

**User Workflow Overview**

When a user selects the Health Summaries applet, the default collapsed accordions are displayed. The accordion name contains the facility name and the number of individual records tied to the facility. Selection of the accordion, displays a list of individual records. When a user selects an individual record from the list within the accordion, a document appears of information about the patient's record. The Back to Top button is present next to each section to allow the user a short cut to the top of the page.
