

## F433 --- Enter and Store Pharmacy (Medication) Orders (PSI8)

### Enter and Store Pharmacy (Medication) Orders (PSI8)

#### F433 --- Enter and Store Pharmacy (Medication) Orders

Test Title: Enter and Store Pharmacy (Medication) Orders

Description: This covers the functionality of Enter and Store Pharmacy (Medication) Orders

Pre-Condition(s): User must have access to UI-components. User must have CPRS account with eHMP write up role.

Post-Condition(s): N/A

Step Title	Description	Expected Results	Data
1. Access the Record and Enter & Store Pharmacy(Medication)	After logging into eHMP and selecting/confirming a patient, select the Task tab from the Patient Care Information component.	A modal is displayed with the heading, "All Task".	
2. Record and Review Pharmacy from Pharmacy	User selects the "add new Tasks" button in All Task tray.	A "Add a New Observation" tray header opens with a list of options for selection. Make sure all the fields are according to wireframe.	
3. Selection Meds, Outpatient	From the List of Items user selects "Meds, Outpatient".	A "Enter a Task" tray header appears. Make sure all the fields are according to wireframe.	
4. Negative : Selection	User does not select from the list but selects "Back to Order Summary" button .	Focus goes back to "All Task" Tray header.	

5. Mandatory fields	<p>Within the “enter a tasks” tray make sure positive and negative steps for mandatory fields are complete</p> <p>NOTE : There are two forms to file out And make user fist one has a delete and next button at footer</p>	An alert will popup with a warning text “Request New Term” check box.	
6.Footer	Last form (second form ) At the footer user can select one of the buttons (delete, close and add).	All buttons appear within the footer of the form.	
7.Footer “Delete” buttons	User selects the “Delete” button (trashcan icon) from the footer.	<p>If a user opens a form and they never enter any data, but selected Delete. The form will close and return the user back to the button that initiated the form.</p> <p>If the user entered information and it is in draft mode, but selected Delete. A modal will appear asking “Are you sure you want to delete”? Yes or No</p>	
8.Add button	When user selects “add” button the focus goes to the “Pharmacy Added” growl alert.	A growl alert confirmation message will appear. Make sure all the fields are exist according to workflow and the focus goes back to “Pharmacy Added” growl alert.	
9. Close “X” button	User selects the Close or “X” button on top of the form.	A growl alert with “Close and Save” confirmation message will appear. Make sure all the fields are exist according to wireframe and then the user is returned to the “All Task” Tray header.	

## Pharmacy Details View

1. medication Accordion	Instead of selecting "Add new tasks" button on "All Task" tray user selects from "medication" header.	Pharmacy Entry List will open.	
2. Entered in delete	User selected medication entry from the medication Entry List and clicks on "delete" button on the footer.	selected Delete. A modal will appear asking "Are you sure you want to delete"? Yes or No	
3. "View" button	User selects medication entry from the medication Entry List and the user selects the "View" button on the footer.	A "medication" header opens. Make sure all fields exist according to wireframe.	
4. "medication" header	On "Pharmacy" header, user can select the "edit" or "print"	Edit - When the user selects the edit button, the form opens and the user is able to edit the Pharmacy form. Print – When the user selects the print button, the user's default print dialog appears.	
5. Arrange by :status	User clicks on "Arrange by :status" drop-down button	User can sort by 4 option "Location" "Provider" "status" and "title"	
6. Most Recent	User clicks on "Most Recent " drop-down button	Most Recent will change to "least recent "	

		Note : user can sort by select "Most Recent" or "least recent"
