1.0 SCOPE

1.1 IDENTIFICATION

The purpose of this Version Description Document (VDD) is to identify and describe the PCMM PCMMR Version 1.x_xxx and all Configuration Items (CIs) and Computer Software Components (CSCs) that were added, modified, or deleted for this release.

1.2 SYSTEM OVERVIEW

The PCMMR Project is based on enhancement requests received from the Health Systems (formerly Enterprise Systems Management (ESM)) Office which represents the PCMM end users as well as design request obtained during meetings between Product Development and the PCMM Stakeholders. This project will involve a rehosting of the PCMM Graphical User Interface (GUI) client/server application implemented at each VistA site to a web based application hosted nationally. PCMM will continue to send Primary Care information for each patient recorded in the Veterans Health Information Systems and Technology Architecture (VistA). Application changes driven by requirements addressed within this RSD will be released in a new version of the PCMM application.

The PCMM Rehost and Reengineering Project defined in this document will provide the following benefits:

- Fully support a team based, patient-centric approach to healthcare delivery.
- Data can be used to analyze the system and PACT workload nationally, by Veterans Integrated Service Network (VISN), and by facility and its substations as well as at the Team level.
- PCMM GUI will be in compliance with Section 508.

1.3 SECURITY STATEMENT

No information that could enable or aid unauthorized access to the PCMMR (e.g., system passwords, active controls, imbedded queries) is contained in the files of this release.

2.0 VERSION DESCRIPTION

2.1 INTENDED PURPOSE and TARGET ENVIRONMENT

The intended purpose of this release is the customer evaluation of the evolving development of the PCMM Enterprise Prototype application. The evaluation is in support of the Agile methodologies utilized on the PCMM ReHost/ReEngineering project.

The target environment for this release is preproduction pilot environment located at:

2.2 INVENTORY OF MATERIALS RELEASED

The following SubVersion Components were utilized for this release. The detailed source code listings for these components are in SubVersion.

Component	SubVersion Revision	ClearCase Location	ClearCase Baseline
PCMMR	4211	Pvob PCMM, vob PCMM_Cand	PCMMR_Base_Period
SD53P603.KID	2880	Pvob PCMM, vob PCMM_Cand	PCMMR_Base_Period
Data Migration	16	Pvob PCMM, vob PCMM_Cand	PCMMR_Base_Period

2.3 Support Documents

The following support documents are associated with this release:

Document Name	Revision	Date
Init7_PCMMR_SDD.doc	1.4	1/8/13
Init7_PCMMR_UserGuide.docx	2.4	1/14/13
Init7_PCMMR_DeployPlan.doc	1.4	1/18/13
Init7_PCMMR_POM.docx	1.6	1/17/13
Init7_PCMMR_OMPlan.docx	1.1	10/25/12
Init7_PCMMR_RSD.doc	1.26	2/15/13
Init7_PCMMR_ReqTrack.xls	2887	2/15/13
PCMM_Data_Migration_UserGuide.docx	1.2	1/28/13
Init7_PCMMR_STP.doc	1.2	1/31/13

3.0 CHANGE REQUESTS INCLUDED

4.0 r4209
5.0 B-02232 : Issue 91 for 508 compliance. Adding hotkey functionality to menus (part 1 of the fix). B-02939 : Remove surrogacy section for now from the UI based on SME feedback.
6.0 -----
7.0 r4208
8.0 Initial checkin of stop code logic
9.0 -----
10.0 r4204

```

11.0 TK-??? - Removing all references to "PCMMR" and replacing with "PCMM"
12.0 -----
13.0 r4203
14.0 TK-05087 - Adjusted AI process to accommodate patient assignments after DoD reported
    date
15.0 -----
16.0 r4201
17.0 B-02220: Potential fix for Issue 39 for 508 compliance: Text based validation is not
    immediately accessible to the screen reader Adding the error text in the spans to
    tooltips on the matching field.
18.0 -----
19.0 r4200
20.0 B - 02736 Team Management Formatted and edited for consistency
21.0 -----
22.0 r4197
23.0 TK-04891 - Update PCMMR homepage with dynamic content
24.0 -----
25.0 r4196
26.0 TK-??? - Fixing glitch in patient profile when retrieving patient team assignment
    history popup
27.0 -----
28.0 r4195
29.0 TK-05045 - Fixing remaining validator to ignore "canceled" status
30.0 -----
31.0 r4194
32.0 TK-05045 - Fixing patient assignment overlap validator to ignore "canceled" status
33.0 -----
34.0 r4193
35.0 TK-05087 - Adjusted AI process to fix event codes
36.0 -----
37.0 r4192
38.0 TK-05087 - Adjusted AI process to fix event codes
39.0 -----
40.0 r4191
41.0 TK-05132 - Hiding DCP for canceled / inactive assignments on team and position
    profiles; code cleanup
42.0 -----
43.0 r4190
44.0 TK-05071 - Update StaffUpdate job to handle termination date / person class changes
45.0 -----
46.0 r4188
47.0 Fix for ALM Defect 3378 : An error popup has been reported prevented transfer of
    patients from one position on a non PC team to another position on the same team.
    This was a regression - the id of the position from which the transfer was in...
48.0 -----
49.0 r4186
50.0 Fix for outpatient file record creation to have IEN set to DFN value.
51.0 -----
52.0 r4185
53.0 TK-05087 - Adjusted AI process to attempt to remove lazy loading exception in SQA
    logs
54.0 -----
55.0 r4184
56.0 Changes to merge to correctly support reverse local merge.
57.0 -----
58.0 r4183
59.0 -----
60.0 -----
61.0 r4182
62.0 Files to support resolution of reverse local merge.
63.0 -----
64.0 r4181
65.0 Fixed compare.
66.0 -----
67.0 r4180
68.0 Fixed BigDecimal compare.
69.0 -----

```

```

70.0    r4179
71.0    Comparison for BigDecimal
72.0    -----
73.0    r4178
74.0
75.0    -----
76.0    r4177
77.0    Fixed FTEE equality check.
78.0    -----
79.0    r4176
80.0    Fixed FTEE equality check.
81.0    -----
82.0    r4175
83.0    Equals method for BigDecimal
84.0    -----
85.0    r4174
86.0    TK-05087 - Adjusted AI process to use new Patient events file for DOD / rescinded
      DOD
87.0    -----
88.0    r4173
89.0
90.0    -----
91.0    r4172
92.0    Fix for a defect (not yet in ALM) - Null pointer on team creation in SQA_X. Was due
      to not setting the team role on a position object before checking whether that
      position needs FTEE to be set to NULL (if FTEE is prohibited). Changed order ...

101.0   TK-??? - Upgrading to 2012 dialect
102.0   -----
103.0   r4166
104.0   Actually user right method to send back validation error.
105.0   -----
106.0   r4164
107.0   ???
108.0   -----
109.0   r4163
110.0   Changes to validation of FTEE value interval.
111.0   -----
112.0   r4162
113.0   Fixed typo.
114.0   -----
115.0   r4161
116.0   Initial check-in.
117.0   -----
118.0   r4155
119.0   Fixed bug with required indicator showing for optional flag.
120.0   -----
121.0   r4154
122.0   Fixed bug with required indicator showing for optional flag.
123.0   -----
124.0   r4151
125.0   TK-05113 - Adjustments to AI to try to prevent OptimisticLockingError on team
126.0   -----
127.0   r4150
128.0   TK-05045 - Attempt to fix bug in SQA logs where BinaryObject is trying to be un-
      deleted
129.0   -----
130.0   r4147
131.0   B-02850 Formatting
132.0   -----

```

133.0 r4146
 134.0 TK-05045 - Adjusting all patient and staff names to be last first; writing all null
 vals for 404.43 fields .13, .14, .15, .17
 135.0 -----
 136.0 r4145
 137.0 Fixed bug with institution assignment.
 138.0 -----
 139.0 r4144
 140.0 TK-05045 - Fixing VistaSync for 5D level CBOC stations with patient assignments and
 also AI processes
 141.0 -----
 142.0 r4143
 143.0 B-02901: Putting back a Validator removed for ease of unit testing.
 144.0 -----
 145.0 r4142
 146.0 B-02901: Code Changes to have Care types and actions on Teams with specific Care
 types be restricted based on Permissions.
 147.0 -----
 148.0 r4140
 149.0 Removed unused code.
 150.0 -----
 151.0 r4139
 152.0 TK-05113 - Adjustments to CPRS header sync to accommodate missing outpatient profile
 153.0 -----
 154.0 r4138
 155.0 TK-05113 - Adjustments to CPRS header sync to accommodate missing outpatient profile
 156.0 -----
 157.0 r4137
 158.0 TK-05113 - Adjustments to AI to move Vista validation request to end of transaction
 to avoid OptimisticLockingException
 159.0 -----
 160.0 r4136
 161.0 TK-05113 - Adjustments to AI to move Vista validation request to end of transaction
 to avoid OptimisticLockingException
 162.0 -----
 163.0 r4135
 164.0 TK-05113 - Adjustments to CPRS header sync to exclude pending assignments
 165.0 -----
 166.0 r4134
 167.0 TK-05113 - Adjustments to CPRS header sync to accommodate missing outpatient profile
 168.0 -----
 169.0 r4133
 170.0 Changes for outpatient profile record.
 171.0 -----
 172.0 r4132
 173.0 Change to create outpatient record if does not exist.
 174.0 -----
 175.0 r4130
 176.0 TK-05071 - Updating termination date format on staff assign/reassign screen
 177.0 -----
 178.0 r4129
 179.0 B-02850 Formatting changes, delete unneeded files
 180.0 -----
 181.0 r4127
 182.0 TK-05045 - Fixing CPRS header sync bug where we were considering the PCP to be AP
 183.0 -----
 184.0 r4124
 185.0 Changes for FTEE task.
 186.0 -----
 187.0 r4122
 188.0 TK-05071 - Customizing staff search per cust requirements; caching AJAX view for
 performance; upgrading to latest point release of Jackson
 189.0 -----
 190.0 r4121
 191.0 TK-05113 - Adjustments to AI / encounter search to accommodate non-PC teams
 192.0 -----
 193.0 r4120

```

251.0 B-02658 : Fixing a defect found during MVI integration testing for A24 Local merges
- this defect was due to non refresh of a modified patient.
252.0 -----
253.0 r4093
254.0 Changes for FTEE story.
255.0 -----
256.0 r4092
257.0 B-02850 - Formatted for consistency

```

```

258.0 -----
259.0 r4091
260.0 B-02850 - added
261.0 -----
262.0 r4089
263.0 FTEE story related changes.
264.0 -----
265.0 r4088
266.0 Formatted.
267.0 -----
268.0 r4085
269.0 Commenting out the sending of emails on error processing temporarily to avoid an
      overload of Exchange servers on continuous reprocessing of the messages.
270.0 -----
271.0 r4084
272.0 escaped <> in stack trace.
273.0 -----
274.0 r4083
275.0 TK-04977 - Accommodating future start dates for patient assignments in DCP
      calculations
276.0 -----
277.0 r4082
278.0 TK-04977 - Fixed missing parentheses in DAO query to retrieve historical patient
      assignments
279.0 -----
280.0 r4081
281.0 TK-05088 - Adding termination date to staff Adjusting team patient assign history to
      accommodate null start dates (we shouldn't have these but now it shouldn't crash
      when loading)
282.0 -----
283.0 r4080
284.0 Better fix for surviving ICN.
285.0 -----
286.0 r4079
287.0 Changed to use surviving ICN to set ICN in incoming A24.
288.0 -----
289.0 r4076
290.0 TK-05082 - Adjusting MHTC validator to use grouping vals in DB when checking for
      patient assignments to restricted roles
291.0 -----
292.0 r4075
293.0 B-02851 system generated file
294.0 -----
295.0 r4074
296.0 B--02850 Formatted/edited for consistency
297.0 -----
298.0 r4072
299.0 TK-04977 -Adjusted preceptor and team membership validation queries to accommodate
      entries where startDate = endDate
300.0 -----
301.0 r4071
302.0 TK-04977 - Made new validations-active flag case-insensitive; adjusted preceptor and
      team membership validation queries to accommodate entries where startDate = endDate
303.0 -----
304.0 r4067
305.0 -----
306.0 -----
307.0 r4066
308.0 -----
309.0 -----
310.0 r4065
311.0 TK-05082 - Showing correct direct care providers for all team types on position
      profile, team profile, patient profile
312.0 -----
313.0 r4064
314.0 B-02850 Added Background_Job_Log.htm and Canned_and_Ad_Hoc_Reporting.htm
315.0 -----

```

```

316.0 r4063
317.0 B-02850 Added Background_Job_Log.htm
318.0 -----
319.0 r4062
320.0 Fixed logic.
321.0 -----
322.0 r4061
323.0 TK-04977 - Fixing non-transitive compareTo() methods across model objects so we
      don't encounter DM exception "java.lang.IllegalArgumentException: Comparison method
      violates its general contract!" TK-04969 - Only considering encounters with ...
324.0 -----
325.0 r4060
326.0 B-02850 Edit for consistent formatting
327.0 -----
328.0 r4059
329.0 TK-04977 - Adding ability to disable background team validations to prevent
      transaction deadlock when running data migration
330.0 -----
331.0 r4058
332.0 UI improvement for dual focus.
333.0 -----
334.0 r4057
335.0 Hiding seconf focus for non PACT teams.
336.0 -----
337.0 r4056
338.0 tk - 04847 updated getting started section
339.0 -----
340.0 r4055
341.0 Changes to support team role ids in preceptor transform rules.
342.0 -----
343.0 r4054
344.0 TK-05045 - Adjustments to date calculation logic for AI encounter discovery
345.0 -----
346.0 r4053
347.0 Persistence changes to add team roles to preception transform rules
348.0 -----
349.0 r4052
350.0 TK-05045 - Adjustments to timezones for AI flagging process

370.0 r4045
371.0 TK-??? - Fixing issue with incorrect IEN in local DB
372.0 -----
373.0 r4044
374.0 Added reset for oldIen.
375.0 -----
376.0 r4043

```

```

377.0 Added re-formatting for DOD for display.
378.0 -----
379.0 r4042
380.0 Removed # from ssn heading in vista search results table.
381.0 -----
382.0 r4041
383.0 TK-??? - Adjustments to accommodate new GET PATIENT ENCOUNTERS RPC format
384.0 -----
385.0 r4037
386.0 Fixed IE behavior.
387.0 -----
388.0 r4035
389.0 TK-??? - Fixing Vista synchronization to accommodate weird cases where an object
          previously saved in our DB no longer exists in the Vista system
390.0 -----
391.0 r4034
392.0 SQA_X Mirth backups as of 2014-05-20
393.0 -----
394.0 r4031
395.0 TK-??? - Fixes to preceptee logic to make it purely database-driven
396.0 -----
397.0 r4030
398.0 TK-??? - Code cleanup (no functional changes)
399.0 -----
400.0 r4028
401.0 TK - 04847
402.0 -----
403.0 r4027
404.0 TK - 04847 added
405.0 -----
406.0 r4026
407.0 TK - 04847 -- added
408.0 -----
409.0 r4025
410.0 TK - 04847 Updated online help.
411.0 -----
412.0 r4024
413.0 TK-??? - Fix for CPRS header sync where AP assignment expired
414.0 -----
415.0 r4023
416.0 Changes to support dual focus.
417.0 -----
418.0 r4022
419.0 Changes for dual focus support.
420.0 -----
421.0 r4021
422.0 Changes to support dual team focus.
423.0 -----
424.0 r4020
425.0 TK-??? - Updating token from ";" to "|" which separates multiple team validation
          errors in the DB
426.0 -----
427.0 r4019
428.0 TK-??? - Fixing DB constraint error created when trying to unassign a patient before
          one of the PatientPositionAssignment start dates
429.0 -----
430.0 r4018
431.0 TK-??? - Fixing DB constraint error created when trying to unassign a patient before
          one of the PatientPositionAssignment start dates
432.0 -----
433.0 r4017
434.0 TK-??? - Save a click - when assigning patient to team, pop up team search window
          immediately
435.0 -----
436.0 r4016
437.0 Removing the preceptee column from the listing display and fixing the bug whereby
          Preceptee and Preceptor columns had been switched.

```

```

438.0 -----
439.0 r4015
440.0 TK-??? - Adding validation to patient assignment code that requires a primary care
         position to exist before patient assignments are allowed.
441.0 -----
442.0 r4014
443.0 TK-??? - Adjusting CPRS header sync flagging to be driven off primaryCare=true flag
         and assumption that, for primary care teams, all Patient->Position assignments are
         to AP's.
444.0 -----
445.0 r4013
446.0 TK-??? - Adjusting CPRS header sync flagging to be driven off primaryCare=true flag
         and roleReceptorRules instead of PCP/AP team roles (incomplete)
447.0 -----
448.0 r4012
449.0 Reworded validation error.
450.0 -----
451.0 r4011
452.0 ???
453.0 -----
454.0 r4010
455.0 Added second focus.
456.0 -----
457.0 r4009
458.0 Added dual focus validation.
459.0 -----
460.0 r4008
461.0 Added second focus.
462.0 -----
463.0 r4007
464.0 tk - 04847 System generated file
465.0 -----
466.0 r4006
467.0 TK 04847 -- Added Assigning_a_Preceptor_Preceptee.htm
468.0 -----
469.0 r4005
470.0 TK - 4847 added Assigning_a_Preceptor_Preceptee.htm, documented Preceptee/Preceptor
         information.
471.0 -----
472.0 r4004
473.0
474.0 -----
475.0 r4003
476.0 TK-??? - Refactoring VistaSync to be non-transactional (should fix
         OptimisticLockingException and Adi's delays)
477.0 -----
478.0 r4002
479.0 Fixing a styling issue with patientAssignments Listing on IE
480.0 -----
481.0 r4001
482.0 TK-05045 - Refactoring patient/team assignments for AI process
483.0 -----
484.0 r4000
485.0 Fixed override fields behavior when creating new position.
486.0 -----
487.0 r3999
488.0 TK-05045 - Refactoring patient/team assignments for AI process
489.0 -----
490.0 r3998
491.0 TK-05045 - Refactoring patient/team assignments for AI process
492.0 -----
493.0 r3997
494.0 Changesto accomodate user at station3D only.
495.0 -----
496.0 r3996

```

497.0 Changing the column subsetting for the position profile page for the Patient
 assignments. Ensuring that only actives are accounted for in the group used up
 capacity and team level model capacity calculations.

 498.0
 499.0 r3995
 500.0
 501.0 -----
 502.0 r3994
 503.0 TK-??? - Adjusting auto-inact period to every 5 minutes per Madhavi's request

 504.0
 505.0 r3993
 506.0 Updated based on Lydia's mockup.

 507.0
 508.0 r3992
 509.0 B-02647 - changed to only show modeled capacity fields for PACT teams.

 510.0
 511.0 r3991
 512.0 TK-05045 - Normalizing a few more things to 3D level

 513.0
 514.0 r3990
 515.0 TK-05045 - Refactoring patient/team assignments for AI process

 516.0
 517.0 r3989
 518.0 TK-05045 - Refactoring patient/team assignments for AI process

 519.0
 520.0 r3988
 521.0 Fixed a bug relating to the Patient assignments filtering on non Preceptee
 positions.

 522.0
 523.0 r3987
 524.0 TK-??? - Scoping VistaPatients and Staff to 3-digit station level

 525.0
 526.0 r3984
 527.0 TK-??? - Scoping patient profile security check to 3-digit station level

 528.0
 529.0 r3982

 531.0
 532.0 r3981
 533.0 TK-??? - Scoping VistaPatients and Staff to 3-digit station level

 534.0
 535.0 r3980
 536.0 Making Patient assignment listing on the position profile server driven table

 537.0
 538.0 r3979
 539.0 TK-??? - Tweaks to auto-inact process

 540.0
 541.0 r3978
 542.0 TK-??? - Restricting patient auto-inact to primary care teams

 543.0
 544.0 r3977
 545.0 TK-??? - Passing unit test for patient auto-inactivation set last encounter date

 546.0
 547.0 r3976
 548.0 Modified ordering of patient team assignments so that MH always shows up before OEF
 assignments

 549.0
 550.0 r3975
 551.0 TK-??? - Setting last validation error string in DB to multiple errors separated
 with semicolon

 552.0
 553.0 r3974
 554.0 TK-??? - Updating cron for auto-inactivation in SQA

 555.0
 556.0 r3973

```

557.0 TK-??? - Implemented auto-inactivation process in Java - currently still relies on
the DOD / DOD rescinded flags in existing Vista process. Flagged / Inactivation unit
tests passing, fixing others shortly.
558.0 -----
559.0 r3972
560.0 B - 01426, TK - 04847 Updated Assign_Staff_to_a_Position.htm,
Preceptor_Preceptee_Relationships.htm, Create_a_Team_Profile.htm,
Update_a_Position_Profile.htm, View_or_Edit_Position_History.htm
561.0 -----
562.0 r3971
563.0 TK-??? - Adding props for new CISS functionality
564.0 -----
565.0 r3970
566.0 TK-??? - renaming one of CISS methods for clarity
567.0 -----
568.0 r3969
569.0 TK-??? - Optimizing getCISUser() call to use session-bound object instead of
querying LDAP
570.0 -----
571.0 r3968
572.0 Fix for failing auto-logout on inactivity.
573.0 -----

 1451.0 TK-B2714 - Incremental checkin against CPRS header sync process
 1452.0 -----
 1453.0 r3605
 1454.0 TK-B2714 - Incremental checkin against CPRS header sync process
 1455.0 -----
 1456.0 r3604
 1457.0 TK-B2714 - First pass at CPRS header sync process (work in progress)
 1458.0 -----
 1459.0 r3603
 1460.0 Added test to reproducescenario that's failing in dev2dev testing. It passes.
 1461.0 -----
 1462.0 r3602
 1463.0 Changed wording of message closer to what Cindi proposed.

1464.0 -----
 1465.0 r3601
 1466.0 Fixing an issue where the endDate has to be null on the Patient assignment before
 trying to unassign it (for MVI moves)
 1467.0 -----
 1468.0 r3600
 1469.0 Fixed inactivation.
 1470.0 -----
 1471.0 r3599
 1472.0 TK-??? - Adding service-level check to prevent patient assignments if they have a
 Date of Death recorded
 1473.0 -----
 1474.0 r3598
 1475.0 -----
 1476.0 -----
 1477.0 r3597
 1478.0 -----
 1479.0 -----
 1480.0 r3596
 1481.0 -----
 1482.0 -----
 1483.0 r3595
 1484.0 -----
 1485.0 -----
 1486.0 r3594
 1487.0 -----
 1488.0 -----
 1489.0 r3593
 1490.0 -----
 1491.0 -----
 1492.0 r3592
 1493.0 -----
 1494.0 -----
 1495.0 r3591
 1496.0 -----
 1497.0 -----
 1498.0 r3590
 1499.0 -----
 1500.0 -----
 1501.0 r3589
 1502.0 -----
 1503.0 -----
 1504.0 r3588
 1505.0 -----
 1506.0 -----
 1507.0 r3587
 1508.0 -----
 1509.0 -----
 1510.0 r3579
 1511.0 Fixed bug with duplicate NULL icn constraint.
 1512.0 -----
 1513.0 r3578
 1514.0 -----
 1515.0 -----
 1516.0 r3577
 1517.0 TK-B2714 - Defaulting CPRS header line to "" instead of null to prevent DB
 constraint violation
 1518.0 -----
 1519.0 r3575
 1520.0 Changed maximum length of first line to 245 based on Andy's input.
 1521.0 -----
 1522.0 r3574
 1523.0 TK-??? - Fixing validator after latest refactoring
 1524.0 -----
 1525.0 r3573
 1526.0 Added fields to support header line synchronization.
 1527.0 -----

```

1528.0 r3572
1529.0 TK-??? - Updating SQA props from dev values
1530.0 -----
1531.0 r3571
1532.0 TK-??? - Adding background job log entries to nightly Staff update job
1533.0 -----
1534.0 r3569
1535.0 Fixed wording/spelling of messages.
1536.0 -----
1537.0 r3568
1538.0 TK-??? - Updating props
1539.0 -----
1540.0 r3567
1541.0 TK:04444   Replaced damaged html files
1542.0 -----
1543.0 r3565
1544.0 TK-??? - Updating Maven to 3.2.1
1545.0 -----
1546.0 r3564
1547.0 Fix for failing test.
1548.0 -----
1549.0 r3563
1550.0 TK-??? - Updating unit tests and point-release of Spring & Hibernate
1551.0 -----
1552.0 r3562
1553.0 Changed invocation of getPatientPACTEncounter
1554.0 -----
1555.0 r3561
1556.0 -----
1557.0 -----
1558.0 r3560
1559.0 -----
1560.0 -----
1561.0 r3559
1562.0 TK-??? - update to email unit test
1563.0 -----
1564.0 r3558
1565.0 Added prameters check.
1566.0 -----
1567.0 r3557
1568.0 -----
1569.0 -----
1570.0 r3556
1571.0 TK-??? - Hooking up PACT encounter search - incremental checkin, waiting SME updates
      and Vista RPC changes
1572.0 -----
1573.0 r3555
1574.0 -----
1575.0 -----
1576.0 r3553
1577.0 -----
1578.0 -----
1579.0 r3552
1580.0 Added cancelled assignment status if MPCP request was cancelled.
1581.0 -----
1582.0 r3551
1583.0 Added check for cancelled MPCP request.
1584.0 -----
1585.0 r3550
1586.0 Added call with explicit daysBack.
1587.0 -----
1588.0 r3549
1589.0 TK-??? - Hooking up PACT encounter search
1590.0 -----
1591.0 r3548
1592.0 TK-??? - Refactored validators to support new Pending / MultiPCP errors
1593.0 -----

```

1594.0 r3547
 1595.0 TK-??? - Refactored validators to support new Pending / MultiPCP errors
 1596.0 -----
 1597.0 r3546
 1598.0 Added low level wrapper for RPC to get patient's encounters with PACT team. Returns
 list of encounter date/time values in vista format, needs to be translated to
 DateTime in calling code because it requires knowledge of vista's timezone.
 1599.0 -----
 1600.0 r3545
 1601.0
 1602.0 -----
 1603.0 r3544
 1604.0 Refactor.
 1605.0 -----
 1606.0 r3543
 1607.0 Refactored.
 1608.0 -----
 1609.0 r3542
 1610.0 Typo fix.
 1611.0 -----
 1612.0 r3541
 1613.0 Small changes.

 1639.0 r3527
 1640.0
 1641.0 -----
 1642.0 r3526
 1643.0 B-02653 - Shuffled patient assignment classes around and fixed A43 unit test
 1644.0 -----
 1645.0 r3525
 1646.0 Added unassignment of patient from team on move/merge.
 1647.0 -----
 1648.0 r3524
 1649.0 B-02653: Attempt to Unassign only active assignments on MPCP cancel/denial
 1650.0 -----
 1651.0 r3523
 1652.0 B-02653 - Intra-station validator

```

1653.0 -----
1654.0 r3522
1655.0 B-02653: Adding a new unit test for MPCP to patient assignment association testing.
1656.0 -----
1657.0 r3521
1658.0 B-02653: Adding a new property to store the MPCP lookback period (defaulted to 24
      months from search date)
1659.0 -----
1660.0 r3520
1661.0 B-02653: Storing the MPCP ID and MPCP status reference on the team patient
      assignment object during various events so that the status of the team patient
      assignment can be inferred. Also added after effects for MPCP cancellation. Created
      a ...
1662.0 -----
1663.0 r3519
1664.0 TK-??? - Fixing issue where CISSUser was locking on concurrent access by multiple
      sessions; changing CISS compile targets
1665.0 -----
1666.0 r3517
1667.0 Fixed "There can only be 1 PACT assignment within a 3-digit code station." defect,
      added 24 months window to calculation.
1668.0 -----
1669.0 r3516
1670.0 Added one more unit test for A43 processing.
1671.0 -----
1672.0 r3515
1673.0 Added check of 24 months window for existing approved request when creating new one.
1674.0 -----
1675.0 r3514
1676.0 TK-??? - Updating props for dev
1677.0 -----
1678.0 r3513
1679.0 Fixed sorting order.
1680.0 -----
1681.0 r3512
1682.0 B-02653: Allow storage of cancel reason and comment for cancellation of Multi PCP
      requests
1683.0 -----
1684.0 r3510
1685.0 Changes.
1686.0 -----
1687.0 r3509
1688.0 Fixed some history logic and other rstaff.
1689.0 -----
1690.0 r3507
1691.0 Fixed
1692.0 -----
1693.0 r3506
1694.0 Fixed.
1695.0 -----
1696.0 r3505
1697.0 Fixed.
1698.0 -----
1699.0 r3504
1700.0 -----
1701.0 -----
1702.0 r3503
1703.0 Moved enum up to abstract class.
1704.0 -----
1705.0 r3502
1706.0 Restored override of getAssignmentStatus.
1707.0 -----
1708.0 r3501
1709.0 Fixed sort order.
1710.0 -----
1711.0 r3500
1712.0 B-02653 - Refactored email service for async performance

```

```

1713.0 -----
1714.0 r3499
1715.0 B-02653: Minor UI fixes and cleanup
1716.0 -----
1717.0 r3498
1718.0 B-02653: Minor UI fixes and cleanup
1719.0 -----
1720.0 r3497
1721.0 B-02653: Adding Re-send alert functionality to the alert approvals and UI cleanup
1722.0 -----
1723.0 r3496
1724.0 B-02653: Adding Re-send alert functionality to the alert approvals and UI cleanup
1725.0 -----
1726.0 r3495
1727.0 Fix for the A43 test failure. The A43 response for M PCP is now to cancel not delete
      the request.
1728.0 -----
1729.0 r3494
1730.0 B-02653 - Adjustments for multiPCP / alerts / emails
1731.0 -----
1732.0 r3493
1733.0 B-02653: Sending alerts on Multi PCP request cancellation B-02653: Cancel Multi-PCP
      requests instead of deletion on A43/A24 responses
1734.0 -----
1735.0 r3492
1736.0 Fix for workalerts exception
1737.0 -----
1738.0 r3491
1739.0 B-02653: New APIs for the Reminder escalations for approval requests without any
      action.
1740.0 -----
1741.0 r3490
1742.0 B-02653: New APIs for the Reminder escalations for approval requests without any
      action.
1743.0 -----
1744.0 r3489
1745.0 B-02653 - Adjustments for multiPCP / alerts / emails

1747.0 r3488
1748.0 B-02653 - Adjustments for multiPCP / alerts / emails
1749.0 -----
1750.0 r3487
1751.0 B-02653 - Adjustments for multiPCP / alerts / emails
1752.0 -----
1753.0 r3486
1754.0 TK-04533 UI changes impacted by the need to report status change date
1755.0 -----
1756.0 r3485
1757.0 Reverting back since we want to use MODIFIED_COUNT in this case
1758.0 -----
1759.0 r3483
1760.0 Fixing startup issues after the last code refactor. If Template is a lookup table,
      and if Template model needs to extend the AbstractPCMMLookup, the table needs a code
      column. Also the TEMPLATE_NAME column needs to be renamed to NAME.
1761.0 -----
1762.0 r3482
1763.0 B-02653 - Adjustments for new TEMPLATE table name
1764.0 -----
1765.0 r3481
1766.0 B-02653 - Adjustments for new TEMPLATE table name
1767.0 -----
1768.0 r3480
1769.0 Fixed sorting order.
1770.0 -----
1771.0 r3479
1772.0 Fixed endless loop in the test.
1773.0 -----

```

1774.0 r3478
 1775.0 TK-04533 UI changes impacted by the need to report status change date
 1776.0 -----
 1777.0 r3477
 1778.0 Fixed setting ftee on 404.52
 1779.0 -----
 1780.0 r3476
 1781.0 B-02653 - Updates to MultiPCP / email / alerts, fixed all but two unit tests
 1782.0 -----
 1783.0 r3475
 1784.0 B-02653 - refactored AlertServiceImpl (still untested)
 1785.0 -----
 1786.0 r3473
 1787.0 B-02653 - refactored AlertServiceImpl (still untested)
 1788.0 -----
 1789.0 r3472
 1790.0 B-02653 - Enhanced email functionality, refactored AlertServiceImpl (untested, unit test shortly)
 1791.0 -----
 1792.0 r3471
 1793.0 B-02653 - Initial email functionality
 1794.0 -----
 1795.0 r3470
 1796.0 Removed reference to multipcp status. Added transient field to hold assignment status.
 1797.0 -----
 1798.0 r3469
 1799.0 Fixed ACK^A31.
 1800.0 -----
 1801.0 r3467
 1802.0 B-02653: Using a new role to capture the Clinical approvers on Multi PCP results. Also temp fix for Withdraw window on click issue.
 1803.0 -----
 1804.0 r3461
 1805.0 B-02653 - Updates to MultiPCP
 1806.0 -----
 1807.0 r3460
 1808.0 B-02653 - Updates to MultiPCP - Adding MultiPCP status field to team patient assign
 1809.0 -----
 1810.0 r3459
 1811.0 TK-??? - Updated batch job to update staff members nightly
 1812.0 -----
 1813.0 r3457
 1814.0 Adding in SQA_X Environment Properties Files Added By [REDACTED]
 1815.0 -----
 1816.0 r3456
 1817.0 [REDACTED] v_X and SQA_X directories to checkin Properties Files. Added By [REDACTED]
 1818.0 -----
 1819.0 r3455
 1820.0 Added All DEV properties
 1821.0 -----
 1822.0 r3454
 1823.0 TK-??? - Added batch job to update staff members nightly
 1824.0 -----
 1825.0 r3453
 1826.0 B-02653 - Updates to Patient inactive process & vista station data table
 1827.0 -----
 1828.0 r3449
 1829.0 Removing the uninitialized JS var that was causing an issue on IE on the team history popup
 1830.0 -----
 1831.0 r3448
 1832.0 B-02653 - Updates to MultiPCP - change validators, cleanup, add effective date to multiPCP calcs
 1833.0 -----
 1834.0 r3446

1835.0 Prevent Employee from accessing their own patient profile

 1837.0 r3445
 1838.0 Prevent Employee from accessing their own patient profile
 1839.0 -----
 1840.0 r3444
 1841.0 Prevent Employee from accessing their own patient profile
 1842.0 -----
 1843.0 r3443
 1844.0 Prevent Employee from accessing their own patient profile
 1845.0 -----
 1846.0 r3442
 1847.0 B-02653: Unit test for A43 move Multi PCP after effects. Fixes for various issues
 found during unit tests of automated Multi PCP disposition.
 1848.0 -----
 1849.0 r3441
 1850.0 TK-??? - updates to cluster config
 1851.0 -----
 1852.0 r3438
 1853.0 B-02653: Added Service layer APIs to handle automated creation of multi PCP request
 when a patient is assigned to a team in pending state, to handle activations of
 patient assignments, inactivation of patient assignments and to handle recei...
 1854.0 -----
 1855.0 r3437
 1856.0 B-02653 - Updates to MultiPCP - change securityService.getUser() which calls LDAP to
 securityDAO.getUserByName
 1857.0 -----
 1858.0 r3436
 1859.0 B-02653: Added support for withdrawing (Cancelling) a Multi PCP request from the UI
 1860.0 -----
 1861.0 r3435
 1862.0 B-02653: Added support for withdrawing (Cancelling) a Multi PCP request from the UI
 1863.0 -----
 1864.0 r3431
 1865.0 B-02653 - Updates to MultiPCP
 1866.0 -----
 1867.0 r3430
 1868.0 B-02653 - Updates to MultiPCP
 1869.0 -----
 1870.0 r3429
 1871.0 B-02653: First cut of Multi PCP UI, Service, DAO , Model changes to allow multiple
 PCP approvals - one per station that has an Active PC request.
 1872.0 -----
 1873.0 r3424
 1874.0 Added code to support Care Type to Team Role mapping and validator based on it.
 1875.0 -----
 1876.0 r3423
 1877.0 1. Added code to support Care Type to Team Role mappings and validator that's based
 on it. 2. Changed vista object factory to use dynamic teamlet assignment.
 1878.0 -----
 1879.0 r3421
 1880.0 Fixed problem with PV returning multiple DFNs for the same station.
 1881.0 -----
 1882.0 r3420
 1883.0 Optimized set handling.
 1884.0 -----
 1885.0 r3418
 1886.0 TK-??? - Changing spring batch config to fully specify DB type instead of relying on
 DB metadata
 1887.0 -----
 1888.0 r3411
 1889.0 TK-??? - Tweaking ETL controller to use "2" for inactive instead of "0"
 1890.0 -----
 1891.0 r3410
 1892.0 TK-??? - Fixing issue where patient auto-inactivation appears to be hung; this will
 restart after a configurable amount of minutes.
 1893.0 -----

1894.0 r3407
 1895.0 Fixed bug.
 1896.0 -----
 1897.0 r3406
 1898.0 Added stacktrace to nack error text.
 1899.0 -----
 1900.0 r3405
 1901.0 TK-??? - Fixing one-time notification issue
 1902.0 -----
 1903.0 r3402
 1904.0 Added code to handle A3l pid without dfn/station number for treatment facility.
 1905.0 -----
 1906.0 r3401
 1907.0 Added handling of A3l without DFN.
 1908.0 -----
 1909.0 r3400
 1910.0 TK-??? - Adding ETL utility
 1911.0 -----
 1912.0 r3399
 1913.0 TK-??? - Optimizing getCissUser() in controllers
 1914.0 -----
 1915.0 r3395
 1916.0 -----
 1917.0 -----
 1918.0 r3394
 1919.0 More fixes from unit tests.
 1920.0 -----
 1921.0 r3393
 1922.0 Fixe quasi-patient related bug.
 1923.0 -----
 1924.0 r3392
 1925.0 Fixed remote merge scenarios that errored in dev-2-dev testing.
 1926.0 -----
 1927.0 r3391
 1928.0 TK-??? - Adding footer message on homepage to signify background processes running;
 caching CISSUser in common interceptor for speed improvement; adding startup code to
 initialize vista background processes as not running
 1929.0 -----
 1930.0 r3390
 1931.0 TK-??? - Upgrading devs to JDK 1.7.0_51
 1932.0 -----
 1933.0 r3389
 1934.0 Allow Batch operations to work for non PC teams
 1935.0 -----
 1936.0 r3384
 1937.0 Moving surrogate staff assignment division out from under the notification section
 to allow notification distro rules to be persisted successfully on IE.
 1938.0 -----
 1939.0 r3382
 1940.0 Added code to restrict patient assignment to th team of DoD is set.
 1941.0 -----
 1942.0 r3381
 1943.0 -----
 1944.0 -----
 1945.0 r3380
 1946.0 TK-04348 Upgraded project file to RH 10.0.1.292
 1947.0 -----
 1948.0 r3378
 1949.0 Revert changes.
 1950.0 -----
 1951.0 r3375
 1952.0 Changed to accomodate DEV_X MVI testing.
 1953.0 -----
 1954.0 r3374
 1955.0 Fix for a defect that was causing the PC assign counts to not be updated on
 POSTBACKs from update process on Vista for CPRS header LOCAL/REMOTE/DUAL
 classifications.

1956.0 -----
 1957.0 r3373
 1958.0 TK-??? - Changing validator to exclude pending PatientTeam assignments (i.e. those
 without a lastEncounterDate)
 1959.0 -----
 1960.0 r3371
 1961.0 Fixed corner case, turns out it's not so quite corner.
 1962.0 -----
 1963.0 r3367
 1964.0 TK-??? - Tweak for ETL helper controller to show results
 1965.0 -----
 1966.0 r3366
 1967.0 TK-??? - TimeZone fixes for Vista / auto-inactivation process
 1968.0 -----
 1969.0 r3365
 1970.0 TK-??? - Adding supporting web service for ADI to extract Position and Team status
 history from Vista
 1971.0 -----
 1972.0 r3363
 1973.0 Fixed backlog Issue # 74 (Search for Group: The Search button is not in the tab
 order) - added to tab order.
 1974.0 -----
 1975.0 r3362
 1976.0 Fixed backlog Issue # 72 (Search for Room. The tab order doesnt include the search
 button) - added button to tab order.
 1977.0 -----
 1978.0 r3360
 1979.0 TK-??? - Couple more logging messages and safety measures to ensure errors are
 logged in AutoInactivation tasklet
 1980.0 -----
 1981.0 r3359
 1982.0 TK-??? - Update to schema / fixes to restore Batch tasklet functionality
 1983.0 -----
 1984.0 r3358
 1985.0 Fixed.
 1986.0 -----
 1987.0 r3357
 1988.0 Some more flow changes.
 1989.0 -----
 1990.0 r3356
 1991.0 Changed flow to not use try/catch for MFN^M05 processing on the apper level.
 1992.0 -----
 1993.0 r3355
 1994.0 Fixed corner case.
 1995.0 -----
 1996.0 r3349
 1997.0 TK-??? - Including root cause for all log.error in catch blocks
 1998.0 -----
 1999.0 r3347
 2000.0 Made sensitive patient warnings popups based on a CSS class in all cases except
 Alert links.
 2001.0 -----
 2002.0 r3341
 2003.0 Fixed code not to override gender with null.
 2004.0 -----
 2005.0 r3340
 2006.0 Fixed resetting block window.
 2007.0 -----
 2008.0 r3339
 2009.0 TK-??? - Removing report, adding (hopefully) an improvement to transaction locking,
 setting DB isolation to SNAPSHOT via hibernate props
 2010.0 -----
 2011.0 r3338
 2012.0 Added info level log messages to gather more details on the thread identities
 involved in Scheduled jobs
 2013.0 -----
 2014.0 r3337

2015.0 Fix for a defect caused by null Genders on patient objects - setting the UI to not throw up a JS error if that happens. Also fix for a MODIFIED_COUNT null error on VISTA_INSTANCE inserts.
 2016.0 -----
 2017.0 r3335
 2018.0 Added test for M05 with unknown station.
 2019.0 -----
 2020.0 r3334
 2021.0 Added code to block MPI message processing for given ICN for 6 hours if unknown stations found.
 2022.0 -----
 2023.0 r3333
 2024.0 Code changes to produce a warning whenever a sensitive patient profile is accessed from the PCMMR UI
 2025.0 -----
 2026.0 r3330
 2027.0 Making the payload returned by CPRS restful webservice for PC active assignment counts more compact by shortening element names and suppressing some redundant elements.
 2028.0 -----
 2029.0 r3328
 2030.0 Added No Rows message
 2031.0 -----
 2032.0 r3327
 2033.0 Changes to color schemes to match Active Panel
 2034.0 -----
 2035.0 r3326
 2036.0 First cut of Active Panel Report built in SSRS
 2037.0 -----
 2038.0 r3325
 2039.0 Changes to color schemes to match up the ActivePanelReport
 2040.0 -----
 2041.0 r3324
 2042.0 Added Records accessed after and before prompts, added alternate row colors and added filtering capability to the institution params
 2043.0 -----
 2044.0 r3323
 2045.0 Per Lalit - added filter for bulk patient assign/transfer to only search for primary care team.
 2046.0 -----
 2047.0 r3322
 2048.0 Added saving city and state from VistA if patient's PV was never pulled.
 2049.0 -----
 2050.0 r3321
 2051.0 Added workaround for defect 3312, it will not prevent deadlocks, but will cause UI transaction to always win. Until we figure out how to prevent deadlock - that's a viable solution.
 2052.0 -----
 2053.0 r3320
 2054.0 Added invocation of RPC to support mailman messages for patient-position and patient-team assignments.
 2055.0 -----
 2056.0 r3319
 2057.0 Adding the Sensitive Patients Access Log Report RDL
 2058.0 -----
 2059.0 r3318
 2060.0 Support for handling POSTs to CPRS header web service containing application/xml MediaType content without the need to specify the content-type in the header. Making DFN non mandatory on the sensitive patient logs
 2061.0 -----
 2062.0 r3317
 2063.0 Fixed typo.
 2064.0 -----
 2065.0 r3316
 2066.0 Change for PV pull on newly created patient.
 2067.0 -----
 2068.0 r3314

2069.0 * Added support for creating an access log for any accesses to profiles of sensitive patients * Pulled in DOD, City and State to the patient search results when search results are retrieved from PCMMR
 2070.0 -----
 2071.0 r3312
 2072.0 Fixed bug - moved VistaPatient record did not require PV pull.
 2073.0 -----
 2074.0 r3311
 2075.0 Fix for a defect whereby Team Attribute change history was erroring out due to a reference to a missing column in the database (Clinical poc name has been removed from the DB). The referenced view also needs to be modified/changed in the DB...
 2076.0 -----
 2077.0 r3310
 2078.0 Added uuid to distinguish processing on the same server on different JVMs.
 2079.0 -----
 2080.0 r3308
 2081.0 Merging 3 Inpatient notification types into 1 (User story B-02609) Fix for Defect caused by Batch processes not simulating a login context. This causes subsequent Vista sync processes to fail on teams affected by batch processes. (Defect 33...
 2082.0 -----
 2083.0 r3306
 2084.0 -----
 2085.0 -----
 2086.0 r3304
 2087.0 Fixed defect.
 2088.0 -----
 2089.0 r3303
 2090.0 Changes for proxy user and new RPCs to replace DDR RPCs.
 2091.0 -----
 2092.0 r3301
 2093.0 -----
 2094.0 -----
 2095.0 r3299
 2096.0 Small changes.
 2097.0 -----
 2098.0 r3298
 2099.0 TK-??? - Fixing broken images
 2100.0 -----
 2101.0 r3297
 2102.0 Fix for a defect in search for patient by full SSN. The SSN passed in from the UI wasnt being unmasked to remove the - separators. Also added a not null check on the PrimaryCare Active counts to prevent Null Pointer errors if an unknown DFN...
 2103.0 -----
 2104.0 r3296
 2105.0 TK-??? - Fixing issue seen in SQA where the lookup value wasn't persisted before the item that referenced it.
 2106.0 -----
 2107.0 r3294
 2108.0 Changes to the MVI v3 registration job to prevent overlaps between consecutive executions of jobs. Added support for POST to the REST interface that returns an active count of PC assignments for a patient.
 2109.0 -----
 2110.0 r3293
 2111.0 TK-??? - Mods for DB constraints, hiding Add Preceptor Assignment button on position profile page if the position isn't a preceptee
 2112.0 -----
 2113.0 r3291
 2114.0 Reverted back proxy change, will put it back in after I test all changes.
 2115.0 -----
 2116.0 r3290
 2117.0 More changes for MFN-M05
 2118.0 -----
 2119.0 r3289
 2120.0 Changes for MFN-M05.
 2121.0 -----
 2122.0 r3288
 2123.0 Added quaziIcn handling for merging traits.

2124.0 -----
 2125.0 r3287
 2126.0 Added a rate limit to the MVI v3 registration job. This limit is applied per
 Unattended node - it constrains the number of patients registered on each scheduled
 job invocation to be less than a pre-set value.
 2127.0 -----
 2128.0 r3286
 2129.0 Added a rate limit to the MVI v3 registration job. This limit is applied per
 Unattended node - it constrains the number of patients registered on each scheduled
 job invocation to be less than a pre-set value. Also for gathering stats in SQA...
 2130.0 -----
 2131.0 r3284
 2132.0 Changes for proxy user.
 2133.0 -----
 2134.0 r3283
 2135.0 Added unit tests.
 2136.0 -----
 2137.0 r3282
 2138.0 Added debug info to support load balancing testing.
 2139.0 -----
 2140.0 r3281
 2141.0 Fixed bug in parser.
 2142.0 -----
 2143.0 r3280
 2144.0 Added code for processing MAD record event to MFN-M05 handler.
 2145.0 -----
 2146.0 r3276
 2147.0 B-02609 Removing team level notification settings
 2148.0 -----
 2149.0 r3270
 2150.0 Reverting back the display of the Enrollment Status column on the Patient Search
 results, the team and position profiles (from patient assignments) Turning off the
 Validator for enrollment status use during the assignment of patients to tea...
 2151.0 -----
 2152.0 r3269
 2153.0 TK-??? - Renaming Travelling to Traveling
 2154.0 -----
 2155.0 r3266
 2156.0 TK-??? - Refinements to unit test for @Async
 2157.0 -----
 2158.0 r3265
 2159.0 Order change for select and cancel buttons based on Cindi's input on the patient
 details pop up
 2160.0 -----
 2161.0 r3264
 2162.0 Fixing an issue where the trimming of leading and lagging whitespace in the search
 params wasnt being done on patient search forms. Fixing the suffix issue on patient
 names - they should show up after the middle name to conform to Vista nam...
 2163.0 -----
 2164.0 r3263
 2165.0 TK-??? - Refactoring @Async methods to exist in helper classes versus trying to
 self-proxy
 2166.0 -----
 2167.0 r3262
 2168.0 Fix for a bug caused due to TechRefresh. The staff Id wasnt being passed back on
 search to the UI causing issues such as a NPE and a Validation error.
 2169.0 -----
 2170.0 r3259
 2171.0 More unit tests and bug fixes for ADT^A24.
 2172.0 -----
 2173.0 r3258
 2174.0 Fix for an issue whereby when registering with MVI via the v3 route we were not
 honoring the MVI_REGISTRATION_ACTIVE_IND flag in the VISTA_INSTANCE table in all
 instances. For example we would honor it when we did an initial fetch of affect...

 2208.0 -----
 2209.0 r3240
 2210.0 -----
 2211.0 -----
 2212.0 r3239
 2213.0 Change for quazi-icn generation.
 2214.0 -----
 2215.0 r3238
 2216.0 Added processing of city, state and phone from PID
 2217.0 -----
 2218.0 r3237
 2219.0 Changes for quazi-patients and additional alerts for ADT^A24
 2220.0 -----
 2221.0 r3235
 2222.0 Spacing out the messages for business rule failures a bit better for display on the
 job results page
 2223.0 -----
 2224.0 r3234
 2225.0 Fix for an issue whereby we were showing the full stack trace for ServiceValidation
 errors (caused due to business rule violations) on the results page for batch jobs.
 2226.0 -----
 2227.0 r3233
 2228.0 Code to pull in the Enrollment status for patients and validation to prevent
 assignment of patients with unverified statuses B-02309
 2229.0 -----
 2230.0 r3232
 2231.0 Code to pull in the Enrollment status for patients B-02309
 2232.0 -----
 2233.0 r3231
 2234.0 Fix for searching "lag" patient in vista.
 2235.0 -----
 2236.0 r3228
 2237.0 Added changes to query current patient enrollment record.
 2238.0 -----

2239.0 r3227
 2240.0 TK-??? - small code cleanup
 2241.0 -----
 2242.0 r3224
 2243.0 Changed ADT^A24 handling per Chris Chesny email.
 2244.0 -----
 2245.0 r3223
 2246.0 Fixed code that it doesn't leave single zero in time portion.
 2247.0 -----
 2248.0 r3222
 2249.0 TK-??? - Adding env-specific props for cluster env's
 2250.0 -----
 2251.0 r3220
 2252.0 Added Enrollment status to the Patient listings on the Team details and Postion
 details page. This is a trial change to the UI to allow the Enrollment status to be
 available on the Position and Team patient listings to allow unverified pati...

 2319.0 -----
 2320.0 r3191
 2321.0 TK-??? - Updating Mirth channel XMLs to match new queue names (no distributed queue
 prefix)
 2322.0 -----
 2323.0 r3190
 2324.0 TK-??? - Updating PCMM JMS module name to use a dash instead of dot since it's
 screwing up Mirth
 2325.0 -----
 2326.0 r3189
 2327.0 TK-??? - Updating PCMM JMS module name to use a dash instead of dot since it's
 screwing up Mirth
 2328.0 -----
 2329.0 r3188
 2330.0 Added filter to patient search on Vista to filter out vista patients that already
 exist on PCMMR.
 2331.0 -----
 2332.0 r3187
 2333.0 TK-??? - Adding caching (incomplete but working)
 2334.0 -----
 2335.0 r3186
 2336.0 Fixed Defect # 3305 - if patient does not have national ICN, UI will not allow user
 to imports that patient into PCMMR.
 2337.0 -----
 2338.0 r3185
 2339.0 TK-??? - Tweaking vistasync to proactively save JobExecutionResult to avoid non
 persistent exception
 2340.0 -----
 2341.0 r3184
 2342.0 TK-??? - Improve performance, add ehcache items, fix report ID1 unit test
 2343.0 -----
 2344.0 r3183
 2345.0 TK-??? - Fixing performance and bug associated with Patient auto-inactivation
 process where it doesn't register the last executed date
 2346.0 -----
 2347.0 r3182

2348.0 TK-??? - Properties-izing the vista unit test credentials and reactivating Vista
 Sync unit test
 2349.0 -----
 2350.0 r3181
 2351.0 TK-??? - Properties-izing the vista unit test credentials and reactivating Vista
 Sync unit test
 2352.0 -----
 2353.0 r3180
 2354.0 Restoring unattended deployment
 2355.0 -----
 2356.0 r3179
 2357.0 Fixed bugs and added unit tests for pipe processing of all MVI incoming messages.
 They do not test business logic.
 2358.0 -----
 2359.0 r3178
 2360.0 TK-??? - Updating Batch size for Team.staffAssignments
 2361.0 -----
 2362.0 r3177
 2363.0 TK-??? - Updating unit tests, adding batch query params to model objects, bulk
 Organize Imports to remove warnings
 2364.0 -----
 2365.0 r3176
 2366.0 TK-??? - Updating unit tests
 2367.0 -----
 2368.0 r3175
 2369.0 TK-??? - Updating unit tests
 2370.0 -----
 2371.0 r3169
 2372.0 Added code to patient link processing to make it functional enough for pipe unit
 testing.
 2373.0 -----
 2374.0 r3168
 2375.0 Made changes to work with existing JMS framework.
 2376.0 -----
 2377.0 r3167
 2378.0 Made change to work with updated JMS framework.
 2379.0 -----
 2380.0 r3166
 2381.0 Made change to work in updated JMS framework.
 2382.0 -----
 2383.0 r3165
 2384.0 Created unit test for testing processing pipe of MVI patient move message. Test only
 exercise negative scenario, so no movement business logic is tested.
 2385.0 -----
 2386.0 r3163
 2387.0 TK-??? - Updating unit tests
 2388.0 -----
 2389.0 r3162
 2390.0 TK-??? - Updating unit tests
 2391.0 -----
 2392.0 r3161
 2393.0 -----
 2394.0 -----
 2395.0 r3160
 2396.0 Added validator to prevent surrogate to be assigned to self.
 2397.0 -----
 2398.0 r3158
 2399.0 Added validation to prevent staff from staffing position and surrogate at the same
 time.
 2400.0 -----
 2401.0 r3157
 2402.0 Added validation to prevent staff from staffing position and surrogate at the same
 time.
 2403.0 -----
 2404.0 r3155
 2405.0 TK-??? - Updating unit tests
 2406.0 -----

2407.0 r3154
 2408.0 adding back in the keystores folder for pcmm producer domain. The trust store has
 the updated VAAFI server side certs
 2409.0 -----
 2410.0 r3152
 2411.0 TK-??? - Updating unit tests; changed date parsing behavior for VistaUtil
 2412.0 -----

 2420.0 Fix for defect 3289 : On IE 9 and earlier, calling slice or substring on text
 area content causes the cursor to jump to the end of the text area
 content. If the slice is called on each keyup event , it will be impossible to e...
 2421.0 -----
 2422.0 r3147
 2423.0 Fix for defect whereby the cancel button was redirecting the user back to the login
 page on IE
 2424.0 -----
 2425.0 r3146
 2426.0 Moved identity traits into <to> node.
 2427.0 -----
 2428.0 r3143
 2429.0 TK-??? - Updates to domain config
 2430.0 -----
 2431.0 r3142
 2432.0 TK-??? - committing upgrades for dependencies, cleaning out unused files,
 simplifying Spring config using profiles, fixing Alert and Position equals/hashcode,
 batch process unit test framework, adding lazy loading for @OneToMany
 2433.0 -----
 2434.0 r3141
 2435.0 Changing element ordering based on discussions with Andy ..ensuring that
 careTypeCode and careTypeName show up before teamName
 2436.0 -----
 2437.0 r3140
 2438.0 SU-- Fixed bug that allowed saving Non-VA Provider Role without code. Jan should put
 DB constraint where it's missing.
 2439.0 -----
 2440.0 r3139
 2441.0 TK-??? - Reverting all changes temporarily until stable
 2442.0 -----
 2443.0 r3138
 2444.0 TK-??? - Unit tests enhancements
 2445.0 -----
 2446.0 r3137
 2447.0 TK-??? - Unit tests enhancements
 2448.0 -----
 2449.0 r3133
 2450.0 TK-??? - Unit tests enhancements
 2451.0 -----
 2452.0 r3132
 2453.0 TK-??? - Unit tests, convert Position everywhere to List instead of SortedSet
 2454.0 -----
 2455.0 r3131
 2456.0 TK-??? - CISS refactoring (incomplete)
 2457.0 -----
 2458.0 r3130
 2459.0 TK-??? - CISS refactoring (incomplete)
 2460.0 -----
 2461.0 r3126
 2462.0 Fixes for A43 processing issues - Code that moves non multi pcp alerts off from
 "From Patient" to "To patient" is being commented out. This code causes unfortunate
 side effects in moving more alerts off than it should. Also we can continue ...
 2463.0 -----

2464.0 r3125
 2465.0 Fixes for A43 processing issues - Deletes of Multi PCP requests were failing because not all child alerts were caught and removed.
 2466.0 -----
 2467.0 r3124
 2468.0 TK-??? - Fixing field reference in query
 2469.0 -----
 2470.0 r3123
 2471.0 Refactor of the MVI registration job to fix the retry issues. Also fixes for A43 processing issues - such as not copying over the Primary view attributes over the patient record when a patient is moved to an existing ICN known to PCMMR.
 2472.0 -----
 2473.0 r3122
 2474.0 TK-??? - Remove versioning from VistaStationData, improve unit tests
 2475.0 -----
 2476.0 r3121
 2477.0 TK-??? - enhancements to support multiple unattended servers; code cleanup; upgrade to latest point releases of Spring / Hibernate
 2478.0 -----
 2479.0 r3119
 2480.0 TK-??? - Fixing ConcurrentModificationException reported by Lalit during MVI A43 testing
 2481.0 -----
 2482.0 r3118
 2483.0 TK-??? - restore broken background process log JSP
 2484.0 -----
 2485.0 r3117
 2486.0 TK-??? - Tweaks to VistaSync, improvements to unit tests (but some still fail)
 2487.0 -----
 2488.0 r3116
 2489.0 Fix for missing actionable alerts for A43 processing. Actionable alerts of any sort werent getting sent out to target recipients.
 2490.0 -----
 2491.0 r3115
 2492.0 Fix for missing actionable alerts for A43 processing. Actionable alerts of any sort werent getting sent out to target recipients.
 2493.0 -----
 2494.0 r3113
 2495.0 Fix for PCM prepend for Commit Acks
 2496.0 -----
 2497.0 r3112
 2498.0 Updates for Commit ACK fix (prepending PCM to the MessageControlID) and fix to parse out PID segment demographic attributes for A43
 2499.0 -----
 2500.0 r3111
 2501.0 Fix for issue with A43 processing when the ICN being moved to is unknown for PCMMR. The toPatient created in PCMMR didnt have the Primary View attributes populated.
 2502.0 -----
 2503.0 r3110
 2504.0 Use ICN for patient equality checks instead of SSN
 2505.0 -----
 2506.0 r3109
 2507.0 TK-??? - Externalizing scheduled job properties and schedules
 2508.0 -----
 2509.0 r3108
 2510.0 TK-??? - Adding scheduled job to purge batch process results log
 2511.0 -----
 2512.0 r3107
 2513.0 TK-??? - Improving background jobs page
 2514.0 -----
 2515.0 r3106
 2516.0 TK-??? - Improving background jobs page
 2517.0 -----
 2518.0 r3105
 2519.0 TK-??? - Fixing icon for background jobs page
 2520.0 -----
 2521.0 r3104

2522.0 TK-??? - Tweaks for VistaSync process
 2523.0 -----
 2524.0 r3099
 2525.0 Fixed equals and hashCode to avoid losing patients in the search.
 2526.0 -----
 2527.0 r3097
 2528.0 Setting maxRetries to 1
 2529.0 -----
 2530.0 r3096
 2531.0 Adding retrieval count and limits for MVI registration counts
 2532.0 -----
 2533.0 r3095
 2534.0 Adding retrieval count and limits for MVI registration counts
 2535.0 -----
 2536.0 r3094
 2537.0 Changes to application ack channels.
 2538.0 -----
 2539.0 r3093
 2540.0 Reverted some DateTime to Date conversions.
 2541.0 -----
 2542.0 r3092
 2543.0 Fixing an issue with CPRS pop-up display for Mental Health Co-ordinator role Staff
 Assignments. Added code to handle MH teams similar to other Specialty teams with
 potentially multiple MHTC roles being of interest for display.
 2544.0 -----
 2545.0 r3091
 2546.0 TK-??? - Fix for VistaSync, point to old CHEYL12
 2547.0 -----
 2548.0 r3089
 2549.0 -----
 2550.0 -----
 2551.0 r3088
 2552.0 Fixed second greedy pattern.
 2553.0 -----
 2554.0 r3087
 2555.0 TK-??? - Initial framework for VistaCleanupJob
 2556.0 -----
 2557.0 r3086
 2558.0 TK-??? - Adding flags for disabling various processes
 2559.0 -----
 2560.0 r3085
 2561.0 TK-??? - Adding flags for disabling various processes
 2562.0 -----
 2563.0 r3084
 2564.0 TK-3287 - Forgot to update an IEN field for StaffAssignments to correct this IEN
 2565.0 -----
 2566.0 r3083
 2567.0 Cosmetic changes.

 2569.0 r3082
 2570.0 -----
 2571.0 -----
 2572.0 r3081
 2573.0 TK-??? - Code cleanup - removing warnings, ensuring that everywhere we call
 saveOrUpdate(), we replace the passed-in reference with the returned reference
 2574.0 -----
 2575.0 r3080
 2576.0 TK-3287 - Updating VistaSync to use individual transactions for each updateIEN
 method, as opposed to one long transaction for the process. This shouldn't fix the
 problem described in the CCR but should fix another related error about row-le...
 2577.0 -----
 2578.0 r3079
 2579.0 TK-??? - Removing parseLong on IEN since we converted all to Strings
 2580.0 -----
 2581.0 r3078
 2582.0 TK-??? - Code cleanup
 2583.0 -----

2584.0 r3077
 2585.0 Updated VAAFI certs
 2586.0 -----
 2587.0 r3076
 2588.0 Various small fixes.
 2589.0 -----
 2590.0 r3073
 2591.0 TK-??? - Fixing compile errors with missing import, changing Staff to use String IEN
 2592.0 -----
 2593.0 r3072
 2594.0 Small change for A43.
 2595.0 -----
 2596.0 r3070
 2597.0 Added code to throw unchecked exception if data coming from RPC has error marker.
 2598.0 -----
 2599.0 r3067
 2600.0 Changes to ADT^A43 processing.
 2601.0 -----
 2602.0 r3066
 2603.0 Story/Task: B-02519/TK-03962 CPRS PC window popup - fix for missing specialty team
 name and changed name for main position from ClinicalCaseManager for OEF teams to
 LeadCoordinator Also changes for the header to allow PUT requests for statu...
 2604.0 -----
 2605.0 r3064
 2606.0 Fixed problems with message extracting. Coded ADT^A43 processing.
 2607.0 -----
 2608.0 r3063
 2609.0 AZdded method for retrieveing all IENs for class. Not used.
 2610.0 -----
 2611.0 r3062
 2612.0 -----
 2613.0 -----
 2614.0 r3061
 2615.0 Story/Task: B-02519/TK-03962 CPRS PC window popup - added specialty teams support.
 2616.0 -----
 2617.0 r3060
 2618.0 Fixed problem with missing session and added catch in the loop.
 2619.0 -----
 2620.0 r3056
 2621.0 TK-??? - Updating calculations to prevent division by zero (BigDecimal compareTo()
 instead of equals())
 2622.0 -----
 2623.0 r3055
 2624.0 TK-??? - Changing VistaSync process to prevent version updates; VistaLink offline,
 unit tests uncertain
 2625.0 -----
 2626.0 r3054
 2627.0 Adding IDs to all buttons styled via JQuery UI (where missing). This is being done
 to make it easier for the automated scripting framework for SQA (UFT or QTP) to find
 the button objects.
 2628.0 -----
 2629.0 r3053
 2630.0 Adding support for times that have all 0s in the hh, mm and ss components
 2631.0 -----
 2632.0 r3052
 2633.0 Fixed datetime formatting to chop off trailing zeros.

 2683.0 r3016
 2684.0 Fixed DOB/DOD parsing for A31.
 2685.0 -----
 2686.0 r3015
 2687.0 For the RESTful patient summary endpoint: * Fixing the order of sub-elements as they
 show up on the Non VA provider and Admin and Clinical POC parent elements * ENSuring
 we have a nillable set of elements for contact information instead of ...
 2688.0 -----
 2689.0 r3010
 2690.0 Changed vista date time to return null if partial.
 2691.0 -----
 2692.0 r3006
 2693.0 Fix for ClassCast Exceptions due to an attempt to push in a Runtime Exception into a
 BinaryObject on the team where an instance of ServiceValidationException is
 expected instead.
 2694.0 -----
 2695.0 r3005
 2696.0 Added batch for MVI PV query and registration.

2697.0 -----
 2698.0 r3002
 2699.0 Changes to the Patient Summary REST service to be used by the CPRS pop up including:
 * Support for indicating the representation format for the summary via an extension
 to the URL string eg .xml for XML representation, .json for JSON * Re-o...
 2700.0 -----
 2701.0 r3001
 2702.0 Added extraction of means test status and primary eligibility from VistA and
 population to Patient object.
 2703.0 -----
 2704.0 r2999
 2705.0 Admin POC and Clinical POC changes - Part 1 - UI and resource bundle changes. Also
 changes to the Model properties to make them transient and population of the
 transient properties via StaffAssign searches.
 2706.0 -----
 2707.0 r2998
 2708.0 -----
 2709.0 -----
 2710.0 r2992
 2711.0 Adding support for capturing the registration of interest status from the 1306
 response to 1305
 2712.0 -----
 2713.0 r2991
 2714.0 Adding support for capturing the registration of interest status from the 1306
 response to 1305
 2715.0 -----
 2716.0 r2984
 2717.0 Modified the Restful web service that will populate the CPRS Pop up window to do the
 following :
 2718.0 -----
 2719.0 r2983
 2720.0 -----
 2721.0 -----
 2722.0 r2982
 2723.0 -----

 2769.0 -----
 2770.0 r2961
 2771.0
 2772.0 -----
 2773.0 r2960
 2774.0 First cut for the DAO based Patient Summary builder (alternative to the Stubbed
 implementation) for the RESTful service feeding CPRS
 2775.0 -----
 2776.0 r2957
 2777.0 TK-??? - Expanding error handling for Vista sync so HazelCast and other errors are
 stored in the Team for later reporting
 2778.0 -----
 2779.0 r2956
 2780.0 TK-??? - Fixing SerializableToBlobType bug, upgrading to Hibernate 4.2.7.SP1
 2781.0 -----
 2782.0 r2955
 2783.0 Fix to allow the Hibernate session to be open and available in the controller for
 the web service end point.
 2784.0 -----
 2785.0 r2954
 2786.0 Adding JQuery 1.9 and the Upgrade plugin v1.2
 2787.0 -----
 2788.0 r2953
 2789.0 Upgraded to JQuery 1.9. Added the JQuery-update plugin v1.2 as a stop gap
 arrangement to allow the deprecated functionality in 1.9 to be available while the
 developers fix the deprecated references. Needs a full regression cycle.
 2790.0 -----
 2791.0 r2952
 2792.0 Deleting test class that relied on SimpleMVIMessage
 2793.0 -----
 2794.0 r2951
 2795.0 Fixed problem with bombing transaction.
 2796.0 -----
 2797.0 r2950
 2798.0 Changed to check for processed messages that are not purged yet so to not re-process
 duplicates.
 2799.0 -----
 2800.0 r2949
 2801.0
 2802.0 -----
 2803.0 r2948
 2804.0 Changed absolute DN/IP for jms connections to alias "pcmm-domain", use hosts file to
 point to pcmm domain.
 2805.0 -----
 2806.0 r2947
 2807.0
 2808.0 -----
 2809.0 r2946
 2810.0
 2811.0 -----
 2812.0 r2945
 2813.0 TK-??? - adding webservice servlet + mapping
 2814.0 -----

```

2815.0 r2944
2816.0 REstful interface checkin for CPRS data feed
2817.0 -----
2818.0 r2943
2819.0 Creating Restful end point for feeding CPRS patient assignment summary data
2820.0 -----
2821.0 r2942
2822.0 -----
2823.0 -----
2824.0 r2941
