

Ask A Pharmacist (AAP) SDD Addendum

Mobile Application System Design Document (SDD) Addendum

The System Design Document (SDD) is a dual-use document that provides the conceptual design as well as the as-built design. This document will be updated as the product is built to reflect the as-built product. Per the Project Management Accountability System (PMAS) Guide, the SDD with conceptual design is required prior to the Milestone 1 Review. The as-built for each delivery must be incorporated prior to the Milestone 2 Review.

Mobile Application Information

Project Increment / Release Designation: Ask a Pharmacist (AAP) National Release

Product Version: 1.0

	Veteran	Care Giver	Provider	Public
Intended Audience for Mobile Application	X			X

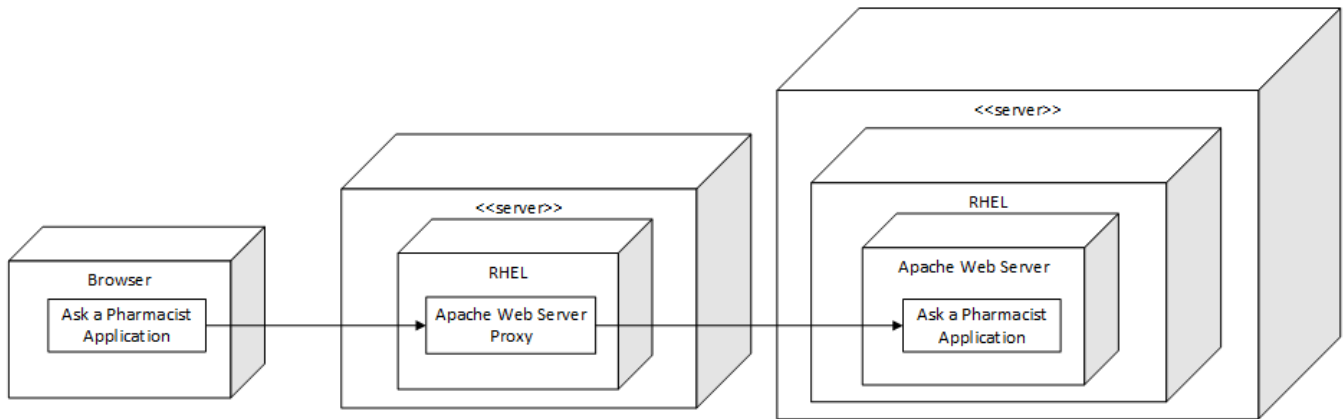

Question	Yes	No	If Yes, what information / data	If yes, then identify any consumer or source system(s) for the data
Does the user enter information or data into the mobile application?		X		
Does Mobile Application store information or data entered by the User? If yes, where is it stored?		X		
Does Mobile Application transmit/push data entered outside of the VAMF to VA?		X		
Does Mobile Application pull data from a VA Database (external to VAMF)?		X		
Does the Mobile Application store in the VAMF or on the device data pulled from a VA Database?		X		

This application can be classified as one of the following:

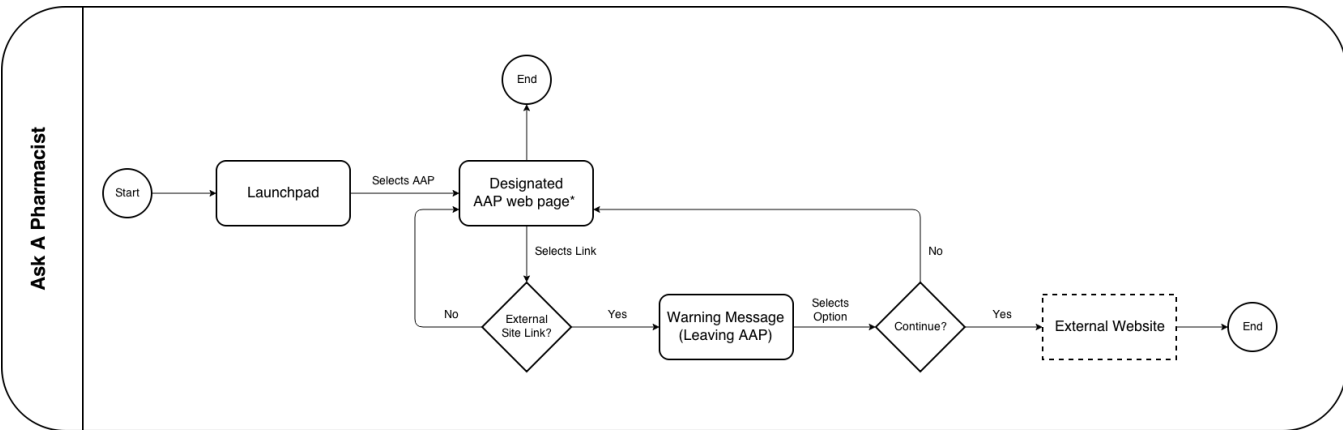

Mobile Application Classification (Only one box may be checked)	Mark with X
1 – Very Low: Mobile Application does not use VA Resource	
2 – Low: Read only access to VA Resource(s) (No PII / PHI)	X
3 – Medium: Write access to VA Resource(s)	
4 – High: Read and/or Write access of sensitive data to VA Resource(s) (Includes PII/PHI/other sensitive)	

Application Design

Deployment Diagram

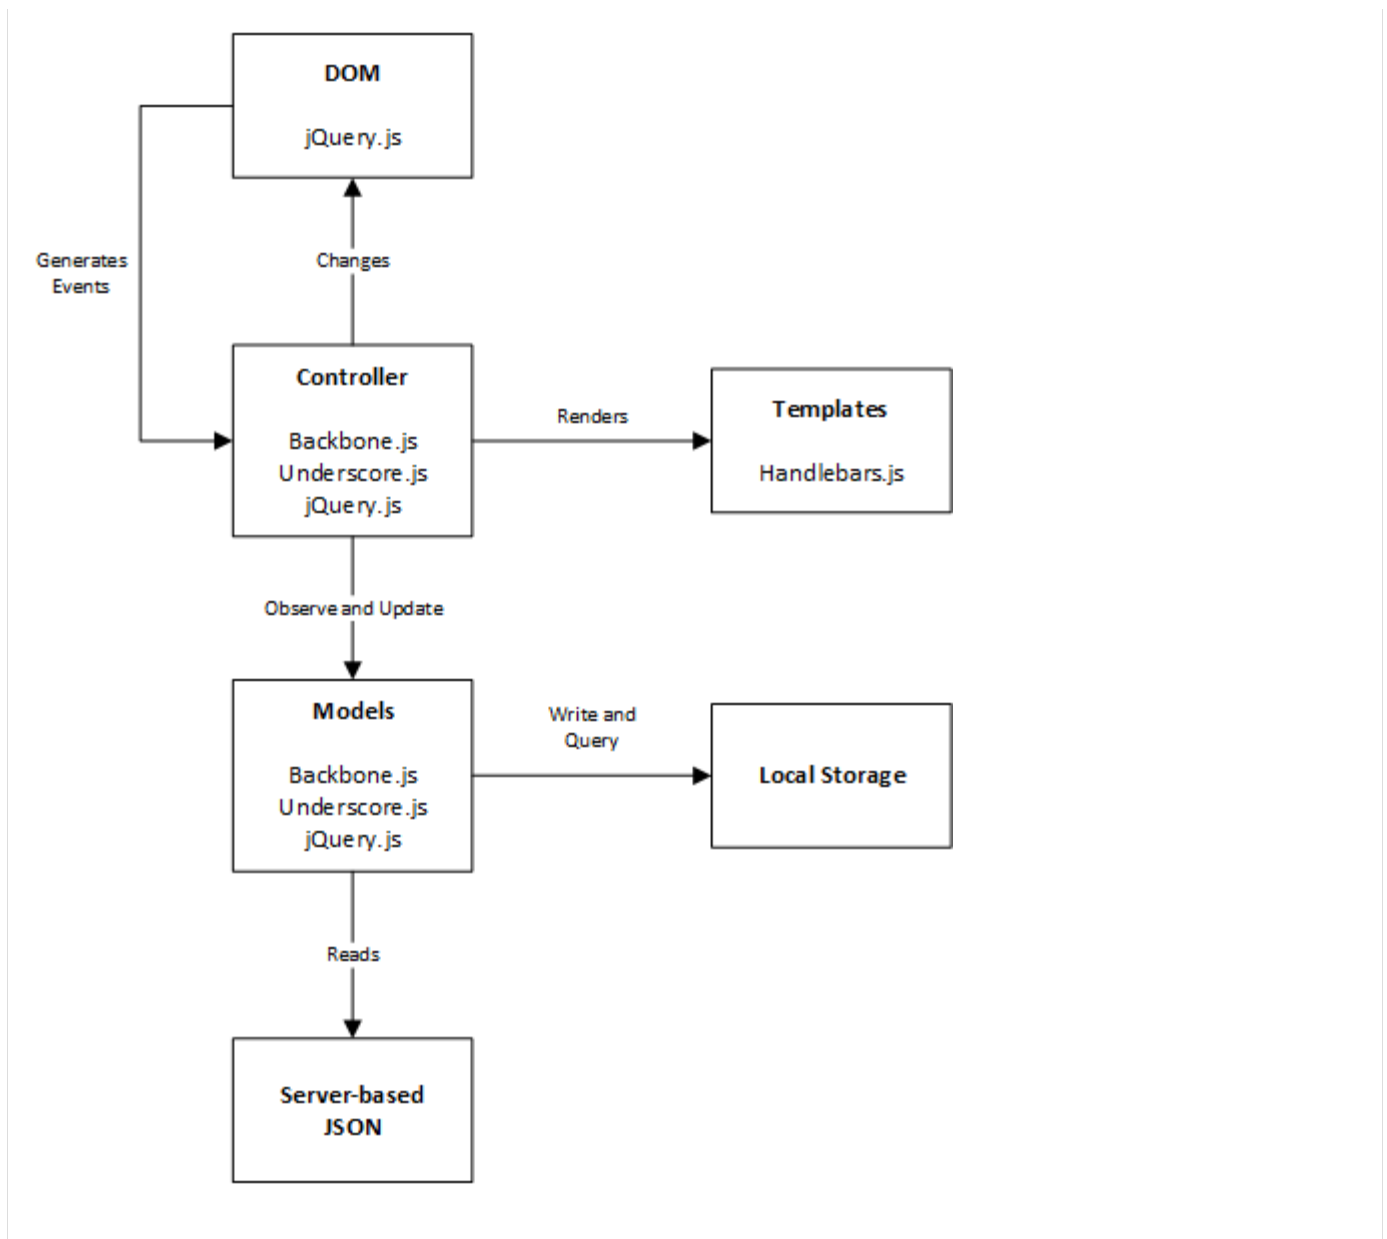

Page/Navigation Flow

* Designated AAP web page: Any web page within AAP website; "Home" is the initial landing page from Launchpad.

Application Architecture

Device's OS	Native	Hybrid	Web-Only	OS version supported	Targeted devices (iPhone, iPad, Samsung model...)	Estimated Storage Required for Device
iOS			X	7+		
Android			X	4+		
Windows			X	IE11 (Windows 7+)		

Technologies, Libraries, and Tools Used in the App	Version	On the TRM? (If not, provide a link to the waiver)
HTML5	5	Yes
Backbone	1.1.2	Yes

Bootstrap	3.2	Yes
Handlebars	1.0.12	Yes
Underscore	1.6.0	Yes
jQuery	2.1	Yes
Bower	1.3.12	Yes
Grunt	0.4.5	Yes
SASS	3.4.11	Yes
Compass	1.0.3	Yes
Jasmine	2.1	Yes

Data Architecture

This application will leverage embedded JSON data files that will contain information on the content and links to be displayed as well as the data that comprises the footer, About tab, and Help tab content.

Ref #	NoSQL Collection	Description of data collection	Source of data	Structure
1	N/A	This collection provides all content (links, navigation, and meta-data) for the app to leverage. The collection for this release is stored in a file embedded within the app. In a subsequent phase it will be moved to a more dynamic approach for use, such as a database (Mongo). The structure of the content will be validated against the json-schema in the structure column.	aap-content.json	<pre>{ "\$schema": "http://json-schema.org/draft-04/schema#", "title": "AAP Content", "description": "Ask a Pharmacist (AAP) JSON model for content and metadata", "definitions": { "content-link": { "type": "object", "properties": { "id": { "description": "The unique identifier for AAP main link", "type": "integer" }, "title": { "description": "The name to be displayed for the link", "type": "string" }, "links": { "type": "array", "minItems": 1, "description": "Current content link to more content (hierarchical relationship)", "items": { "\$ref": "#/definitions/link" } }, "link": { "type": "object", "properties": { "title": { "description": "The name</pre>

--	--	--	--	--

Add tables like this for Relational tables:

Column Name	Data Type	Nullable	Description	PK	FK

Provide some volume / sizing information for each collection/table:

Table or Collection	Number of Rows / Entries	Estimated Size per Entry	Total Disk (minus overhead for indexes, etc)

Laws / regulations that direct the implementation of the app?

None

Expected concurrent and maximum size of the user base?

User Category	Total Number of Users	Concurrent Users
Veterans/Public	any OEF - 1M+	1000

Interface Design

Existing VAMF Interfaces Used

Interface Name	Version	Endpoint	HTTP Method	Data Used by Mobile App	Source of Data	Data Retrieved - provide specific data elements used by this app
Authorization Services	4.3.0	/rest/token	DELETE	N/A	VAMF Token Store	Removed token from database
Health Adapter	3.4.0	/logout?<DATE>&redirect_uri=../launchpad	GET	N/A	VAMF Token Store	Log user out of session and redirect to Launchpad
Health Adapter	3.4.0	/rest/public/user-session	GET	MHP User	VAMF Token Store	First Name, Last Name, DOB, userIdentifier

New/Updated VAMF Interfaces Added

This section should contain services that are being deployed with this app - RESTful / other web services that become part of the VAMF service inventory, but are not available in production yet.

Interface Name (incl. version #)	Data Used by Mobile App	Source of Data	Included in Program-Level SDD?

For all services not currently in the Program-Level SDD, provide the documentation here that should be included - services, request data, response data, etc.

Dependencies/SLA

For example, you are reliant on a VA system to implement something for you, including supporting testing:

Project Dependency	Point of Contact Information	Describe Dependency

Traceability

See JIRA project for further details:

EPIC ID	EPIC	FEATURE	USER STORY ID	USER STORY	DESIGN COMPONENT
AAP-535	Web Application Template	As an Ask A Pharmacist Team Member, I want to setup the Ask A Pharmacist development/testing so that I have the necessary tooling to begin development of the application.	AAP-571	As an Ask A Pharmacist Team Member, I need to Install launchpad software as part of the development environment setup.	Web Application Template
AAP-536	Web Application Template	As an Ask A Pharmacist Team Member, I want to create the Ask a Pharmacist web project so that I may begin developing the application.	AAP-549	As an Ask A Pharmacist Team Member, I want to create script to complete fortify scans	Web Application Template
AAP-536	Web Application Template	As an Ask A Pharmacist Team Member, I want to create the Ask a Pharmacist web project so that I may begin developing the application.	AAP-548	As an Ask A Pharmacist Team Member, I want to create unit testing process (selenium scripting/JUnit reports that need to be integrated into development process).	Web Application Template
AAP-536	Web Application Template	As an Ask A Pharmacist Team Member, I want to create the Ask a Pharmacist web project so that I may begin developing the application.	AAP-547	As an Ask A Pharmacist Team Member, I want to create JS/App framework shell	Web Application Template

AAP-536	Web Application Template	As an Ask A Pharmacist Team Member, I want to create the Ask a Pharmacist web project so that I may begin developing the application.	AAP-546	As an Ask A Pharmacist Team Member, I want to integrate a Tomcat 7 preconfigured auto deployment build for local deployment	Web Application Template
AAP-536	Web Application Template	As an Ask A Pharmacist Team Member, I want to create the Ask a Pharmacist web project so that I may begin developing the application.	AAP-545	As an Ask A Pharmacist Team Member, I want to create build process for project	Web Application Template
AAP-536	Web Application Template	As an Ask A Pharmacist Team Member, I want to create the Ask a Pharmacist web project so that I may begin developing the application.	AAP-544	As an Ask A Pharmacist Team Member, I want to create structure of web project for .war deployment (includes Fortify, source, and acceptance test areas)	Web Application Template
AAP-536	Web Application Template	As an Ask A Pharmacist Team Member, I want to create the Ask a Pharmacist web project so that I may begin developing the application.	AAP-543	As an Ask A Pharmacist Team Member, I want to install Standalone Selenium Server, Internet Explorer Driver Server, Safari Driver, Chrome Driver and other applicable browser drivers.
