

MobileKidney 1.0.0 VDD

Mobile Application Version Description Document (VDD)

Name of Mobile Application MobileKidney (Wiki)	Name of JIRA Project Mobile Kidney App	Version Number: 1.0.0
Description of Mobile Application The MobileKidney app allows an individual to enter, view, and track personal information related to Kidney Health, so that it can be shared with the individual's healthcare team.		
Target Environment Name: 007 (Integration)	Servers Affected:	Projected to move to downstream environment?
Version Description: This MobileKidney Release 1.0.0 of MobileKidney Increment 1 consists of the system or product build (i.e., the URL or repository location of the GOLD copy of the completed application code), all documentation, and applicable release notes produced to date by the Agilex Team for the V&V Team . This includes final, customer-accepted versions of documentation. This VDD contains the change record reports for defects and enhancements that were completed and applied to this v1 of the MobileKidney Increment 1 . All artifacts listed here are contained within the Agilex Team CM Version Management Archive. This executable was made with CM involvement, and therefore CM certifies the ability to reproduce it. All artifacts used to produce this delivery are in the CM repository and were managed by CM for producing the deliverable following CM processes and procedures.		

SCM Tool Information

The Atlassian tool suite is used for configuration and change management activities. Refer to the MAP Change Management Plan and the VAMF Configuration Management Plan for information on these processes. A waiver has been issued by the AERB for use of these tools. These tools are hosted in the VA Dedicated Cloud at Terremark, and the MAE falls under SDE control, with DJ Kachman as the CIO.

JIRA is used to track changes to the products, and Stash/Git is used to manage the source code.

Tool	Used For	URL direct to this build / version
JIRA	Tracking bugs, enhancements, user stories, and tasks	VA: Mobile Kidney App Internal JIRA: [REDACTED]
Stash / Git	Used for managing source code and readme files for developers	Browse: [REDACTED] Clone: [REDACTED]
Jenkins	Building the deployment packages	[REDACTED] v [REDACTED]
Wiki	For storing documents - give the location of the files relevant for this release	VA: MobileKidney App Internal Wiki: [REDACTED]

The latest build instructions are available using the MobileKidney-Web view using the Jenkins link provided above.

The list of files included in this release can be retrieved from the Release-1.0.0 tag using the Stash link provided above.

Issues Included in this Release

No known issues have been identified in this release.

Release Inventory

If applicable, this section provides the inventory of material that is being released. This is required whenever the deliverable is component of a larger deliverable or a deliverable that contains multiple dependencies being documented within one VDD. Describe the method of delivery. Include where and to whom the deliverable was released.

Release Component	Description	Method of Delivery	Recipient	Location (Name of server deployed to)
Health Tracker Services 1.1.0	Health Tracker Services (HTS) is a resource that supports the tracking of self-entered healthcare information for patients	Digital		██████████████████ ██████████████████ ██████████
Notification Services 2.1.0	Notification Service provides back end support for setting Patient Preferences, creating Reminders and Notifications (In-App and Email)	Digital		██████████████████ ██████████████████ ██████████

Electronic Media Released

This section references and lists electronic media if it is applicable to the product.

- All electronic media is made available via links and attachments from the [MobileKidney 1.0 Required Artifacts](#) page.

Physical Media Released

Not applicable for VAMF deliverables.

Associated Supporting Documentation

This section is used to list all supporting documentation and is optional if a wiki space is defined above.

Document Name	Revision	Date	Link to Document if online
See above for reference to the Wiki location for the source			

Certification

When this document is approved, the following field will be filled in by the person approving. The document history can be checked to show who actually entered the information on this page.
