

INSTRUCTIONS FOR COMPLETION OF THE  
**ACORP APPENDIX 1 – ADDITIONAL LOCAL INFORMATION**  
**(ACORP APP. 1 INSTRUCTIONS)**

VERSION 4

This appendix is provided for use by the local IACUC, at its discretion, to collect any additional information that it requires. The PI may use the ACORP Appendix 1 template provided in the RAMS application by using the link available in question 9 of section M.

**Header for Every Page:** The header information for this appendix is pre-populated to match header for the Main Body of the ACORP to which it applies, to identify each page of this Appendix with that ACORP:

PI's last name: The PI's name is prepopulated

Protocol No. Assigned by the IACUC – This is a unique identifier for each protocol that is automatically generated by the system to the protocol as a whole

Official Date of Approval – This is the date of final and unequivocal approval by the IACUC, as defined in the PHS Assurance, which determines the due dates of the first annual continuing review and the triennial *de novo* review, as applicable. The IACUC committee will enter this date into the form when a decision is made.

The IACUC may provide instructions here for completion of this Appendix. Please consult with the IACUC for additional information.
