PATIENT PROFILE

IDENTIFICATION

- Data that identify who the patient is
- Tap/Click picture to change
- This data may not be editable, rather inherited from another system, in which case there would be no “Save” button but perhaps a “Sync” button instead to get the latest

CONTACT

- Data on how to reach the patient but electronically, by voice, and by physical mail
- This data may not be editable, rather inherited from another system, in which case there would be no “Save” button but perhaps a “Sync” button instead to get the latest

STATISTIC

- Some basic stats on the patient’s appointment history

UPCOMING APPOINTMENTS

- A list of patient’s upcoming appointments, shoring when, where and with whom
- Tapping an appointment will display its profile
- Appointments that as associated will have “Linked” icons between them

NOTES

- The first “Notes” tile will alway be blank to allow the user to enter new notes
- Past notes appear in tiles below and are not editable
- It might be worth leaving a note editable for 15 minutes or so after it has been saved to allow for any corrections
