Bathing/Showering/Toileting

[↑ TOP](#)

Bathing/Showering/Toileting PRODUCT/MANUFACTURER	DESCRIPTION	KEY ADVANTAGE
Andermac/Anderlift Lift and Transport System anderlift.com	When lifted, transported, weighed or bathed, the patient is resting on a "hammock" created by a custom sheet and nestled in the frame.	Four pieces of equipment in one - a bather, bed scale, transportation system and power patient lift. Up to 800 lb. capacity
Arjo/Huntleigh / Alenti arjohuntleigh.com	Bathing transport and transfer for semi-dependent residents.	Part of an integrated bathing system.
Arjo/Huntleigh / Bolero arjohuntleigh.com	Battery-powered lift bath trolley. Handset controlled height-adjustment.	Straight steering device for corridors.
Arjo/Huntleigh / Calypso arjohuntleigh.com	Bathing and showering lift for semi-dependent residents.	Can also be used for toileting.
Arjo/Huntleigh / Calypso PUR arjohuntleigh.com	Bathing and showering lift for semi-dependent residents.	Seat is easy to clean and disinfect.
Arjo/Huntleigh / Century Bath arjohuntleigh.com	Key-hole shaped sit-bath with therapy options including Hydromassage and Hydrosound.	Auto-fill option.
Arjo/Huntleigh / Freedom Bath arjohuntleigh.com	Side-entry roll door for access. Appropriate in both independent and assisted environments.	Integrated contoured seat.
Arjo/Huntleigh / Miranti arjohuntleigh.com	Bath trolley lift with power drive, powered height adjustment and powered backrest.	Handset operation of all functions.
Arjo/Huntleigh / Parker Bath arjohuntleigh.com	Assisted bathing solution with side entry, variable speed air-spa, & soap dispenser.	Wall-mounted cleaner/disinfection system.
Arjo/Huntleigh / Primo arjohuntleigh.com	Straight-edged bath solution available in shorter version for more mobilized residents and longer for dependent residents.	Height-adjustable.
Arjo/Huntleigh / Rhapsody arjohuntleigh.com	Keyhole-shaped bath solution available in shorter version for more mobilized residents and longer for dependent residents.	Height-adjustable.
Horcher Lifting Systems/Forelli Shower Trolley horcher.com	Shower trolley with side panels that raise and lower electronically.	Foot controls on both sides of the chassis.
Horcher Lifting Systems/Lena Bathtub horcher.com	Patient-care lifting bathtub	Accepts lifts along the entire tub length; temperature presets.
Horcher Lifting Systems/Mona Bath Stretcher Lift horcher.com	Stretcher allows single caregiver to move patient from bed to bath.	350 lb. capacity; Digital scale optional.
Horcher Lifting Systems/Nina Bath Seat Lift horcher.com	Bath lift with swivel seat for transfers between bed, bath, shower and toilet or as mode of transport.	Height adjusted via hand controls.
Horcher Lifting Systems/Swing	Sitting/lying bathtub	Side entry; electric lowering and

horcher.com		tilting.
Mangar USA / Archimedes mangarusa.com	Battery operated bath lift. Lifts a person weighing up to 330 lbs.	Lightweight, portable, comes apart for travel.
Mangar USA / Bathing Cushion mangarusa.com	Inflatable bath cushion for people with reasonable upper body stability but who need assistance getting in and out of a bathtub.	Very light, cleans easily with commercial bathroom cleaner.
Polaris Medical / Novum 1000 Patient lift patientbathing.com	Bathing transport and transfer for semi-dependent residents. 440 lbs	Integrates with existing bathing systems. High weight capacity.
Polaris Medical / Novum 2000 Lift bath trolley patientbathing.com	Battery-powered lift bath trolley. Handset controlled height-adjustment. 440lbs	Integrates with existing bathing systems. High weight capacity 440 lbs.
Polaris Medical / Hektor Patient lift patientbathing.com	Bathing transport and transfer for semi-dependent residents. 330 lbs	Can integrate into most bath systems. Provides comfort with modern looks.
Polaris Medical / Ikarus Lift bath trolley patientbathing.com	Battery-powered lift bath trolley. Handset controlled height-adjustment.	Comfortable PU foam top comfortable for residents
Polaris Medical / GK Magic Recumbent bathing system patientbathing.com	Height adjustable bathing system with varying options. Key hole shaped.	Specialized pipeless jets, ultrasonic cleaning and air spa. Mandatory disinfection systems
Polaris Medical / GK Basic+ Recumbent bathing system patientbathing.com	Height adjustable bathing system with varying options. Simplified easy to use layout.	Specialized pipeless jets, cleaning and air spa.
Polaris Medical / GK Magic Recumbent bathing system patientbathing.com	Specialized stainless steel full bath designed for burn units.	Specialized for burn units
Polaris Medical / GK Relax Raise and Tilt bathing system patientbathing.com	Tilt and Recline bathing system, height adjustable.	Integrates with existing floor lifts and ceiling lifts
Polaris Medical / GK Hera Sit in bathing system patientbathing.com	Side door bathing solution which is lift accessible.	Integrated liquids dispensing, mandatory disinfection. Pipeless jets, ultrasonic cleaning
Polaris Medical / GK Dayton Sit in bathing system patientbathing.com	Key whole shape is lift accessible with deep immersion.	Specialized pipeless jets, cleaning and air spa..
Polaris Medical / GK Primus Showerer Trolley patientbathing.com	Shower trolley used for shallow baths and also for debridement in ER's.	High weight capacity. Hydraulic or battery operated. Adjustable back rests. Straight steering and central locking brakes
T.H.E. Medical/Aquarius Recumbent Tub themedical.com	Extra wide tub with whirlpool and air spa options. 100% effective infection control system.	Touchpad control panel.
T.H.E. Medical/Atlantic Pre-Filling Side Entry Reclining Bathing System themedical.com	Low water volume free-standing tub. 12-jet air spa system.	One touch recline feature.
T.H.E. Medical/TR 900 Bathing System	Height-adjustable bathtub with keyhole shaped tub for more width at	Can be equipped with a built-in cleaning and a whirlpool system.

themedical.com	the head end.	
T.H.E. Medical/TR 1700 Bathing System themedical.com	Height-adjustable bathtub with thermostatic mixer for bathtub filling and shower.	For bathrooms with limited space.
T.H.E. Medical/TR 2000 Hydraulic Shower Trolley themedical.com	Side-mounted column to allow stretcher to overlap bed surface further.	Side rails can be folded inward when passing through narrow doors. 330 lb. capacity.
T.H.E. Medical/TR 3000 Electric Shower Trolley themedical.com	Battery operated shower trolley with side-mounted column to allow stretcher to overlap bed surface further.	Side rails can be folded inward when passing through narrow doors. 330 lb. capacity.
T.H.E. Medical/Winnipeg Side Entry Tub themedical.com	Free-standing wall tub with low threshold door for entry with or without a transfer device.	Contoured interior for comfort.

Bed Systems

(Frames/Surfaces/Assist Devices/Supine Transport—Manual and Powered)

Bed Systems PRODUCT/MANUFACTURER	DESCRIPTION	KEY ADVANTAGE
BEDS		
ArjoHuntleigh/Enterprise Range arjohuntleigh.com	Hospital bed range. Profiling system for pressure and shear reduction.	Low height of 12". 550 lb. capacity. Many options available.
ArjoHuntleigh/Contoura® Range arjohuntleigh.com	Four-section electric profiling hospital bed.	Electronically operated backrest, knee-break and height adjustment. Many models available.
ArjoHuntleigh/Minuet® 2 Range arjohuntleigh.com	Long term care bed with fully electric operation of the bed.	Aids individual independence and reduces moving and handling risks to the caregiver. 450 lb. capacity.
Carroll Hospital Group/Spirit Select™ carrollhospitalgroup.com	Acute care low bed. Includes bed exit alarm and weight monitoring.	10" low height, 35 ¼" raised height. 500 lb. capacity.
Carroll Hospital Group/Spirit Select™ carrollhospitalgroup.com	Acute care low bed. Includes bed exit alarm and weight monitoring.	10" low height, 35 ¼" raised height. 500 lb. capacity.
Guldmann/BedLift guldmann.net	Can be used with a regular bed when there is need for electric height adjustment.	Can use in non-hospital bed.
Guldmann/Insertion Bed guldmann.net	Can be used in an ordinary bed with motors for operation of back, thigh, and leg sections as well as for height adjustment.	Can use in non-hospital bed.
Guldmann/Care Bed guldmann.net	Care bed with 2-4 motors with detachable wooden head/foot boards.	Bed is prepared for steel bed guards.
Guldmann/Care Bed guldmann.net	Care bed with 2-4 motors with fixed wooden head/food boards.	Wooden bed guards.
Hill-Rom/Advantra™ 2 hill-rom.com	Med/surg bed with alerts to help prevent patient falls.	Bedside controls, less patient repositioning.
Hill-Rom/CareAssist® ES hill-rom.com	Med/surg bed with Intellidrive® power transport feature.	One button Dining Chair® feature.
Hill-Rom/TotalCare® Bariatric Plus hill-rom.com	Converts from bed to full chair position to avoid numerous patient transfer and repositioning tasks.	Optional Low Air Loss Pressure Redistribution Surface.
Hill-Rom/TotalCare® Connect hill-rom.com	ICU bed with continuous rotation therapy and head of bed alarm.	Microclimate surface for wound healing and to promote healthy skin.
Hill-Rom/VersaCare® hill-rom.com	Low profile med/surg bed.	Boost feature to assist repositioning patient in bed. Many mattress options available.
Hill-Rom/VersaCare® TC hill-rom.com	Bed system for step down and transitional care.	Intellidrive® power transport.
Stryker/Electric Bed stryker.com	Med/surg bed with low bed height and full coverage side rails.	Retractable fifth-wheel mobility. Manual model also available.

Bed Systems PRODUCT/MANUFACTURER	DESCRIPTION	KEY ADVANTAGE
Stryker/GoBed II stryker.com	Med/surg bed with low bed height and full coverage side rails.	Retractable fifth-wheel mobility.
Stryker/S3 stryker.com	Med/surg bed that monitors the patient's position in three zones and has 30 degree head of bed angle.	One-hand operation of side rails, center-mounted brake, one-touch in-bed scale.
Transfer Master/Hi-Lo Bed transfermaster.com	Bed with transfer height as low as 14". Available in twin, full and queen size.	Has the capacity to sit someone to almost 90 degrees.
MATTRESS REPLACEMENT/OVERLAYS		
ArjoHuntleigh/Acer arjohuntleigh.com	Portable mattress replacement system.	For patients at risk from complications of immobility associated with acute respiratory failure.
ArjoHuntleigh/Alpha Response arjohuntleigh.com	Semi-automatic pressure redistribution system.	Can be used from general ward and acute care to private or nursing home care.
ArjoHuntleigh/Alpha Trancell Deluxe arjohuntleigh.com	Alternating pressure redistribution.	Prevention of pressure ulcers and management of superficial tissue damage.
ArjoHuntleigh/AlphaX cell® arjohuntleigh.com	Active pressure redistributing mattress overlay.	For patients at medium risk for pressure sore development, or existing pressure sores up to and including stage 2.
ArjoHuntleigh/AlphaX cell® Double Bed System arjohuntleigh.com	Active pressure redistributing mattress overlay.	For couples who want to share a bed when one partner has a requirement for a pressure redistributing support surface.
ArjoHuntleigh/Auto Logic 110 arjohuntleigh.com	Fully automatic pressure redistributing mattress.	Alternating and constant low pressure modes.
ArjoHuntleigh/Auto Logic 200 arjohuntleigh.com	Automatic self setting mattress/cushion combination. Alternating pressure redistribution.	Constant low pressure mode for patients unable to tolerate a moving surface.
ArjoHuntleigh/Bari Breeze arjohuntleigh.com	Low air loss, turn assist, mattress replacement system.	1,000 lb. capacity.
ArjoHuntleigh/Breeze arjohuntleigh.com	Low air loss mattress replacement system.	Portable. For hospital or community use.
ArjoHuntleigh/ConformX® arjohuntleigh.com	Mattress replacement system with low interface pressures.	Suitable for radiographic use.
ArjoHuntleigh/DFS3 arjohuntleigh.com	Dynamic flotation system.	Automatically adjusts to the weight, size and position of the patient.
ArjoHuntleigh/Pentaflex® arjohuntleigh.com	Foam-based support system with internal air channels.	Support zones varied to anatomical distribution
ArjoHuntleigh/Trinova arjohuntleigh.com	Three cell cycle for optimum low pressure. Simulates normal body movement.	Integrated seating system and an assessment mode for step down.
Hill-Rom/Acucair® hill-rom.com	Continuous air flow therapy surface.	The surface provides continuous low pressure regardless of head elevation, position changes or punctures.

Bed Systems PRODUCT/MANUFACTURER	DESCRIPTION	KEY ADVANTAGE
Hill-Rom/Clinitron® II Air Fluidized Therapy hill-rom.com	Support surface to promote wound/skin disorder healing.	Can be defluidized to facilitate patient positioning during pulmonary care and Trendelenburg and Reverse Trendelenburg. CPR procedures can be performed immediately and without a cardiac board.
Hill-Rom/Clinitron® Rite Hite® Air Fluidized Therapy hill-rom.com	Support surface combining air fluidized therapy and low air loss therapy.	Can be used with patients whose regimen requires head elevation.
Hill-Rom/Envision® E700 hill-rom.com	Rental therapy mattress replacement for VersaCare® and TotalCare® Connect Beds	Addresses pressure ulcer healing issues: pressure, shear, friction, patient immobility and microclimate management.
Hill-Rom/Flexi Care® Eclipse hill-rom.com	5-zoned low air loss mattress.	300 lb. capacity. Moisture vapor permeable sleep surface.
Hill-Rom/Synergy® Air Elite hill-rom.com	Low air loss therapy surface.	Individual air cushions connected to side panel with CPC connector for easy detachment and cleaning.
Hill-Rom/TotalCare Spo ₂ rt® Surface hill-rom.com	Critical care support surface with Intelidrive® for transport.	Full chair and stand assist with chair egress as well as one button boost function.
Hill-Rom/VersaCare A.I.R.™ hill-rom.com	3 independent zones of continuous low pressure.	Turn assist allows single caregiver to perform patient examinations, linen changes, and other routine tasks.
Hill-Rom/V-Cue® Dynamic Air Therapy® hill-rom.com	Low air loss surface and pressure relief mattress.	Adjustable pressure relief mattress allows the unit to be transferred from ICU to Med-Surg frame without removing the patient from the surface.
Span America/PressureGuard® APM2 Safety Supreme™ spanamerica.com	Multi-mode air therapy with raised safety perimeter.	Switch from alternating pressure to lateral rotation or powered flotation.
Stryker/Epic II stryker.com	Critical care bed that includes integrated scale and bed exit monitoring system.	Accepts independent support surfaces.
Stryker/InTouch stryker.com	Critical care bed with many customizable features including touch screen interface to patient metrics, protocol reminders, turn schedules, etc.	Accepts independent support surfaces.
STRETCHERS		
Andermac/Anderlift Lift and Transport System anderlift.com	When lifted, transported, weighed or bathed, the patient is resting on a "hammock" created by a custom sheet and nestled in the frame.	Four pieces of equipment in one - a bather, bed scale, transportation system and power patient lift. Up to 800 lb. capacity.

Bed Systems PRODUCT/MANUFACTURER	DESCRIPTION	KEY ADVANTAGE
Hill-Rom/Electric Stretcher hill-rom.com	Powered stretcher with optional active hand brake and IV pole transport device.	Side-rail controls allow patients to electrically adjust the stretcher for their own comfort.
Hill-Rom/Procedural Stretcher hill-rom.com	For use in ER, OR, PACU or outpatient settings.	Optional active hand brake and IV pole transport device.
Hill-Rom/Surgical Stretcher hill-rom.com	For use in hospital or ambulatory surgery settings with integrated IV pole transport device.	Articulating head section and wrist rests.
Hill-Rom/Transport Stretcher hill-rom.com	Stretcher with a variety of mattress options depending upon the setting.	700 lb. capacity.
Hill-Rom/Trauma Stretcher hill-rom.com	Stretcher appropriate for use in trauma and emergency.	Optional active hand brake. Integrated IV pole transport device option.
Stryker/Prime Stretcher stryker.com	Powered transport stretcher. Choice of available surfaces depending upon area of use.	Patients can adjust their own positions without calling a caregiver for assistance. 700 lb. capacity.
Wy'East Medical/Totalift-II wyeastmed.com	Chair that converts to stretcher/procedure/transport table.	400 lb. capacity.
FALL MONITORS		
Carroll Hospital Group/Spirit Select™ carrollhospitalgroup.com	Acute care low bed. Includes bed exit alarm and weight monitoring.	10" low height, 35 ¼" raised height. 500 lb. capacity.
Stanley Healthcare Solutions/BedCheck stanleyhealthcare.com	Fall prevention/alarm system with control unit and mat.	Selectable alarm sounds can be used for high risk patients.
Stryker/Epic II stryker.com	Critical care bed that includes integrated scale and bed exit monitoring system.	Accepts independent support surfaces.

Car Lifts/Vehicle Extraction

[↑ TOP](#)

Car Lifts/Vehicle Extraction PRODUCT/MANUFACTURER	DESCRIPTION	KEY ADVANTAGE
Access Unlimited / Multi-Lift accessunlimited.com	Lift works by a 12 volt motor with the power from the electrical system of your car to perform transfers (car, bath, home). Available in a wide variety of slings.	Fits every care on the market including minivan, truck, SUV or RV.
ArjoHuntleigh/Maxi Lite arjohuntleigh.com	Battery-powered floor-based lift for general lifts and transfers including chair to car.	350 lb. capacity.
EZ Way/EZ Out Vehicle Extraction Lift ezlifts.com	Accommodates various wheel well configurations; movable mast for variety of vehicle door styles; single hand control; 500 lb. capacity.	Telescoping mast for tall trucks or short cars.
Braun Corporation / Van Entry Systems braunability.com	Designed for full-size and minivans for level transfers from wheelchair or scooter to seat.	Rotation of the seat up to 140 degrees.
Liko North America/Golvo liko.com/na	Flexible lifting strap is extended into a vehicle to facilitate transfer.	Permits transfers such as supine from rear seat; accommodates SUVs and higher-than-normal vehicles.
Medcare Products/Car Extractor medcarelifts.com	Floor-based lift with boom for car transfers. 30" reach and 40" lifting range.	475 lb. capacity.
Technimotion / Proxi-Motion™ technimotion.com	Floor-based lift. No log-rolling required with Smart Insertion™ slings. Performs car transfers. Battery operated. Tabletop attachments allows lift to function as overbed table when not in use.	400 lb. weight capacity. Strap adjustment system.
T.H.E. Medical/Vehicle Extractor themedical.com	For patient transfers to and from vehicles.	500 lb. capacity.

Ceiling Lifts

[↑ TOP](#)

Ceiling Lifts PRODUCT/MANUFACTURER	DESCRIPTION	KEY ADVANTAGE
ArjoHuntleigh/Maxi Sky 440 arjohuntleigh.com	Lifts up to 440 lbs. Allows “swing” transfer of life cassette and patient from one track to another.	Portable.
ArjoHuntleigh/Maxi Sky 6000 arjohuntleigh.com	Ceiling lift, lifts up to 600 lbs. Soft start and stop motor control.	Emergency stop and lower devices.
ArjoHuntleigh/Maxi Sky 1000 arjohuntleigh.com	Allows a single caregiver to perform transfers of bariatric residents under handset control without stress or strain and with no manual lifting.	Can be mounted on semi-permanent gantry or permanently mounted in the ceiling. 1,000 lb. capacity.
BHM Medical/V3 bhm-medical.com	Portable ceiling lift motor.	440 lb. capacity
BHM Medical/V4 bhm-medical.com	Fixed ceiling lift. Has return to charge feature.	440 or 600 lb. capacities available.
BHM Medical/V10 bhm-medical.com	Fixed ceiling lift. Has return to charge feature.	Lifting capacity of 1,000 lbs.
BHM Medical/Voyager Duo bhm-medical.com	Fixed ceiling lift.	Lifting capacity of 220/440 lbs.
BHM Medical/Voyager Portable bhm-medical.com	Portable ceiling lift motor. Reacher allows disengagement of the strap for easy suspension and removal.	440 lb. capacity
EZ Way, Inc./EZ Ceiling Lift ezlifts.com	Fixed motor ceiling lift. Weight capacities ranging from 650 to 1,000 lbs.	Curtain track pass-through feature; many track configurations available.
EZ Way, Inc./EZ Portable Ceiling Lift ezlifts.com	Portable motor ceiling lift.	450 lb. capacity.
Guldmann/GH2 Ceiling Hoist System guldmann.net	System is available as small, free-standing, self-sustaining and removable unit or as wall- or ceiling-mounted system.	Available with many motor options and customizable ceiling track configurations. Capacities from 200 to 1,000 lbs.
Guldmann/GH3 Ceiling Hoist System guldmann.net	Modular system that can be mounted on ceiling, wall or support pillars. System is available as small, free-standing, self-sustaining and removable unit or as wall- or ceiling-mounted system.	Available with many motor options and customizable ceiling track configurations. Capacities from 200 to 1,100 lbs.
Horcher Lifting Systems/UniLift horcher.com	Available in 350 and 500 lb. capacities. Patients with sufficient upper body strength may operate lift independently.	Can use one lift in a variety of locations and an unlimited number of track configurations
Liko North America/Free Span liko.com/na	Gantry system that can be moved from room to room.	880 lb. capacity.

Ceiling Lifts PRODUCT/MANUFACTURER	DESCRIPTION	KEY ADVANTAGE
Liko North America/Likorall liko.com/na	Single motor lifts up to 507 lbs., dual motor version lifts 1,014 lbs.	Self -braking motor. Lift stops automatically if power is interrupted. Available in single- or multi-track and room-to-room.
Liko North America/Multirall liko.com/na	Portable/reversible with quick-release hook system.	Self -braking motor. Lift stops automatically if power is interrupted. Available in single- or multi-track and room-to-room.
Medcare Products/Medcare Lift medcarelifts.com	Single motor/single track ceiling lift system.	450 or 625 lb. capacity.
Medcare Products/Portable Lift medcarelifts.com	Ceiling lift motor that can be moved from room to room.	425 lb. capacity.
Medcare Products/Bariatric Lift medcarelifts.com	Ceiling lift with heavy duty motor to accommodate bariatric patients.	1,000 lb. capacity.
Molift/Nomad moliftinc.com	Portable ceiling lift.	4-point suspension integrated into lifting motor; integrated handles; climbs from room-to-room. Emergency stop and lowering.
Polaris Medical / Wispa Lite polarismedicalinc.com	Compact and light portable ceiling lift . Room to room option (under door header) available	440 lb. capacity.
Polaris Medical / Wispa Lift polarismedicalinc.com	Fixed ceiling lift can be equipped with tracking and gates.	440 or 600 lb. capacity.
Polaris Medical / Wispa Bariatric polarismedicalinc.com	Fixed or temporary set up.	1000 lb capacity
RoMedic/Reda romedic.com	Ceiling list design that can be used with permanent or portable motor applications.	Wide lifting range, 505 lb. capacity.
RoMedic/Rise 450M romedic.com	Ceiling track hoist. Ca be used on a single track with or without curves and switches or a traverse/gantry system.	450 lb. capacity. Battery charge life display. Emergency stop function and emergency lowering. Automatic switch off after 2 min. when not in use.
RoMedic/Rise625T romedic.com	Built in traverse motor for powered travel along the track. Can be a single track, with or without curves and switches, or a traverse/gantry system.	625 lb. capacity. Battery charge life display. Emergency stop function and emergency lowering. Automatic switch off after 2 min. when not in use.
RoMedic/RisePorto romedic.com	Ceiling lift motor that can be moved from room to room.	Portable. 440 lb. capacity.
Surehands/Freedom Bridge handimove.com	Free-standing rail system on which you can mount a permanent or portable motor.	When rail attachment to ceiling or wall is not possible.
Surehands/2000 Series handimove.com	Portable ceiling lift system that can be configured for various applications.	Available in single room or room-to-room models.

Ceiling Lifts PRODUCT/MANUFACTURER	DESCRIPTION	KEY ADVANTAGE
Surehands/HM2500 handimove.com	Permanent ceiling lift system that can be configured for various applications.	Manual, electric or infra red wireless controls available. 440 lb. capacity.
Surehands/Wall-to-Wall™ handimove.com	Patient lift that can be mounted on the wall in situations where a ceiling installation is not possible.	320 lb. capacity
T.H.E. Medical/Cirrus themedical.com	Manual or power traverse options. Curtain track solution available. 6-pt spreader bar.	600 lb. and 750 lb. capacities available. Available with infection control strap.
T.H.E. Medical/Stratus Portable themedical.com	6-pt sling attachment system with auto-leveling side bars.	Capacities to 750 lbs. Infection control strap. Portable.
T.H.E. Medical/Pinnacle themedical.com	High-output lifting motor with oversize spreader bars.	Extra long, extra wide lifting strap. Capacities to 1,000 lbs.
Waverley Glen/Griffin Lift waverleyglen.com	Lightweight and portable with pneumatic hand control.	425 lb. capacity. Infra red control optional
Waverley Glen/P-440 Portable Lift waverleyglen.com	Lightweight and portable.	440 lb. capacity.
Waverley Glen/Transportable Lift waverleyglen.com	Charger included in base price.	440 lb. capacity.

Chairs: Dependency/Geri/Specialty/Wheelchairs (Seated Transport)

Chairs/Seated Transport PRODUCT/MANUFACTURER	DESCRIPTION	KEY ADVANTAGE
21st Centrun Scientific/H-Frame Boulder Wheelchair 21stcenturyscientific.com	Power chair provides transport for the user in rain or snow without slipping.	H-frame uses 2.5" by 1.5" by .125" wall steel-TIG welded for superior strength.
ArjoHuntleigh/Aura Seating System arjohuntleigh.com	Seating cushions with pressure redistributing alternating cell systems for standard hospital and home chairs.	Standard support surface or battery-powered options available.
ArjoHuntleigh/TotaLift II Transfer Chair arjohuntleigh.com	Can be used to transfer patient laterally from bed to stretcher, then transport them in sitting or reclining position.	400 lb. capacity. Avoids caregiver having to lift the patient at all.
ArjoHuntleigh/TC-300 Treatment Chair arjohuntleigh.com	23-37" high treatment/transport chair. Foot pedal operation, one-step Trendelenburg.	400 lb. capacity. Accessories for various procedures available.
Hill-Rom/Barton® I-440 Transfer Chair hill-rom.com	Converts from a flat transfer chair to an upright mobile chair. Adjustable head, foot and arm rest.	400 lb. capacity. Positioning and transfer system option.
Hill-Rom Art-of-Care® Recliners hill-rom.com	A variety of models available.	Positioning handles, locking casters, accessory hooks, optional removable arm, tray table and accessory brackets are available.
Horcher Lifting Systems/CosyChair horcher.com	Chair that can be used in many settings with gas strut-operated back and footrest.	Lambs wool cover on seat and footrest.
Cambridge Technologies/ Care Chair camtecproducts.com	Converts from chair to stretcher laterally and eliminates patient transfers.	Sitting on the head end will not tip. Available in regular and bariatric models.
Medcor/Care Cliner medcor.net	Used in dialysis, blood collection, geriatric care, oncology, respiratory, critical care and cardiac rehab.	Pressurized gas cylinder helps elevate back from deep recline position. Arms adjust for lateral transfers.
Invacare/Clinical Recliner invacare.com	Provides patient seating. Used in patient procedures such as dialysis, blood collection, day surgery, EEG/EKG care, oncology, outpatient clinic, E.R., room and maternity.	Varied density foam cradles the patient to sustain proper positioning and posture.
Invacare/HTR Tilt and Recline Chair invacare.com	Provides transport and a range of angles in tilt adjustment, which allows the user to redistribute body weight as needed.	Fold down back provides easy access to personal grooming and transfers.
PHS West / Ergo-Express PTC1		

Chairs/Seated Transport PRODUCT/MANUFACTURER	DESCRIPTION	KEY ADVANTAGE
phswest.com		
SMT Health Systems/Rock-King smthealthsystems.com	A wheelchair that allows the user to rock back while seated with dual positions.	Dual position rocker lock and rocking mechanism.
Stryker/Stretcher Chair stryker.com	Used to move patients from a prone position to a seated one.	Ergonomic seat tilt allows a recliner position, 24" wide and 74" length patient surface.
Wy'East Medical/TotaLift-II weastmed.com	Chair that converts to stretcher/procedure/transport table.	400 lb. capacity.

Floor-Based Lifts

[↑ TOP](#)

Floor-Based Lifts PRODUCT/MANUFACTURER	DESCRIPTION	KEY ADVANTAGE
Andermac/Anderlift Lift and Transport System anderlift.com	When lifted, transported, weighed or bathed, the patient is resting on a "hammock" created by a custom sheet and nestled in the frame.	Four pieces of equipment in one - a bather, bed scale, transportation system and power patient lift. Up to 800 lb. capacity
ArjoHuntleigh/Maxi 500 arjohuntleigh.com	Battery-powered floor-based lift.	500 lb. capacity. Can lift patient from the floor.
ArjoHuntleigh/Maxi Lite arjohuntleigh.com	Battery-powered floor-based lift for general lifts and transfers including chair to car..	350 lb. capacity.
ArjoHuntleigh/Maxi Move arjohuntleigh.com	Battery-powered floor-based lift.	Built-in scale. 500 lb. capacity.
ArjoHuntleigh/Maxi Twin arjohuntleigh.com	Dynamic Positioning System (DPS) which can lift the patient from the floor without having to lift the patients head or back to attach the sling and a soft stretcher which is able to lift patients from the floor in the supine position.	375 lb. capacity. Allows rotation of patient 360 degrees with dual masts.
BHM Medical/Ergolift II bhm-medical.com	Floor-based lift.	400 lb. capacity
BHM Medical/Ergolift 600 bhm-medical.com	Floor-based lift for bariatric patients.	600 lb. capacity. Base expands for use with wider bariatric chairs.
EZ Way, Inc./EZ Light Lift ezlifts.com	Portable floor based lift that can be folded for easy storage or transport.	300 lb. capacity.
EZ Way, Inc./EZ Way Bariatric Patient Lift ezlifts.com	Floor-based lift for bariatric patients.	1,000 lb. capacity
EZ Way, Inc./Smart Lift ezlifts.com	Floor lift with many features for improved safety.	500 and 600 lb. capacities.
Guldmann/GL2 guldmann.net	Mobile lifter (electric). with manual width adjustment.	Maximum load 330 lbs.
Guldmann/GL3 guldmann.net	Mobile lifter with both electric width adjustment and lifting function.	Maximum load 330 lbs.
Guldmann/GL4 guldmann.net	Mobile lifter with electric parallel width adjustment and electric lifting function.	Maximum load 330 lbs.
Guldmann/GLHD guldmann.net	Mobile lifter available with electric width adjustment.	Maximum load 440 lbs.
Horcher Lifting Systems/Diana horcher.com	Electric floor based lift for patients with limited mobility.	440 lb. capacity.

Floor-Based Lifts PRODUCT/MANUFACTURER	DESCRIPTION	KEY ADVANTAGE
Horcher Lifting Systems/Lexa horcher.com	Floor based lift that can take up patients sitting, lying, or from the floor and move them to a sitting or lying position for transport to toilet, wheelchair or bed.	Sway-free transport.
Invacare/Reliant Lifts invacare.com	Floor-based lift for patient/resident transfers. Many models available.	300 to 600 lb. capacity.
Liko North America/Golvo liko.com/na	Floor-based lift that can be used to lift a patient from the floor, do a lateral transfer, or outfitted for ambulation training.	440 lb. capacity.
Liko North America/Uno 100/102 liko.com/na	Floor-based lift residential and home-care settings.	385/440 lb. capacity.
Liko North America/Uno 200 liko.com/na	With the different settings on the lift mast and the actuator, Uno 200 can be used for lifting from the floor as well as to high beds or gurneys.	440 lb. capacity.
Liko North America/Viking L liko.com/na	Floor-based lift for common lifting needs.	550 lb. capacity. Can be outfitted with arm rests for gait training.
Liko North America/Viking M liko.com/na	Floor-based lift for common lifting needs. Weighs only 77 lbs.	450 lb. capacity. Can be outfitted with arm rests for gait training.
Liko North America/Viking 2 liko.com/na	Floor-based lift for transfers between bed and wheelchair, to and from the toilet and bathtub or for lifting someone who has fallen to the floor. Weighs only 55 lbs.	350 lb. capacity.
Liko North America/Viking X2 liko.com/na	Floor-based lift. Narrow frame for use where doorways are narrow or space is limited.	350 lb. capacity.
Mangar USA/Camel mangarusa.com	A battery operated pneumatic lifting cushion. Lifts a patient weighing up to 700 lbs. from the floor. With back rest.	Compact, lightweight, can be used in tight spaces, such as closet or bathroom; may be used outdoors.
Mangar USA/Elk mangarusa.com	A battery operated pneumatic lifting cushion. Lifts a patient weighing up to 1,000 lbs. from the floor. Without back rest.	Compact, lightweight, can be used in tight spaces such as closet or bathroom; may be used outdoors.
McAuley Medical/SuperLIFT mcauleymedical.com	Device for transferring or transporting a patient in the supine position. Powered lift and base expansion/contraction feature.	Lifts up to 500 lbs.
Medcare Products/Medcare Lift	Transfers patients of up to 475	Expandable base design

Floor-Based Lifts		
PRODUCT/MANUFACTURER	DESCRIPTION	KEY ADVANTAGE
medcarelifts.com	lbs.	
Medcare Products/Care Bår Lift medcarelifts.com	Floor based lift for bariatric patients.	Lifts up to 600 lbs.
Medline/Electric Elevating Lift medline.com	Battery-operated lifts used to transfer patients up to 600 lbs. 6-point cradles, broad lifting ranges. Sling made of soft, easy-to-clean, long-lasting polyester material.	Low-profile base legs; 6-point sling cradles.
Molift/Partner 205 moliftinc.com	Battery operated, lifting capacity of 450 lbs., 4-point suspension, 70" lifting capability from the bottom of the suspension that lifts from floor, bed, or sitting. Stretcher, Scale & Supporting Arms available as accessories.	Automatic service warning (counts lifts and alerts user when it is due for service), emergency stop, electronic & manual lowering standard on all lifts.
Molift/Partner 255 moliftinc.com	Battery operated, lifting capacity up for 505 lbs. (230) and 560 lbs. (255) with 4-point suspension, vertical lifting column, lifts from floor, bed, or sitting. Works with Stretcher, Scale & Supporting Arms available as accessories.	Automatic service warning (counts lifts and alerts user when it is due for service), emergency stop, electronic & manual lowering standard on all lifts.
Polaris Medical / Fionia home lift polarismedicalinc.com	Battery-operated lifts used to transfer patients in home setting Only 21" wide to fit through most doorways	Battery pack is interchangeable. Weight capacity 209 lbs
Polaris Medical / Mobile Floor Lifts polarismedicalinc.com	Range of lifts from 365lbs, 440lbs and 550lbs. Power opening base very wide stance with long arm length options for extended reach.	Varying weight capacities for specific needs. Can be supplied with wall or on board charging.
Polaris Medical / Selandia Bariatric polarismedicalinc.com	Battery operated, lifting capacity of 660 lbs., 3-point suspension, Lifting capability from floor, bed, or sitting. Stretcher, Scale available as accessory	Heavy duty lift but quite easy to move around.
RoMedic/Carina 350 romedic.com	Collapsible for transport or storage, portable floor-based lift with either electric or manual base-widening.	350 lb. capacity.
RoMedic/Eva400 romedic.com	Mobile patient hoist to lift from a seated or prone position. Can be used for gait training.	Lightweight aluminum. Adjustable mast and base. 400 lb. capacity.
RoMedic/Eva450 romedic.com	Mobile patient hoist to lift from a seated or prone position. Can be used for gait training.	Lightweight aluminum. Adjustable mast and base. 450 lb. capacity.
RoMedic/Eva600	Mobile patient hoist to lift from a	Lightweight aluminum.

Floor-Based Lifts		
PRODUCT/MANUFACTURER	DESCRIPTION	KEY ADVANTAGE
romedic.com	seated or prone position. Can be used for gait training.	Adjustable mast and base. 600 lb. capacity.
RoMedic/Rino450EE romedic.com	Floor-based lift that can lift a patient from the bed or floor in seated or supine position.	450 lb. capacity.
RoMedic/Rino450EM romedic.com	Floor-based lift that can lift a patient from the bed or floor in seated or supine position.	450 lb. capacity. Can also be equipped with a digital scale.
SMT Health System/Volaro Series 4 smthealthsysems.com	Lifts patient from floor, commode, wheelchair, bed and recliner.	450 lb. capacity; many options and slings available.
SMT Health System/Volaro Series 5 smthealthsysems.com	Battery powered lift to lift patient from floor, commode, wheelchair, bed and recliner.	400 lb. capacity; many options and slings available.
Technimotion Medical/Proxi-Motion™ technimotion.com	Floor-based lift for lifting, repositioning, transfers and sit-to-stand assistance.	450 lb. weight capacity. Strap adjustment system.
T.H.E. Medical/Ultralift 300XH themedical.com	Floor-based lift with 6-pt spreader bar; extra-long boom.	600 lb. capacity; low base allows access beneath low beds.
Vancare/Vanderlift vancare.com	Floor-based lifts with many options.	400-1,000 lb. capacity models available.
Waverley Glen/F550 waverleyglen.com	Electronic lift and transfer device.	Dual wheeled castors, legs spread to allow more stability. 550 lb. capacity.

Lateral Transfer Aids and Repositioning Devices (Air Assisted, Friction Reducing, Manual and Powered, Transfer Boards)

Many devices are available for accomplishing lateral transfers as well as repositioning a patient in a bed or a chair. Friction reducing devices are often constructed of smooth synthetic fabrics. These facilitate the lateral transfer or repositioning of patients that can offer limited or no assistance. The reduction of forces required to execute the transfer minimize biomechanical loading of the caregiver's arms and back. Properly designed handles and pull straps can improve the caregivers' grasp and reduce forward reach during transfers. Air-assisted devices are specialty transfer mattresses installed beneath dependent patients onto which a portable air supply is attached that inflates the mattress. Air flows through perforations in the underside of the mattress, reducing the forces required to execute a lateral transfer. Other devices include transfer boards and powered transfer devices. There are also devices for dependency and wheelchairs that will keep that patient from sliding.

Lateral Transfer and Repositioning Aids MFG./PRODUCT/URL	DESCRIPTION	KEY ADVANTAGE
AIR-ASSISTED LATERAL TRANSFER AIDS		
Airpal/Patient Air Lift airpal.com	A flexible nylon mattress that allows lateral transfers of patients from bed to stretcher by the release of low air pressure through a patented chamber.	Patients remain on transfer pad for all ancillary products, including radiology, CT scan, radiation therapy, heart catheterization, physical therapy, labor and delivery.
Airpal/RAMP™ airpal.com	Rapid airway management positioning system.	Achieves proper ear to sterna notch position, alignment of the airway axes and improves glottic exposure.
EZ Way/EZ Matt ezlifts.com	Air-assisted mattress for lateral transfers.	No weight limit.
Hovertech/HoverJack hovermatt.com	Lifts patient from floor to bed or stretcher height.	No weight limit.
Hovertech/Hovermatt hovermatt.com	A waterproof, anti-bacterial anti-stain, nylon mattress that allows for lateral transfers of patients.	No weight limit. Available in single-patient use as well as split-leg for use in the lithotomy position or half-matt for use during cystology and ob/gyn procedures.
Hovertech/HoverTrans Safety Slide hovermatt.com	For evacuation of non-ambulatory patients during emergency.	Uses Teflon-infused polyester for a smooth sliding surface and a bed mattress for patient support and protection.
McAuley Medical/AirSlide mcauleymedical.com	Dual-technology lateral transfer system. Air mattress and slide sheet all in one.	Absence of air holes, stitching and Velcro decreases infection control issues.
Smart Medical/Liftaem™ smartmedtechnology.com	Air-assisted device to assist with lateral patient transfers and patient repositioning.	Can remain on mattress during procedures such as x-rays, CT scans, etc. 1,000 lb. capacity. Single patient use (disposable). Fully-contained cart with blower and storage compartment.
FRICITION REDUCING DEVICES		
ArjoHuntleigh/Maxislide arjohuntleigh.com	An ergonomically-designed device having ultra-low friction properties, that will aid caregivers in moving or	Once the patient has been moved up in bed, there is minimal risk of them sliding back down again after being

	positioning patients while at the same time encouraging good posture without causing undue stress to either the patient or the caregivers.	released.
ArjoHuntleigh/Maxi Slide arjohuntleigh.com	Sliding system that offers a wide range of patient handling maneuvers.	Easy to place and remove from under the patient.
Ergosafe/ErgoSlide LT4400 ergosafeproducts.com	One piece non-mechanical device to laterally transfer from one surface to another without involving multiple caregivers, lifting the patient, or using mechanical equipment.	One piece heavy-duty nylon tube with four sets of handles that folds for easy storage.
EZ Way/EZ Slide Sheets ezlifts.com	Friction reducing device to facilitate patient repositioning, lateral transfers and sling insertion.	Available in various sizes and flat or roller/tube configurations.
Liko/Handy Sheet liko.com/na	Friction-reducing device that can be used for the insertion and removal of slings from patients in the supine or seated position. Can also be used to assist in patient repositioning and lateral transfers.	Available in 2 sizes.
Liko/Handy Tube liko.com/na	Friction-reducing material in a tube configuration to ease patient repositioning in bed. Also comes with straps for lateral transfers of supine patients.	Available in 3 sizes.
McAuley Medical/Slide Sheets mcauleymedical.com	Friction reducing devices in various sizes to ease patient repositioning. Washable.	Disposable versions available.
McAuley Medical/Rotating Seat Cushion mcauleymedical.com	Friction reducing devices that assists in positioning/rotating a patient while in a seated position for transfers.	Can be used on a chair or in a car.
McAuley Medical/One Way Slide Cushion mcauleymedical.com	Can be used in a chair, bed or car to help the patient avoid sliding out of position.	Material slide one way and locks to maintain posterior position.
Phil-E-Slide/Lateral Transfer Aid phil-e-slide.us.com	Used to move a supine patient from one level flat surface to another.	Has six durable handles where pull straps are attached.
Polaris Medical / Polaris Slides polarismedicalinc.com	Used to assist persons movement in bed or chair. With handles or without. Wide selection available.	Available as patient specific disposable slings in many different fabrics and types.
Polaris Medical / One Way Slide cushion polarismedicalinc.com	Used to position and prevent sliding of patient in bed or chair.	Material slide one way and locks to maintain position. Wide selection available with bariatric sizes
Polaris Medical / Twist Assist Swivel cushion polarismedicalinc.com	Cushioned high quality swivel cushion used for chair transfer and standing pivots	Used in hospitals, home care and other areas where seating solutions are required
Polaris Medical / Positioning cushion polarismedicalinc.com	Allows for proper positioning of wheelchair user in chair with easy removal afterwards.	Easy to use and remove.

RoMedic/AutoSlide romedic.com	Used in car to allow users to turn and move sideways easily.	Cushion attaches to the back of the car seat so that the user cannot slide forward.
RoMedic/Easy Slide romedic.com	Used for transfers between beds and x-ray or operating tables, shower trolleys, stretchers, etc.	Can be used for turning users on x-ray or operating tables.
RoMedic/MoveMaster romedic.com	Sliding mat with handles at one end to assist in various transfers and repositioning the patient in bed.	Can be used when transferring to shower chairs or to the toilet.
RoMedic/OneWaySlide romedic.com	Used to improve sitting positions in chairs or wheelchairs.	Allow patient to maintain position without sliding forward.
RoMedic/OneWaySlide Tubular romedic.com	Same as OneWaySlide but tubular material for more active users.	Allow patient to maintain position without sliding forward.
RoMedic/TurnSheet romedic.com	Placed on a mattress cover which is smooth in the middle and has an anti-slip surface at the edges, this minimizes the risk of the user sliding out of the bed.	Does not interfere with properties of pressure-reducing mattresses.
RoMedic/TurnTableSoft romedic.com	Facilitates turning by the use of two round discs with friction-reducing material on one side.	Material resists soiling.
Scan Medical/Safety Sure™ Transfer Slide scanmedical.com	A padded tube of fabric used to transfer a patient from one surface to another without lifting.	Various sizes allow use in different situations and with varying dependency levels of patients.
Slide-Mat/Slide Mat slidemat.com	Eliminates the need for lifting or log-rolling to effectively transfer or reposition.	Comfortable, radiotranslucent, compact and lightweight.
Sundance Tortoise P.A.D. www.sundancesolutions.com	Turning, repositioning and offloading system designed to reposition patients while offloading the sacrum and greater trochanter using a combination of fluidized technology and positive air displacement.	Aids in keeping the patient in a desired position and helps the caregiver reposition (boost) the patient up in bed.
SureHands/One-Way Sheet handimove.com	Glides in one direction only to maintain seated posture.	Comes in sizes to use on a chair or in a bed.
SureHands/Rotating Cushion handimove.com	Used for turning in seated position on chair or bed. Padded.	Allows independent use.
SureHands/Rotation Disk handimove.com	Assists in transfers from bed to chair or toilet.	Patient stands on disk, caregiver can easily pivot them to transfer.
SureHands/Sliding Mat handimove.com	Used for lateral transfers.	Padded version of the slide sheet.
SureHands/Sliding Sheet handimove.com	Friction reducing device to assist in patient repositioning.	Lessens caregiver strain in performing moves and transfers.
Waverley Glen/Four Way Glide waverleyglen.com	Can be used to reposition the patient and then maintain that position.	Bottom is low friction nylon, top is quilted to lock system in place.
Waverley Glen/MultiGlide waverleyglen.com	Can be used to reposition the patient in multiple directions.	Various sizes available.
Waverley Glen/One Way Glide waverleyglen.com	Material slides in one direction only.	Allows patient to maintain position in bed or chair.

Waverley Glen/PediTurn waverleyglen.com	Assists in pivoting patient for transfer.	Low-friction disk with non-slip material on the outer surface.
Waverley Glen/Swivel Cushion waverleyglen.com	Assists patients to rotate while in a seated position.	Low-friction circular cushion with quilted cotton cover.
Wright Products/Slipp Patient Mover wrightproductsinc.com	Used for patient repositioning and transfers.	Easy portability (4 lbs.) and storage.
Wy'East Medical/Pink Slipp wyeastmed.com	Friction reducing device with HD Poly Warm-Touch Technology.™ It glides against itself, reducing skin shear and making lateral transfer and repositioning easier to accomplish.	Individually packaged in a ready-to-use Stat Pak, fits in a pocket or dispenser for immediate use.
MECHANICAL LATERAL TRANSFER DEVICES		
ArjoHuntleigh/TotaLift II Transfer Chair arjohuntleigh.com	Can be used to transfer patient laterally from bed to stretcher, then transport them in sitting or reclining position.	400 lb. capacity. Avoids caregiver having to lift the patient at all.
Astir Technologies/PowerNurse™ astirtechnologies.com	Conveyor belt device that allows caregiver to transfer patient without lifting. Remote control device allows you to select three modes of belt control.	Faster transfers, decreases nursing MSD injuries. Hand-held remote control.
BAMS Manufacturing/PRS prsbacksaver.com	Device that can be attached to a bed or procedure table to do lateral transfer or reposition the patient up in bed.	Requires only one caregiver. Attachment available to rotate the patient or can use a sling to support arm or leg.
Barton Medical Corp./Safe T Trans bartonmedical.com	Device enables a non-ambulatory person to be transferred from surface to surface.	Can be use in various positions e.g. as a bed, gurney bed, lounge chair, or wheelchair.
ConMediSys /MediGLIDER™ conmedisys.com	Patient transfer device with dual-end operational controls, single-use sanitary disposable sheets. Transfers patient in 1-3 minutes.	500 lb. capacity; eliminates lateral transfers.
EZ Way/Repositioner ezlifts.com	Attached to the bed, a sheet is fed from a roller at the foot of the bed to a roller at the head of the bed. As the handle turns the roller the sheet moves the patient toward the head of the bed.	Can be rewound for additional use.
Technimotion/Shuttle Motion™ technimotion.com	Transfer and bedside chair that reclines and extends horizontally over the center of the patient bed.	350 lb. capacity.
T.H.E. Medical/Power Glide Lateral Transfer System themedical.com	Provides all-electric lateral transfers to/from bed/stretcher, OR table, medical imaging table, or other supine surface.	Once the transfer is complete can be used as a transport stretcher.
Wy'East Medical/Totalift II wyeastmed.com	Transfer of your patient laterally from bed to stretcher without lifting, then	Converts from a chair to a horizontal stretcher position. 400 lb. capacity

	adjusts to a sitting or reclining position.	
Wy'East Medical/Totalift PTS wyeastmed.com	Uses the Wy'East Medical patented system to carry the patient from bed to stretcher with no lifting.	Integrated bumper system cushions jolts and reduces damage to hospital furniture.
TRANSFER BOARDS		
Composite Medical Distributors/Durable Wood Transfer Board ultraslick.com	Lightweight transfer board; 250 lb. capacity; 8" wide; lacquer finish.	Available in 13", 18", 24", 27" and 30" lengths, with or without hand holes.
Composite Medical Distributors/UltraSlick® Transfer Board ultraslick.com	Lightweight transfer board; Composite outer layer; 250 lb. capacity; lacquered finish on back to allow for easy placement.	Outer layer never requires waxing or refinishing. Available in 18", 24", 27" and 30" lengths—with and without holes.
McAuley Medical/Rollbord mcauleymedical.com	Utilizes a conveyor belt action to move a patient from surface to surface easily.	Anti-microbial, anti-static material. Disposable cover sheet.
McAuley Medical/Glide Board mcauleymedical.com	Low friction, medical trade plastic device to assist in transfers from wheelchair to chair, car.	Easy to clean, available in many configurations and sizes.
McAuley Medical/Turn Plate mcauleymedical.com	Assist the caregiver in pivoting the patient for seated transfers. Rubber grip on bottom.	Use on any type of flooring.
Polaris Medical / Q2 board polarismedicalinc.com	Low friction, medical trade plastic device to assist in transfers from wheelchair to chair, car.	Antimicrobial. 627lbs weight capacity. Optionally available with an integrated patient specific slide sheet.
Polaris Medical / Lateral Assist Transfer board polarismedicalinc.com	Transfer board with removable cover to assist in transfers from one level surface to another.	Comes in 2 fold or 4 fold for EMS and storage purposes. Comes complete with storage bag.
RoMedic/Easy Glide romedic.com	Used for transfers between wheelchairs and beds, toilets, and car seats.	Made of strong, flexible polyethylene. Anti-slip tape on the underside prevents the board from sliding during transfer. Available in four sizes.
RoMedic/Easy Glide Oval romedic.com	Used for lying transfers, higher up in bed, turning in bed and transfers from one bed to another.	Note: Should have firm underlying surface on both sides when doing transfers.
RoMedic/Easy Glide Extra Long romedic.com	Used for lying transfers, higher up in bed, turning in bed and transfers from one bed to another.	Note: Should have firm underlying surface on both sides when doing transfers.
RoMedic/RollerSlide romedic.com	Used for lying transfers, bridges gaps and moves with the users during the transfer.	Ultra low friction cover can be laundered.
SureHands/Rolbord handimove.com	Used for bed to bed or bed to shower chair transfers.	Makes transfers easier for the patient.
SureHands/Transfer Board handimove.com	Used for transfers to/from objects of the same height.	Promotes independent use.
Waverley Glen/Onward Turntable waverleyglen.com	Assists in pivoting patient for transfer.	Injection molded plastic for institutional use.
Waverley Glen/Two-Move	Transfer board with removable cover	Available in two widths as well as

Lateral Transfer Boards waverleyglen.com	to assist in transfers from one level surface to another.	pediatric.

Other Mobility Aids PRODUCT/MANUFACTURER	DESCRIPTION	KEY ADVANTAGE
Anderlift / Lift and Transport System anderlift.com	When lifted, transported, weighed or bathed, the patient is resting on a "hammock" created by a custom sheet and nestled in the frame.	Four pieces of equipment in one - a bather, bed scale, transportation system and power patient lift. 500 lb. capacity.
Brewer Company / Access High-Low Exam Table brewercompany.com	Powered exam table converts from chair to table and back again. Has grab bars, storage and foot control.	450 lb. weight capacity; 18" low height, 28" when flat
Bruno Independent Living Aids / Electra-Ride II bruno.com	Battery powered stair lift for patient transport.	Safety sensor foot plate and a 45 degree rotation seat at both top and bottom of stairs. Accommodates up to 350 lbs.
Dane Technologies / PowerPal 1000 danetechnologies.com	A workplace safety solution that eliminates the strain and pain of pushing/pulling heavy wheeled loads, battery powered; custom hitches; handles up to 2,000 lbs.	Compact & low profile, clean look, easy maneuverability and quick operation. With ergonomic design and quick to learn features.
Dane Technologies / Wheelchair Mover danetechnologies.com	Power-assisted wheelchair mover transports patients up to 750 lbs.	510k cleared, Class II Medical Powered Device assists in making wheelchair transport safer for the operator to reduce potential injury and physical strain while ensuring a safer mover for patients including ramps. Connects and disconnects to standard wheelchairs.
Diaco / Dental Chair diaco.co.uk	Mobile dental platform designed for wheelchair patients. Patient remains in their own wheelchair at all times while being positioning for dental care treatment.	No need for manually moving the patient, suitable for manual and electric wheelchairs and all patients up to 1,100 lbs.
DJ Products / Cart Caddy Lite djproducts.com	A battery powered, electric tug designed with enough power to push or pull carts that can typically be pushed or pulled by one person.	Designed to prevent the strains and pains often associated with manually pushing and pulling heavy carts and equipment. 1,500 lb. capacity.
DJ Products / Cart Caddy Shorty djproducts.com	A battery powered, electric tug designed with enough power to push or pull carts that can typically be pushed or pulled by one person.	Designed to prevent the strains and pains often associated with manually pushing and pulling heavy carts and equipment. 3,000 lb. capacity.

Sit-to-Stand Lifts

Also called Standing and Raising Aids, these lifts are used for patients with partial weight-bearing capability that need assistance getting up from a seated position for ambulation, or for transfers from a seated to seated position (chair to wheelchair, bed to wheelchair).

Sit-to-Stand Lifts PRODUCT/MANUFACTURER	DESCRIPTION	KEY ADVANTAGE
ArjoHuntleigh/Sara 3000 arjohuntleigh.com	Powered features enable a single caregiver to provide routine handling activities such as transfers and toileting.	400 lb. capacity.
ArjoHuntleigh/Sara Lite arjohuntleigh.com	Raises and lowers semi-dependent patients for transfers and toileting.	385 lb. capacity.
ArjoHuntleigh/Sara Plus arjohuntleigh.com	Standing aid that can provide ambulation and balance training.	420 lb. capacity.
ArjoHuntleigh/Stedy arjohuntleigh.com	Allows patients to stand themselves up before and after toilet transfers.	Encourages independence through participation in the transfer. 264 lb. capacity.
ArjoHuntleigh/Walker arjohuntleigh.com	Walking frame to allow patient to begin ambulation safely.	300 lb. capacity.
BHM Medical/Ergostand bhm-medical.com	Sit-to-stand lift for patients with some physical strength. Can be used for dressing, transfers and hygiene care.	400 lb. capacity.
EZ Way, Inc./EZ Bariatric Sit-to-Stand ezlifts.com	Sit-to-stand lift that can assist in ambulation.	800 lb. capacity.
EZ Way, Inc./EZ Light Stand ezlifts.com	Portable sit-to-stand lift that folds for storage or transport.	Performs transfers or ambulation.
EZ Way, Inc./EZ Smart Stand ezlifts.com	Sit-to-stand lift with many electronic safety features.	400 and 500 lb. capacity.
EZ Way, Inc./EZ Way Stand ezlifts.com	Sit-to-stand lift that can assist with ambulation.	400 and 500 lb. capacity.
Horcher Lifting Systems/Raisa horcher.com	Facilitates standing and light transport. Available in motorized or manual versions.	Has a 350 lb. lifting capacity.
Invacare/Reliant invacare.com	Serves a range of dependency levels in transfers.	Multi-functional slings allow it to be a standing lift or seated transfer lift.
Liko North America/Sabina Lift liko.com/na	Sit-Stand lift for users who can actively participate in transfer process.	For load training, promotion of circulation and stimulation of natural body functions. Various models and options.
Medline/Stand Assist Lift medline.com	Battery operated lifts used to assist patients up to 600 lbs.	Low-profile base legs; 6-point sling cradles.
Polaris Medical / Sit-Stand Lifts polarismedicalinc.com	Range of lifts from 365lbs, 440lbs and 550lbs. Power opening base	Varying weight capacities for specific needs. Can be supplied

TriLine/Bari Wheelchair trilinemedical.com	Manual bariatric wheelchair.	600 lb. capacity.

Beds by Care Setting

[↑ TOP](#)

Homecare/Long Term Care Beds

Med/Surg Beds

This guide is a resource to assist you in choosing the type of bed you need for your particular area of care. It is by no means a complete list. You should do your own research and contact manufacturers for current models and specifications as they may have changed since our last update.

Beds can be purchased in many different configurations. Frames, various siderail configurations, headboards, footboards, mattresses and many accessories can be purchased separately or together depending upon your needs. Specifications included are for the widest and longest sizes available, for other height and width options see the manufacturers' web sites.

We have not addressed the various types of mattresses available in the marketplace, but depending upon your patient's needs, you can get standard, foam, and specialty surfaces (such as air-assisted pressure relief or treatment surfaces). Some of these mattress options also feature anti-microbial covers. It is important to remember that all beds have different deck dimensions and that not all mattresses fit all beds. Please consult the manufacturer to assure that you are using the correct size mattress for your bed.

Available options can include:

- Exit alarm
- Foot board at end of frame to keep patient from sliding down
- Ability to adjust the height of the bed to a comfortable and safe working position for the caregiver as well as to lower the bed to the floor for patients at risk for falls.
- Power assist to use as transport device
- Scale
- Turn assist
- Chair position

Homecare/Long Term Care Beds

[↑ TOP](#)

Homecare beds are generally manufactured for ease of use by home caregivers or for long-term care settings. The head and footboards are usually available in wood-grain laminates to be more aesthetically-pleasing.
