# APPOINTMENT PROFILE

## New Appointment - Join Group Appointment - Weekly

- The system displays a calendar for the current week that contains all of the group appointments at location this user can access.
- Next to the calendar view is a list view showing the details for each appointment.
- Joining a group appointmetn is different from creating a new appointment for the patient in that the appointment already exists and Susan has to find it -- rather than creating a new from scratch based on the patient’s preferences
- In the calendar each appointment gets a number, and that number corresponds to the identical number identifying the appointment in the list
- Appointment details include 1) name, 2) description, 3) number of available spaces, 4) a button to join that becomes active only when the patient has bee identified, 5) Recurrence, 6) provider and 7) location
- The name links to the full gropu appointment profile which includes things like patient list.
