changes
Remote ID Proofing
MHV – HRA Integration
MHV BB CCD Direct
My Medication Blue Button (BB) PDF and TXT Output updates, BlueButton UI Modifications, Security Level Changes for MHV Allergies
Veterans Facing Enhancements (VFE) -
Distribution Group enhancements as part of Provider to Provider functionality
Message Attachments – Phase 2
Change request for updating Technical support page
Innovations -
PHR Update Portal Integration
Wipe and Replace Exam Notes
SM Provider API Updates
<i>Sustainment Team:</i>
QW - Allow user to be taken to SM patient inbox as soon as the click the top level book/page instead of a button in MHV-SM Landing page
508 - Premium_ Ensure all form fields in the attached spread sheet have implicit or explicit labels (12)
508-SSN and Date of Birth.Label associated with multiple form fields.
MRP-508-Images must have alt attribute set1(45)
MRP-508-Images must have alt attribute set2(45)

A.6. Upgrades

For more detailed information please refer to the MHV_12.9 Deployment Guide (MHV_12.9_DG). At a high-level listed here are the major functional areas of MHV & SM that will be upgraded by the MHV 12.9 Release:

- Content Changes (CMS and Static)
- Database Upgrades in support of code changes for MHV, SM, EVault Schemas and PHR Manager Schema
- Property File Configuration Changes (SM, PHR, and CCD Direct)
- Weblogic (MHV, Secure Messaging, and PHR Manager)

A.7. Known Issues

No known issues have been identified at this time.

A.8. Product Documentation

Refer to Section 6 for list of CDCO required documents.

All documentation is located in Subversion at the following repository location:

Appendix B. Acronyms and Abbreviations

Acronym	Definition
CCD	Continuity of Care Document
CDCO	Corporate Data Center Operations
CM	Configuration Management
CPRS	Computerized Patient Record System
CQ	ClearQuest
CR	Change Request(s)
ID	Identification
MHV	My HealtheVet
MRP	My Recovery Plan
NMOC	New Models of Care
OI&T	VA Office of Information Technology
PHR	Personal Health Record
RTC	Rational Team Concert
RTT	Rational Tools Team
SM	Secure Messaging
SMS	Secure Messaging System
SQA	System Quality Analyst
SVN	Subversion
VA	Veterans Administration

Acronym	Definition
VDD	Version Description Document
VHA	Veterans Health Administration
VistA	Veterans Health Information Systems and Technology Architecture

Appendix C. SVN Change Log (MHV)

Changes made to /main branch from 03/17/2014 to 06/05/2014 with the tag of:

“12.9_SQA_Verified_MHV”
