Mobile Application Information

Intended Audience (User) for Mobile Application: <input type="checkbox"/> Veteran <input type="checkbox"/> Caregiver <input type="checkbox"/> Provider <input type="checkbox"/> Public		
Business Needs		
Expected use is from a desktop web based application to provide a single view (manage) of all appointment related information for the resource (provider/medical clinic), book appointments, maintain wait lists, and provide information from VistA that indicates an appointment is booked that fulfills a VAR appointment request.		
Describe all Business Needs		
Ref. ID	Need	Business Value
1.	To improve the efficiency of VA appointment booking without	

	altering VistA. Also to provide a resource-based view of multiple appointment types to enable identification of amount of resources available.	
2.	Providing a single view of all appointment requests and lists coming in (“Demand”) along with a single view of all appointment types that are staffed by a medical clinic team (“Supply”) of appointment availability to improve the appointment booking process.	
3.	Ability for the clerk to have a consolidated view of VAR submitted appointment requests, a veteran’s current appointments and appointment availability, and the veteran’s wait lists to improve efficiency and maintainability of the appointment scheduling processes.	
4.	Informing the Veteran about a request made in the VAR Application, with specific information about an appointment request that was booked in VistA.	
5.	Indirectly supports the ability to assess if there is a provider supply issue.	

What laws / regulations cover the implementation of the app? (To ensure compliance)
Standard Veterans Affairs Compliance Policy

What is the expected & maximum size of the user base?
300+ Clerks
