APPOINTMENT PROFILE

New Appointment - Provider Added - Time Slots by Week

- Once provider has been selected the system can display available appointment slots

- Adding location and equipement further filter available slots

- Resources can be added in any order

- Susan can view by week or by month

- “Go to this week” will jump to the current week

- The arrow buttons will move forward and backward in time

- The “selected date” will show either the first date for the displayed week, or if Susan has selected a particular timeslot it will show the date of that timeslot

- The “selected time” will remain empty until Susan has selected a timeslot

- The dates and times can either be entered in manually or entered by selecting a timeslot from the calendar.

- Entering in an arbitrary date will jump to the week that contains that date.

- If a date has been defined, entering in an arbitrary time will select that timeslot

-The “Selected Date” and “Selected Time” remain available even when the panel is collapsed, so Susan can hid the calendar and still set the date and time for the appointment
