

Ask A Pharmacist Version Description Document (VDD)

Mobile Application Version Description Document (VDD)

Name of Mobile Application Ask A Pharmacist (AAP) Link to Wiki - Ask a Pharmacist App	Name of JIRA Project Ask A Pharmacist (AAP) Link to JIRA: [REDACTED] [REDACTED]	Version Number: 1.0.0+2.718f47337ad
--	---	---

Description of Mobile Application There are two components to the Ask A Pharmacist (AAP) mobile app. The first component will create an Ask A Pharmacist mobile application that will supplement the current mobile caregiver application. Ask A Pharmacist will include a Frequently Ask Questions (FAQs) archive on general medication questions, vetted by Pharmacy Benefits Management (PBM), as well as links to internal and external medication resources maintained and vetted by PBM. The second component will provide a launching point to Secure Messaging (SM) within My HealtheVet, including pre-population of contact information for the Veteran's pharmacy team using a triage group titled "Ask A Pharmacist." This will make it much easier for Veterans to contact their pharmacy team and allow pharmacy staff to receive and triage Secure Messages (SMs) from patients and providers in the same manner as a phone call to pharmacy is triaged.

Target Environment Name: VA Mobile Framework (VAMF)	Servers Affected:	Projected to move to downstream environment?
--	--------------------------	---

Version Description:
07/21/2015

Updated from 1.0.0+1.ed1c6a71a51 includes Various bug fixes from 508 including eula decline, page titles, training link, feedback link, skipnav updates, tab order updates, and list of browsers supported for Veteran Facing Applications

☐ **AAP-1347** - Feedback: redirection issue **RESOLVED**

☐ **AAP-1349** - List of supported browsers is incomplete **CLOSED**

☐ **AAP-1352** - Footer text is not accessible via keyboard **CLOSED**

☐ **AAP-1343** - EULA has no Decline button **IN PROGRESS**

☐ **AAP-1350** - Skip Navigation Link redirects to Page Not Found **CLOSED**

☐ **AAP-1351** - Tab Order does not match the expected flow **CLOSED**

☐ **AAP-1346** - User Manual: redirection issue **RESOLVED**

☐ **AAP-1347** - Feedback: redirection issue **RESOLVED**

☐ **AAP-1344** - AAP abbreviation is not widely understood or well known by the intended user. **CLOSED**

Git Commit(s)

SCM Tool Information

The Atlassian tool suite is used for configuration and change management activities. Refer to the MAP2 Change Management Plan and the VAMF Configuration Management Plan for information on these processes. A waiver has been issued by the AERB for use of these tools. These tools are hosted in the VA Dedicated Cloud at Terremark, and the MAE falls under SDE control, with DJ Kachman as the CIO.

JIRA is used to track changes to the products, and Stash/Git is used to manage the source code.

Tool	Used For	URL direct to this build / version
JIRA	Tracking bugs, enhancements, user stories, and tasks	[REDACTED]
Stash / Git	Used for managing source code and readme files for developers	[REDACTED]
Jenkins	Building the deployment packages	[REDACTED]
Wiki	For storing documents - give the location of the files relevant for this release	[REDACTED]

Issues Included in this Release

Release Inventory

This section provides the inventory of material that is being released. This is required whenever the deliverable is component of a larger deliverable or a deliverable that contains multiple dependencies being documented within one VDD.

Release Component	Description	Method of Delivery	Recipient	Location (Name of server deployed to)

Electronic Media Released

This section references and lists electronic media if it is applicable to the product.

Physical Media Released

Not applicable for VAMF deliverables.
