Test Title: Search with results			
Step	Description	Expected Results	Data
1	Within the Search textbox, the user types in text, such as Diab.	As the user is typing, below the search textbox will be a search dropdown to display possible options.	
2	The user completes entering text “Diabetes” and selects “Diabetes” from the suggestion list.	The screen will display the matching results broken out into categories as accordions and an indicator badge shows how many results are in each category.	
3	The user selects a collapsed accordion.	The accordion expands and shows the searched word will be highlighted.	

4	The user selects a search result.	The search term/keywords will be highlighted wherever they occur within the pop up window.	
5	User selects the close button within the pop up window	The pop up window disappears and returns to the search results page.
